## INTRODUCTION

This case presents a question of exceptional importance: is a company that provides a common-carrier service (like telephone or internet service) immune from Federal Trade Commission enforcement against unfair, deceptive, or anticompetitive conduct in its *non*-common-carrier lines of business? The panel held that so long as a company provides *any* common-carrier service, the “common carrier exception” to the FTC Act confers blanket immunity from *all* FTC enforcement. That holding, which reversed the district court’s contrary determination, is wrong and should be corrected.

1. The panel’s ruling creates an enforcement gap that would leave no federal agency able to protect millions of consumers across the country from unfair or deceptive practices or obtain redress on their behalf. Many companies provide both common-carrier and non-common-carrier services—not just telephone companies like AT&T, but also cable companies like Comcast, technology companies like Google, and energy companies like ExxonMobil (which operate common carrier oil pipelines). Companies that are not common carriers today may gain that status by offering new services or through corporate acquisitions. For example, AOL and Yahoo, which are not common carriers, are (or soon will be) owned by Verizon. The panel’s ruling calls into question the FTC’s ability to

protect consumers from unlawful practices by such companies in *any* of their lines of business.

No other federal agency can fill this gap. The Federal Communications Commission can address harms related directly to telephone or internet service, but it lacks authority over other products or services, such as email and e-commerce. Other agencies have similar jurisdictional limitations. No agency has the same broad enforcement power as the FTC.

The problem is especially severe in the area of consumer data privacy and security. As recent news reports make clear, data breaches can put vast troves of personal data from hundreds of millions of consumers at risk. The FTC is the nation's primary protector of consumer data privacy, but under the panel's ruling it could be powerless against any company that provides a common-carrier service. Consumers would have no protection from breach or misuse of their personal information or practices like false advertising or improper billing. And even where the FCC can act against unjust practices of common carriers, it lacks authority to redress consumer losses. The panel's ruling thus threatens to undermine consumer protection across the economy, leaving millions of consumers defenseless against garden-variety deception and high-tech threats.

2. The panel decision conflicts with prior decisions of this Court and other circuits holding that "common carrier" is an activity-based designation. This

Court has held that the same company may be a common carrier “in some instances but not in others, depending on the nature of the activity which is subject to scrutiny.” *McDonnell Douglas Corp. v. Gen’l Tel. Co.*, 594 F.2d 720, 724 n.3 (9th Cir. 1979); accord *Telesaurus VPC, LLC v. Power*, 623 F.3d 998, 1005 (9th Cir. 2010). The D.C. Circuit reads the term the same way, *see, e.g., S.W. Bell Tel. Co. v. FCC*, 19 F.3d 1475, 1481 (D.C. Cir. 1994), and the Second Circuit has indicated that it does too, *FTC v. Verity Int’l, Ltd.*, 443 F.3d 48, 57 (2d Cir. 2006). The panel ignored these decisions.

3. The panel used flawed methods of statutory construction to misread the statute. The meaning of the exception hinges on what Congress meant by “common carrier” when it drafted the FTC Act in 1914. It was established law at the time that “common carrier” referred to an activity, not a status; a company was a common carrier only when engaged in common carriage activity. Legislative history from 1914 confirms this understanding. The panel disregarded this evidence and instead relied primarily on a *different* statutory exception amended in 1958. That provision sheds no light on Congress’s intent when it drafted the common carrier exception 44 years earlier, and the panel’s reliance on it was a fundamental error.

## BACKGROUND

### A. The Common Carrier Exception

Section 5 of the FTC Act prohibits “unfair methods of competition” and “unfair or deceptive acts or practices” in or affecting commerce and directs the FTC to prevent such conduct. 15 U.S.C. § 45(a). Congress intended Section 5 to be an expansive and flexible weapon against harmful business practices. *E.g.*, *FTC v. Sperry & Hutchinson Co.*, 405 U.S. 233, 239-44 (1972). The FTC has long utilized Section 5 to protect consumers from all manner of harm, including telemarketing fraud, “robocalling,” false advertising, pyramid schemes, price fixing, and many other unlawful and abusive practices. More recently, the FTC has acted under Section 5 to become the nation’s primary protector of the security and privacy of consumer data. Congress has directed the FTC to enforce many other consumer protection laws under Section 5.

As enacted in 1914, Section 5 excepted “banks” and “common carriers subject to the Acts to regulate commerce” from the FTC’s enforcement authority. Section 4 of the Act defined “Acts to regulate commerce” as the Interstate Commerce Act (“ICA”); Congress later added the Communications Act.<sup>1</sup> In 1914, common carriers included railroads, oil pipelines, and telephone companies. That list later expanded to include trucking companies and, in 2015, broadband internet

---

<sup>1</sup> See ch. 311, § 4, 38 Stat. 717, 719 (1914); ch. 49, § 2, 52 Stat. 111 (1938).

providers. But Congress has never changed the language of the common carrier exception itself since 1914.

The FTC Act does not define “common carrier,” but in 1914 it had a well-understood, common law meaning. “Common carrier” was an activity-based term. The same company could be a common carrier for some purposes but not others. *See* JOSEPH STORY, COMMENTARIES ON THE LAW OF BAILMENTS § 499 (8th ed. 1870) (carriers were common carriers as to baggage but not passengers). The Supreme Court had likewise made clear that a firm was a “common carrier” only when performing common-carrier activities. *See Santa Fe, Prescott & Phoenix Ry. Co. v. Grant Bros. Constr. Co.*, 228 U.S. 177, 185 (1913); *Railroad Co. v. Lockwood*, 84 U.S. (17 Wall.) 357 (1873). A firm was not “subject to” the ICA with respect to non-common carrier activities. *Kansas City Southern Ry. Co. v. United States*, 282 U.S. 760, 764 (1931); *ICC v. Goodrich Transit Co.*, 224 U.S. 194, 211 (1912).

The FTC thus has long interpreted the exception as activity-based. For example, in *Massachusetts Furniture & Piano Movers Ass’n*, the Commission explained that if a trucking company “engage[d] in activities unrelated to interstate transportation, such as real estate or manufacturing,” those activities “would not be exempt from FTC jurisdiction merely because they were undertaken by a common carrier subject to the ICA.” 102 F.T.C. 1176, 1213 (1983).

Courts have adopted the same interpretation. In *FTC v. Verity Int'l, Ltd.*, 194 F. Supp. 2d 270 (S.D.N.Y. 2002), the court held that “whether an entity is a common carrier for regulatory purposes depends on the particular activity at issue. In other words, an entity may be a common carrier ... for some purposes and not for others.” *Id.* at 275. It relied on D.C. Circuit decisions construing the meaning of “common carrier” under the Communications Act. *See S.W. Bell*, 19 F.3d at 1480; *National Ass’n of Regulatory Utility Comm’rs v. FCC*, 533 F.2d 601, 608 (D.C. Cir. 1976) (“*NARUC*”). The Second Circuit affirmed on other grounds, but held that “common carrier” should be given its common-law meaning and stated that “the notion of some indelible common carrier ‘status’ ... is highly questionable.” *Verity Int'l*, 443 F.3d at 57 & 59 n.4.

On that understanding, the FTC has repeatedly enforced the FTC Act against the non-common-carriage activities of companies that also provide common carriage. For example, it sued AT&T and T-Mobile for allowing fraudulent charges to be placed on their customers’ telephone bills, and TracFone Wireless for deceiving customers about broadband data service.<sup>2</sup> Those cases have recovered hundreds of millions of dollars for injured consumers.

---

<sup>2</sup> *See FTC v. AT&T Mobility, LLC*, No. 1:14-cv-3227 (N.D. Ga.); *FTC v. T-Mobile USA, Inc.*, No. 2:14-cv-967 (W.D. Wash.); *FTC v. TracFone Wireless, Inc.*, No. 3:15-cv-392 (N.D. Cal.).

## **B. This Case**

AT&T Mobility (AT&T) sells mobile broadband data service. AT&T promised five million smartphone customers “unlimited” mobile data usage but then severely restricted the rate of data throughput when customers exceeded a monthly threshold. In 2014, before the FCC reclassified broadband as a common-carrier service, the FTC sued AT&T for unfair and deceptive practices, seeking consumer redress. AT&T moved to dismiss, arguing that it also provides common-carriage voice service and as a common carrier is thus wholly immune from suit whether or not it deceived its customers. The district court denied the motion on the ground that AT&T is a “common carrier” only when it is “actually engaging in common carriage services.” ER8. The panel reversed and ordered the complaint dismissed, holding that AT&T’s “status” as a common carrier gives it blanket immunity from FTC enforcement.

## **ARGUMENT**

### **I. THIS CASE IS EXCEPTIONALLY IMPORTANT TO CONSUMER PROTECTION.**

If allowed to stand, the panel’s ruling will create an enforcement gap cutting across the American economy. The decision strips the FTC of enforcement power over *all* activities engaged in by a company with the “status” of a common carrier. But no other federal agency has the FTC’s breadth of authority to protect consumers from many unfair or deceptive practices across the economy and to

obtain redress for consumer harm. The FCC's authority, for example, is limited to matters "for and in connection with" common-carrier service, 47 U.S.C. § 201(b). Other agencies (like FERC) that regulate common carriers under the ICA and successor statutes likewise cannot reach non-common-carrier activities. *See Kansas City Southern*, 282 U.S. at 764. The Consumer Financial Protection Bureau is limited to addressing financial products or services. 12 U.S.C. § 5511(a). Thus, under the panel's decision, so long as a company can claim the "status" of a common carrier, consumers may be left unprotected from significant harms caused by its non-common carriage operations.

Moreover, even where (as here) the FCC has authority to act against common carriers under the Communications Act, the panel's decision will make consumers worse off. The FTC can obtain direct redress to consumers for their losses caused by unfair or deceptive behavior. *E.g., FTC v. Pantron I Corp.*, 33 F.3d 1088, 1102 (9th Cir. 1994). Not so the FCC, which can only impose fines payable to the treasury. *See* 47 U.S.C. § 504. The FCC is also subject to a one-year statute of limitations, while the FTC is not. *See id.* § 503(b)(6).

Many companies engage in both common carrier and non-common carrier activities. AT&T and its corporate siblings, for example, sell electronic devices like phones, tablets, and computers; as well as software and services like internet security, home security and automation services, email and data storage service.

AT&T's parent also owns the satellite television provider DIRECTV, which the FTC is currently suing for false advertising.<sup>3</sup> Other large telecommunications companies provide a similar mix of services. Verizon, for example, engages in many of the same types of activities as AT&T. It also recently bought AOL and is set to acquire Yahoo.

The sweep of the panel's ruling is even broader in the wake of the FCC's 2015 order reclassifying broadband internet access as a common-carrier service. Under the opinion, broadband providers will now be deemed to have the "status" of common carriers, with immunity from FTC enforcement. For example, Comcast, the nation's largest cable provider (and the owner of NBCUniversal), is now a common carrier because it provides broadband service. Technology giant Google, which runs a variety of businesses, provides common-carrier broadband service through its Google Fiber subsidiary. Dish Network, a satellite television provider, also provides satellite broadband. All these companies have been subject

---

<sup>3</sup> The FTC believes that a company's common carrier status cannot properly be imputed to parent or sibling corporations. The panel's decision did not address this issue, but it surely will arise in future cases (at least one defendant has already raised it), injecting uncertainty and delay into FTC enforcement and decreasing settlement incentives. Moreover, companies can change their corporate structures at will. Under the panel ruling, a company could easily immunize itself by putting its common-carrier and non-common-carrier operations under the same corporate umbrella.

to FTC enforcement actions—Google four times since 2011—but may now seek to shield all of their conduct from consumer protection enforcement.

The problem is especially severe when it comes to high-tech threats. Cable companies, cloud storage providers, email services and other web-based services hold enormous amounts of personal data that can inflict substantial harm if not properly safeguarded. They continuously develop new products that place consumers at increasing risk. As recent news reports show, security breaches can affect hundreds of millions of people.<sup>4</sup> If the FTC can no longer police these companies' non-common carrier activities, millions of consumers will be unprotected from these and other harms. Not surprisingly, the regulatory gap created by the decision has prompted widespread concern.<sup>5</sup>

The effects of the panel opinion are not limited to communications companies. Oil pipelines are common carriers too. Energy companies like ExxonMobil, Chevron, and Shell typically own pipelines, but also engage in a

---

<sup>4</sup> See, e.g., Nicole Perlroth, *Yahoo Says Hackers Stole Data on 500 Million Users in 2014*, N.Y. TIMES (Sept. 22, 2016), <http://www.nytimes.com/2016/09/23/technology/yahoo-hackers.html>.

<sup>5</sup> See, e.g., Brian Fung, *This Court Ruling Is a 'Fatal Blow' to Consumer Protection, Advocates Say*, WASH. POST. (Aug. 31, 2016), <https://www.washingtonpost.com/news/the-switch/wp/2016/08/31/how-the-worlds-biggest-tech-companies-could-wriggle-out-of-all-privacy-regulations/>; Miriam Gottfried, *Court May Have Ushered in Uncertainty on Privacy Rules*, WALL ST. J. (Sept. 7, 2016), <http://www.wsj.com/articles/court-may-have-ushered-in-uncertainty-on-privacy-rules-1473258065?>.

wide variety of non-common-carrier activities, including oil exploration and production; refining, distribution and sales of petroleum products; and operation of gas stations. The industry has been a focus of the FTC's investigative and enforcement activities throughout its history, often at the specific direction of Congress. *See, e.g.*, 42 U.S.C. §§ 17301-17305. The panel decision calls into question the FTC's ability to continue these efforts.

The decision will also create economic distortions due to unequal enforcement when the same products or services are offered by two different companies, one with common-carrier status and one without it. Worse, it creates a roadmap for companies to attempt to immunize themselves against FTC enforcement by acquiring a common carrier or offering common-carrier service (*e.g.*, by becoming a reseller of cellular phone service, *see Resale & Shared Use of Common Carrier Servs. & Facilities*, 60 F.C.C.2d 261, 307-308 (1976)).

The panel's ruling also threatens the FTC's ability to enforce other important consumer protection statutes including the Children's Online Privacy Protection Act, the Telemarketing and Consumer Fraud and Abuse Act, and the Restore Online Shoppers' Confidence Act, and several others. Those statutes provide the Commission with "the same jurisdiction, powers, and duties as though all applicable terms and provisions of the Federal Trade Commission Act were incorporated into and made a part of this [law]." *See* 15 U.S.C. §§ 6105(b),

6505(d), 8404(a). Many companies subject to these laws also provide common-carrier services. A blanket immunity rule for any company with the “status” of a common carrier could seriously undermine these laws.

## **II. THE PANEL’S RULING CONFLICTS WITH DECISIONS OF OTHER COURTS OF APPEALS AND THIS COURT.**

Both this Court and the D.C. Circuit have previously held that “common carrier” is an activity-based term, and the Second Circuit has strongly signaled that it agrees with that view. The panel did not address these decisions.

The D.C. Circuit held long ago that “common carrier” must be given its common-law meaning. In *NARUC*, the court explained that “[s]ince it is clearly possible for a given entity to carry on many types of activities, it is at least logical to conclude that one can be a common carrier with regard to some activities but not others.” 533 F.2d at 608. In *Computer & Communications Industry Ass’n v. FCC*, 693 F.2d 198 (D.C. Cir. 1982), the D.C. Circuit similarly found it “clear that an entity can be a common carrier with respect to only some of its activities” and hence used the term “to indicate not an entity but rather an activity as to which an entity is a common carrier.” *Id.* at 209 n.59. And in *Southwestern Bell*, the court held that telephone companies were not common carriers for purposes of that case because “[w]hether an entity in a given case is to be considered a common carrier ... turns on the particular practice under surveillance.” 19 F.3d at 1481. Relying on those decisions, the Second Circuit held that “common carrier” as used in the

FTC Act must be given its common-law meaning. *Verity*, 443 F.3d at 57.

Recognizing the activity-based nature of term under common law, the court observed that “[t]he notion of some indelible common carrier ‘status’ ... is highly questionable.” *Id.* at 59 n.4.

In *McDonnell Douglas*, this Court adopted the D.C Circuit’s position, relying on *NARUC* to hold that a company may be a “‘common carrier’ ... in some instances but not in others, depending on the nature of the activity which is subject to scrutiny.” 594 F.2d at 724 n.3; accord *Telesaurus*, 623 F.3d at 1005 (citing *Southwestern Bell* with approval).

Here, the panel held that an entity engaged in common-carrier activity has the “status” of a common carrier for all purposes. The panel did not discuss any of the prior decisions interpreting “common carrier,” nor did it examine the common-law understanding of the term. Its holding cannot be squared with the prior decisions, and rehearing *en banc* is necessary both to resolve the intercircuit conflict and to maintain the uniformity of the Court’s own decisions.

### **III. THE PANEL MISINTERPRETED THE STATUTE.**

Congress has not changed the common carrier exception since its enactment in 1914, and its meaning therefore turns on what Congress intended at that time. The panel made a series of interpretive errors that violated this fundamental tenet of statutory construction.

1. The panel ignored the rule that where words have “a well-known meaning at common law or in the law of this country,” Congress is “presumed to have ... used [them] in that sense.” *Standard Oil Co. v. United States*, 221 U.S. 1, 59 (1911). Indeed, “a court *must* infer, unless the statute otherwise dictates, that Congress means to incorporate the established meaning.” *Nationwide Mut. Ins. Co. v. Darden*, 503 U.S. 318, 322 (1992) (emphasis added). By 1914, it was firmly established in common law and Supreme Court precedent that whether an entity was deemed a common carrier in a given situation depended on the specific activity at issue. *E.g.*, *Santa Fe*, 228 U.S. at 185 (railroad not a common carrier when engaged in private transport); *Goodrich Transit*, 224 U.S. at 211 (ICC could not regulate railroad’s non-common-carrier amusement park operations); *see also Kansas City Southern*, 282 U.S. at 764 (“There is no doubt that common carriers, subject to the Interstate Commerce Act, may have activities which lie outside the performance of their duties as common carriers and are not subject to the provisions of the act.”); STORY, *supra*, § 499.

The panel acknowledged the contemporaneous activity-based understanding of common carrier, but inexplicably found no reason to believe that Congress meant to incorporate that understanding into the statute. Op. 11. Had Congress intended to adopt an activity-based approach, the panel ruled, “it would be expected that Congress would have been more precise in [the statutory] language.”

Op. 12. That flatly illogical approach is the polar opposite of the established-contemporaneous-meaning rule. Given that “common carrier” had a well-understood, activity-based meaning in 1914, Congress had no reason to spell it out more explicitly.

2. The panel compounded that error by contrasting the 1914 common carrier exception with the separate “Packers and Stockyards” exception as amended in 1958. That exception applies to companies “insofar as they are subject to” the Packers and Stockyards Act. The panel held that Congress’s use of explicit activity-based language in 1958 means that the 1914 Congress must have intended the common carrier exception to be status-based. Op. 12. The panel thus read the exceptions as though they had been enacted simultaneously, rather than piecemeal over half a century.

That approach violates the rule that “the view of a later Congress cannot control the interpretation of an earlier enacted statute.” *O’Gilvie v. United States*, 519 U.S. 79, 90 (1996). Indeed, a subsequent statutory amendment has “very little, if any, significance” in interpreting the original statute. *Rainwater v. United States*, 356 U.S. 590, 593 (1958). As this Court has explained, “Congress may amend a statute simply to clarify existing law, to correct a misinterpretation, or to overrule wrongly decided cases. Thus, an amendment to a statute does not

necessarily indicate that the unamended statute meant the opposite.” *Hawkins v. United States*, 30 F.3d 1077, 1082 (9th Cir. 1994).

In *O’Gilvie*, for example, the Supreme Court held that an amendment to the tax code expressly subjecting some types of punitive damages to taxation did not mean that the statute excluded punitive damages before it was amended. Rather, Congress might simply have wanted to “clarify the matter” on some types of damages and “leave the law where it found it” with respect to others. 519 U.S. at 89; *accord Mackey v. Lanier Collection Agency & Serv.*, 486 U.S. 825, 839 (1988).

As these cases make clear, a statutory amendment is not a reliable guide even to interpretation of the very provision that has been amended. A subsequent amendment therefore has even less relevance where, as here, a *different* statutory provision is at issue. Congress’s 1958 changes to the Packers and Stockyards exception thus shed no light on the meaning of the separate common carrier exception passed by a different Congress four decades earlier.

3. The panel wrongly determined that the “banks” exception, also enacted in 1914, demonstrates that the common carrier exception is status based. Just as “common carrier” had an established meaning at the time, so did “banks,” and that meaning was status based. By 1914, it was “settled that ... statutes relative to national banks constitute the measure of the authority of such corporations, and that they cannot rightfully exercise any powers except those

expressly granted.” *California Nat’l Bank v. Kennedy*, 167 U.S. 362, 366 (1897). The same is true today; banks may engage only in activities that are “so closely related to banking or managing or controlling banks as to be a proper incident thereto.” 12 C.F.R. § 225.28(a). In other words, because banks engage only in the business of banking, the bank exception necessarily is status based.

By contrast, it was established in 1914 that common carriers could engage in any line of business. The status-based banks exception thus does not control the common carrier exception. Congress further recognized the distinction by phrasing the exceptions differently: it excluded common carriers only when they are “subject to the Acts to regulate commerce,” but used no comparable language for banks.

4. Finally, the panel misread the legislative history. It held that a legislator’s statements on the House floor were entitled to little weight because they represented the views of only one member. But the legislator in question was a floor manager of the bill, and his statements are therefore “entitled to substantial weight.” *Arizona Power Auth. v. Morton*, 549 F.2d 1231, 1250 (9th Cir. 1977); *see also Kenna v. United States Dist. Ct.*, 435 F.3d 1011, 1015 (9th Cir. 2006) (“[F]loor statements by the sponsors of the legislation are given considerably more weight than floor statements by other members, and they are given even more weight where, as here, other legislators did not offer any contrary views.”); 2A

NORMAN J. SINGER, SUTHERLAND STATUTES AND STATUTORY CONSTRUCTION

§ 48:14 (7th ed. 2014) (floor statements from committee member in charge of bill “have the same interpretive weight as formal committee reports”).

Worse, the panel distorted the meaning of the floor manager’s statements. He said that “where a railroad company engages in work outside that of a public carrier ... *such work ought to come within the scope of this commission for investigation.*” 15 Cong. Rec. 8996 (May 21, 1914) (emphasis added). The panel omitted the italicized clause. Instead, it focused on a statement that the bill would apply to “every corporation engaged in commerce except common carriers, and even as to them I do not know but that we include their operations outside of public carriage regulated by the interstate-commerce act.” *Id.* The panel truncated the phrase “I do not know but that” to “I do not know” and found that it indicated “possible uncertainty.” Op. 19. In fact, the full expression, now archaic but established at the time, means that the speaker had no reason to believe that the Commission’s authority would *not* include non-common-carrier operations.<sup>6</sup> An accurate understanding of the legislative history undermines the panel’s interpretation of the common carrier exception.

---

<sup>6</sup> See, e.g., JAMES CORNWELL, THE YOUNG COMPOSER: PROGRESSIVE EXERCISES ON ENGLISH COMPOSITION 55 (26th ed. 1863) (“I don’t know but that” is equivalent to “I am inclined to think that”). For a literary usage, see II JAMES BOSWELL, LIFE OF JOHNSON 52 (G.B. Hill ed.) (“BOSWELL. ‘Confession?’ JOHNSON. ‘Why, I don’t know but that is a good thing’”).

## CONCLUSION

For the foregoing reasons, the Court should grant rehearing *en banc*.

OPINION

Appeal from the United States District Court  
for the Northern District of California  
Edward M. Chen, District Judge, Presiding

Argued and Submitted June 17, 2016  
San Francisco, California

Filed August 29, 2016

Before: Richard R. Clifton, and Sandra S. Ikuta, Circuit  
Judges, and William Q. Hayes,\* District Judge.

Opinion by Judge Clifton

---

\* The Honorable William Q. Hayes, United States District Judge for the Southern District of California, sitting by designation.

**SUMMARY\*\***

---

**Federal Trade Commission Act**

The panel reversed the district court’s denial of AT&T Mobility LLC’s motion to dismiss, and remanded for an entry of an order of dismissal in an action brought by the Federal Trade Commission under section 5 of the FTC Act that took issue with the adequacy of AT&T’s disclosures regarding its data throttling plan, under which AT&T intentionally reduced the data speed of its customers with unlimited mobile data plans.

Section 5 of the FTC Act contains an exemption for “common carriers subject to the Acts to regulate commerce.” 15 U.S.C. § 45(a)(2). The panel held that AT&T was excluded from the coverage of section 5 of the FTC Act, and FTC’s claims could not be maintained. Specifically, the panel held that, based on the language and structure of the FTC Act, the common carrier exception was a status-based exemption and that AT&T, as a common carrier, was not covered by section 5.

Badger, Federal Trade Commission, San Francisco, California; for Plaintiff-Appellee.

---

### OPINION

CLIFTON, Circuit Judge:

Through a practice referred to by the Federal Trade Commission as “data throttling,” AT&T Mobility LLC intentionally reduces the data speed of its customers with unlimited mobile data plans.<sup>1</sup> A throttled customer receives data at a substantially reduced speed during a given billing cycle once the customer’s data usage during that billing cycle exceeds a threshold determined by AT&T. Unlimited data plan customers are throttled without regard to real-time network congestion.

The FTC filed a complaint against AT&T under section 5 of the FTC Act, 15 U.S.C. § 45(a), taking issue with the adequacy of AT&T’s disclosures regarding its data throttling program. The central issue before us is whether AT&T is covered by section 5, which exempts, among others, “common carriers subject to the Acts to regulate commerce.” We conclude that AT&T is excluded from the coverage of section 5, and that the FTC’s claims cannot be maintained.

---

<sup>1</sup> The facts presented here are those alleged by the FTC in its Complaint. We will refer to the practice by the FTC’s term, data throttling.

## I.

AT&T offers mobile voice service and mobile data service to its customers. Mobile data service allows customers with smartphones to access the internet using AT&T's mobile data network. Customers with mobile data service can, among other things, send and receive email, use GPS navigation, and stream videos.

In 2007, AT&T became the exclusive service provider for the Apple iPhone in the United States. At that time, AT&T began offering iPhone customers an "unlimited" mobile data plan, allowing users access to an unlimited amount of data for a fixed monthly rate. Starting in June 2010, however, AT&T stopped offering unlimited mobile data plans to new customers. Since then, it has required new customers to select one of various "tiered" data plans, under which a customer has a set data allowance per month for a fixed monthly rate and incurs additional charges for any data usage in excess of the set data allowance. Customers with preexisting unlimited data plans were grandfathered into the new system to avoid encouraging them to switch to a different service provider.

In July 2011, AT&T decided to begin reducing the speed at which unlimited data plan users receive data on their smartphones. Under AT&T's data throttling program, unlimited data plan customers are throttled for the remainder of a billing cycle once their data usage during that cycle exceeds a certain threshold. Although AT&T attempts to justify this program as necessary to prevent harm to the network, AT&T's throttling program is not actually tethered to real-time network congestion. Instead, customers are subject to throttling even if AT&T's network is capable of

carrying the customers' data. AT&T does not regularly throttle its tiered plan customers, no matter how much data those customers use.

The FTC contends that AT&T failed to adequately inform its customers of its data throttling program. It asserts two claims against AT&T under section 5 of the FTC Act, pursuant to which the FTC may “prevent persons, partnerships, or corporations, except . . . common carriers subject to the Acts to regulate commerce . . . from using . . . unfair or deceptive acts or practices in or affecting commerce.” 15 U.S.C. § 45(a)(2).

In Count I, the FTC asserts that AT&T's imposition of data speed restrictions on customers with contracts “advertised as providing access to unlimited mobile data” and without terms “provid[ing] that [AT&T] may modify, diminish, or impair the service of customers who use more than a specified amount of data” is an unfair act or practice. In Count II, the FTC asserts that AT&T's failure to adequately disclose that it “imposes significant and material data speed restrictions on unlimited mobile data plan customers who use more than a fixed amount of data in a given billing cycle” is a deceptive act or practice.

AT&T filed a motion to dismiss the FTC's Complaint, contending that it is immune from liability under section 5 because of its status as a common carrier. The FTC opposed the motion, arguing that AT&T is not exempt from liability for violations in connection with its mobile data service, a non-common carrier service, because the common carrier exemption in section 5 protects entities with the status of common carrier only to the extent that the service in question is a common carrier service.

While the motion to dismiss was pending, the Federal Communications Commission reclassified mobile data service from a non-common carrier service to a common carrier service.<sup>2</sup> In response, AT&T argued to the district court that the FCC's Reclassification Order, even though prospective in application, stripped the FTC of authority to maintain its claims against AT&T, even as to past violations.<sup>3</sup>

It is undisputed that AT&T is and was a "common carrier[]" subject to the Acts to regulate commerce" for a substantial part of its activity, but prior to the FCC's Reclassification Order, its mobile data service was not identified and regulated by the FCC as a common carrier service.

The district court denied AT&T's motion to dismiss. *See FTC v. AT&T Mobility LLC*, 87 F. Supp. 3d 1087 (N.D. Cal. 2015). It rejected AT&T's view of the common carrier exemption, concluding that it applies "only where the entity has the status of common carrier and is actually engaging in common carrier activity." *Id.* at 1104. The district court also rejected AT&T's argument that the FCC's Reclassification

---

<sup>2</sup> This classification was recently upheld by the D.C. Circuit in *U.S. Telecom Ass'n v. FCC*, 2016 WL 3251234 (D.C. Cir. June 14, 2016).

<sup>3</sup> The FCC has also taken issue with AT&T's data throttling program. On June 17, 2015, it issued a Notice of Apparent Liability, finding that AT&T "apparently willfully and repeatedly violated the [FCC's] Open Internet Transparency Rule by: (1) using the misleading and inaccurate term 'unlimited' to label a data plan that was in fact subject to prolonged speed reductions after a customer used a set amount of data; and (2) failing to disclose the express speed reductions that it applied to 'unlimited' data plan customers once they hit a specified data threshold." *See In the Matter of AT&T Mobility, LLC*, 30 F.C.C. Rcd. 6613 (2015).

Order stripped the FTC of authority to pursue its claims. *Id.* at 1102–04. According to the district court, the Reclassification Order had no effect on the FTC’s authority over AT&T’s past alleged misconduct. *Id.* at 1104.

AT&T requested that the district court certify its order denying the motion to dismiss for immediate appeal pursuant to 28 U.S.C. § 1292(b). The district court agreed but did not stay the proceedings before it. Following the district court’s certification order, AT&T filed an unopposed petition for permission to appeal, which this court granted.

## II.

We review a district court’s ruling on a motion to dismiss *de novo*. *Colony Cove Properties, LLC v. City of Carson*, 640 F.3d 948, 955 (9th Cir. 2011).<sup>4</sup>

### A.

Section 5 of the FTC Act, on which the FTC relies, contains an exemption for “common carriers subject to the

---

<sup>4</sup> AT&T brought its motion pursuant to Rule 12(b)(1) of the Federal Rules of Civil Procedure, stating that the issue before the district court was “[w]hether th[e] Court possesses subject-matter jurisdiction over the FTC’s complaint, notwithstanding the fact that 15 U.S.C. § 45(a)(2) deprives the FTC of regulatory jurisdiction over ‘common carriers subject to the Acts to regulate commerce.’” AT&T’s framing of its motion is incorrect. The FTC’s statutory authority to bring claims against AT&T has no bearing on the district court’s jurisdiction to consider the FTC’s Complaint. *See United States v. Alisal Water Corp.*, 431 F.3d 643, 650 (9th Cir. 2005). The district court had jurisdiction over the FTC’s claims even if the FTC lacked the statutory authority to bring those claims. AT&T’s motion, in other words, raises a Rule 12(b)(6) issue, not a Rule 12(b)(1) issue.

Acts to regulate commerce.” 15 U.S.C. § 45(a)(2). Section 5 states:

The Commission is hereby empowered and directed to prevent persons, partnerships, or corporations, except banks, savings and loan institutions described in section 57a(f)(3) of this title, Federal credit unions described in section 57a(f)(4) of this title, common carriers subject to the Acts to regulate commerce, air carriers and foreign air carriers subject to part A of subtitle VII of Title 49, and persons, partnerships, or corporations insofar as they are subject to the Packers and Stockyards Act, 1921, as amended [7 U.S.C.A. § 181 et seq.], except as provided in section 406(b) of said Act [7 U.S.C.A. § 227(b) ], from using unfair methods of competition in or affecting commerce and unfair or deceptive acts or practices in or affecting commerce.

*Id.* “Common carrier” is not defined in the FTC Act. “Acts to regulate commerce” are defined as the Interstate Commerce Act of 1887, the Communications Act of 1934, and “all Acts amendatory thereof and supplementary thereto.” 15 U.S.C. § 44. When section 5 was enacted, only the Interstate Commerce Act was included within the term “Acts to regulate commerce.” The Communications Act was added to the definition of “Acts to regulate commerce” after its passage. *See* Wheeler-Lea Act § 2, 52 Stat. 111 (1938).

The issue presented to us is whether the common carrier exemption in section 5 is status-based, such that an entity is exempt from regulation as long as it has the status of a

---

common carrier under the “Acts to regulate commerce,” or is activity-based, such that an entity with the status of a common carrier is exempt only when the activity the FTC is attempting to regulate is a common carrier activity.

AT&T advocates a status-based interpretation of the exemption, arguing that its status as a common carrier under the Communications Act shields it from liability under section 5 even as to non-common carrier activity. According to AT&T, the common carrier exemption bars the FTC from in any way regulating an entity with the status of a common carrier under section 5, even if the common carrier engages in non-common carrier activity.

The FTC, on the other hand, contends that the exemption should be read as activity-based, arguing that an entity is shielded from section 5 liability only to the extent it has the status of a common carrier and the activity at issue is a common carrier activity. According to the FTC, AT&T is not exempt from section 5 liability in this case because mobile data service was not a common carrier activity at the time of AT&T’s alleged violations.

We conclude, based on the language and structure of the FTC Act, that the common carrier exception is a status-based exemption and that AT&T, as a common carrier, is not covered by section 5.

In interpreting a statute, we first consider the language of the statute itself. *See Satterfield v. Simon & Schuster, Inc.*, 569 F.3d 946, 951 (9th Cir. 2009). The plain language of the common carrier exemption casts the exemption in terms of status, contrary to the FTC’s position. The phrase “common carriers subject to the Acts to regulate commerce,” 15 U.S.C.

§ 45(a)(2), does not contain any language suggesting that the activities of a common carrier affect the exemption's application. A literal reading of the words Congress selected simply does not comport with an activity-based approach. *See BedRoc Ltd., LLC v. United States*, 541 U.S. 176, 183 (2004) ("The preeminent canon of statutory interpretation requires us to 'presume that the legislature says in a statute what it means and means in a statute what it says there.'" (quoting *Conn. Nat'l Bank v. Germain*, 503 U.S. 249, 253–54 (1992)) (brackets omitted)).

The common carrier exemption is surrounded by exemptions for "banks," "savings and loan institutions," and "Federal credit unions," all of which the FTC acknowledges are status-based exemptions even though phrased in similar terms as the common carrier exemption it contends is activity-based. The fact that surrounding exemptions are defined in terms of status suggests that "common carriers subject to the Acts to regulate commerce" also carves out a group of entities based on status.

In adopting the FTC's view of the common carrier exemption, the district court concluded that the term "common carrier" was understood to encompass both a status and an activity prior to enactment of the FTC Act. It based this conclusion on a number of Supreme Court cases identifying a regulatory distinction for common carriers between common carrier and non-common carrier activities. In *Santa Fe, Prescott & Phoenix Railway Company v. Grant Brothers Construction Company*, 228 U.S. 177 (1913), for example, the Court noted "the established doctrine . . . that common carriers cannot secure immunity from liability for their negligence by any sort of stipulation," but explained that "this rule has no application when a railroad company is

acting outside the performance of its duty as a common carrier.” *Id.* at 184, 185. Likewise, in *Railroad Company v. Lockwood*, 84 U.S. 357 (1873), the Court stated that an entity is a common carrier when it carries articles as part of its “regularly established business,” but may “become a private carrier, or a bailee for hire, when . . . [it] undertakes to carry something which it is not [its] business to carry.” *Id.* at 377. Prior to the enactment of the FTC Act, the Supreme Court also recognized that common carriers fell outside the scope of the Interstate Commerce Act to the extent they engaged in non-common carrier activities. *See Kansas City S. Ry. Co. v. United States*, 282 U.S. 760, 764 (1931) (“There is no doubt that common carriers, subject to the Interstate Commerce Act, may have activities which lie outside the performance of their duties as common carriers and are not subject to the provisions of the act.”); *Interstate Commerce Comm’n v. Goodrich Transit Co.*, 224 U.S. 194, 211 (1912) (noting that non-common carrier activities are not within the Interstate Commerce Commission’s jurisdiction).

While these cases recognize a distinction between common carrier and non-common carrier activities in the regulation of entities with common carrier status, they do not show that when Congress used the term “common carrier” in the FTC Act, it could only have meant “common carrier to the extent engaged in common carrier activity.” There is no indication that the regulatory distinction in the cases the district court cited is implicit in Congress’s phrasing of the common carrier exemption.

Moreover, awareness of the potential duality of common carriers pre-FTC Act may actually cut against the FTC’s argument. Given the “presum[ption] that Congress is aware of ‘past judicial interpretations and practices’ when it

legislates,” *Bateman v. Am. Multi-Cinema, Inc.*, 623 F.3d 708, 720 (9th Cir. 2010) (quoting *In re Egebjerg*, 574 F.3d 1045, 1050 (9th Cir. 2009)), it would be expected that Congress would have been more precise in its language if it intended the FTC to retain regulatory authority over a common carrier’s non-common carrier activity.

A status-based interpretation of the common carrier exemption also derives significant support from the language of the Packers and Stockyards exemption. Section 5 of the FTC Act exempts “persons, partnerships, or corporations *insofar as they are subject* to the Packers and Stockyards Act, 1921.” 15 U.S.C. § 45(a)(2) (emphasis added). The “insofar as” language, clearly indicative of an activity-based approach, undermines the plausibility of the FTC’s argument that the exemption for “common carriers subject to the Acts to regulate commerce” requires an activity-based interpretation. The language of the common carrier exemption meaningfully varies from that of the Packers and Stockyards exemption. *See S.E.C. v. McCarthy*, 322 F.3d 650, 656 (9th Cir. 2003) (“[T]he use of different words or terms within a statute demonstrates that Congress intended to convey a different meaning for those words. . . . Congress’s explicit decision to use one word over another in drafting a statute is material. . . . It is a decision that is imbued with legal significance and should not be presumed to be random or devoid of meaning.”).

#### B.

The FTC argues that the “insofar as” language in the Packers and Stockyards exemption in section 5 of the FTC Act, which on its face clearly indicates Congress’s intent to adopt an activity-based approach for that exemption (and

therefore, by contrast, indicates that Congress intended to retain a status-based interpretation of the common carrier exemption) actually does not indicate such an intent. The FTC bases this argument on the legislative history of the Packers and Stockyards exemption, but this argument is unpersuasive. To the contrary, our understanding of the statute based on its plain language is bolstered by examination of the statutory history of the Packers and Stockyards exemption and of the FTC's own decisions prior to an amendment of that exemption.

As originally enacted, "persons, partnerships, or corporations *subject to* the Packers and Stockyards Act" were exempted from liability. Wheeler-Lea Act § 3, 52 Stat. 111, 111–12 (1938) (emphasis added). In 1958, Congress amended the exemption to contain the "insofar as" language present today. *See* Pub. L. No. 85-909, § 3, 72 Stat. 1749, 1750 (1958). The FTC contends that the Packers and Stockyards exemption was always activity-based and that the amendment was merely a part of a Congressional effort to clarify the jurisdictional responsibilities of the FTC versus the Secretary of Agriculture. It is unnecessary to rely on legislative history to construe unambiguous statutory language, *see Miranda v. Anchondo*, 684 F.3d 844, 849 (9th Cir. 2012) ("If the statutory language is unambiguous and the statutory scheme is coherent and consistent, judicial inquiry must cease." (quoting *In re Ferrell*, 539 F.3d 1186, 1190 n.10 (9th Cir. 2008))). But even considering the FTC's arguments, the legislative history does not bear out the FTC's claims. The relevant House Report stated that the bill "deals with a reassignment of jurisdiction over unfair trade practices." H.R. Rep. No. 85-1507, at 3. If the amendment had merely been a clarification of the FTC's authority, it is unlikely that

the amendment would have been characterized as a jurisdictional “reassignment.”

The House Report also suggested a status-based understanding of existing law, stating that “[u]nder present law, the Secretary of Agriculture has exclusive jurisdiction over all unfair trade practices engaged in by packers.” *Id.* at 3. The Report noted that “the Secretary has jurisdiction over unfair trade practices in the sale by packers of many articles (such as sporting goods) which are either not at all or only remotely related to agricultural products,” while “the Federal Trade Commission does not have jurisdiction over many of the large national grocery chains by reason of their ownership of a 20 percent or more interest in packinghouses.” *Id.* at 3, 4. If the Packers and Stockyards exemption was truly activity-based prior to its amendment, these statements would have made little sense.

The FTC points to *Food Fair Stores, Inc.*, 54 F.T.C. 392 (1957), in support of its argument that the Packers and Stockyards Act and the corresponding exemption in the FTC Act were understood to be activity-based prior to the 1958 amendment, such that the 1958 amendment is of no consequence to its position. Although the FTC stated in *Food Fair Stores* that “Congress has not removed all activities of packers from the jurisdiction of the Federal Trade Commission, as has been done in the Federal Trade Commission Act in the case of banks,” the decision nonetheless acknowledged that the FTC lacked jurisdiction over the non-packer activities of entities subject to the Packers and Stockyards Act. The FTC stated:

It seems clear from the language of the [Packers and Stockyards] Act and from the

legislative history that Congress designedly made the definition of packer a very broad one. The general purpose was to regulate certain practices of the meat packing business in all its ramifications regardless of its organization or unrelated activities. About the only persons Congress seemed to exempt were those having no packer affiliations. Thus, an independent tanner would not be a packer, merely because of being in the tannery business. Nor would an independent marketer, simply because he marketed meats, meat food products and livestock products, etc. But if either engaged in certain activities traditionally connected with the packing business, or had a designated degree of affiliation therewith, they were included in the definition of packer.

*Id.* at 405. The FTC rejected the argument that “the jurisdiction of the Secretary of Agriculture does not extend to those products not associated with [an entity’s] packing business” in concluding that the grocery chain at issue fell within the definition of “packer” and was therefore subject to the Secretary of Agriculture’s jurisdiction. *Id.* at 406, 408.

In reaching that conclusion, the FTC cited its own decision from one year earlier, *Armour & Co.*, 52 F.T.C. 1028 (1956), in which it dismissed a complaint regarding a packer’s advertising of oleomargarine. In concluding that the Secretary of Agriculture had jurisdiction and the FTC did not, the FTC traced the relevant legislative history of the Packers and Stockyards Act, noting that it reflected Congress’s intention to encompass a packer’s unrelated activities within

its general regulation of packers. *Id.* at 1034–36. The FTC’s opinions prior to amendment of the Packers and Stockyards exemption in 1958 appear more consistent with our understanding of the statutory text than with the FTC’s current arguments.

The FTC also fails to adequately explain what motivation Congress would have had to amend the Packers and Stockyards exemption in 1958 if that exemption was at that time already understood to be activity-based. The FTC links the amendment to *Food Fair Stores*, but it makes little sense for Congress to have amended the Packers and Stockyards Act and the FTC Act exemption if, as the FTC argues, *Food Fair Stores* merely reaffirmed that the FTC retained some jurisdiction over packers. See *Johnson v. Consumerinfo.com, Inc.*, 745 F.3d 1019, 1022 (9th Cir. 2014) (“When Congress acts to amend a statute, we presume it intends its amendment to have real and substantial effect.” (quoting *Stone v. INS*, 514 U.S. 386, 397 (1995))). The more likely explanation is that *Food Fair Stores* took a status-based approach to the Packers and Stockyards Act that Congress squarely addressed in 1958 by “reassign[ing]” jurisdiction over unfair trade practices between the FTC and the Secretary of Agriculture. H.R. Rep. No 85-1507, at 3.

The district court relied on *Crosse & Blackwell Co. v. FTC*, 262 F.2d 600 (4th Cir. 1959), to reject AT&T’s argument regarding the significance of the 1958 amendment. In *Crosse*, the Fourth Circuit concluded that *Crosse & Blackwell*, a canner of soups and similar products, was not exempt from the FTC Act simply because products responsible for something less than three per cent of its annual sales contained meat, thus rejecting the argument that the company’s processing of that meat made it wholly subject

to regulation by the Secretary of Agriculture. It reached that result by interpreting the pre-1958 Packers and Stockyards Act and FTC Act exemption to be activity-based, stating that “it was never intended that relatively inconsequential activity which might be classified as meat packing should insulate all of the other activities of a corporation from the reach of the Federal Trade Commission.” *Id.* at 605. The opinion explicitly acknowledged that it was rejecting “a literal interpretation” of the FTC Act exemption, stating that it “must be laid aside for it is ‘plainly at variance with the policy of the legislation as a whole.’” *Id.* (quoting *Ozawa v. United States*, 260 U.S. 178, 194 (1922)). Instead, the court relied on its view of Congress’s “apparent purpose and intention” in enacting the Packers and Stockyards Act, namely to regulate “the businesses of the stockyards and of the packers as those industries were known and understood at the time.” *Id.* at 604, 606. It observed that Congress, when it enacted the Packers and Stockyards Act, had not anticipated that entities would acquire packing businesses in order to wholly escape regulation by the FTC. *Id.* at 604–05. According to the Fourth Circuit, Congress’s attention was focused solely on the businesses of packers and stockyards as such, and it would not have made sense for Congress to “saddle[] [the Secretary of Agriculture] with responsibility in areas far beyond the bounds of his concern.” *Id.* at 606.

Although *Crosse* supports the FTC’s interpretation of the pre-1958 Packers and Stockyards exemption, it does not do so persuasively. For one thing, the facts are obviously dissimilar. AT&T’s status as a common carrier is not based on its acquisition of some minor division unrelated to the company’s core activities that generates a tiny fraction of its revenue. More broadly, the *Crosse* decision seems to be based on little more than the court’s own view of the most

effective regulatory regime in explicit disregard of the words of the statute. But the text of a statute cannot be disregarded in that manner. “It is not for us to rewrite the statute so that it covers only what we think is necessary to achieve what we think Congress really intended.” *Lewis v. City of Chicago*, 560 U.S. 205, 215 (2010). That is a job for Congress, not the courts. In addition, the legislative history relied upon in the *Crosse* opinion is limited to the origin of the Packers and Stockyards Act of 1921, with no attention to the history or language of the more directly relevant statute, section 5 of the FTC Act. Both the relevant text and a more careful review of that statute’s legislative history demonstrate that when that statute exempted entities “subject to” the Packers and Stockyards Act, as it did prior to 1958, the Packers and Stockyards exemption was status-based. When it was amended in that year to exempt entities “insofar as they are subject” to the Packers and Stockyards Act, the exemption became activity-based. The other exemptions in section 5, including the exemption for common carriers, were not altered, however, and they remained status-based, then and now.

In denying AT&T’s motion to dismiss, the district court relied on legislative history for the more pertinent statute, the FTC Act, citing a statement made during the debate over the House bill that later became the FTC Act. Representative Stevens stated:

I have no doubt that there are many financial institutions of that sort in this country which are engaged in some industrial pursuit that would come within the scope of this act. . . . They ought to be under the jurisdiction of this commission in order to protect the public, in

---

order that all of their public operations should be supervised, just the same as where a railroad company engages in work outside of that of a public carrier. . . . [E]very corporation engaged in commerce except common carriers, and even as to them I do not know but that we include their operations outside of public carriage regulated by the interstate-commerce acts.

51 Cong. Rec. 8996 (May 21, 1914).

The FTC contends that Representative Stevens “plainly envisioned an activity-based reading of the exception,” but his statement was equivocal on its face. What he actually said was “I do not know,” reflecting possible uncertainty in Representative Stevens’s mind as to the actual scope of the bill. Moreover, even if Representative Stevens favored an activity-based reading of the common carrier exemption, his statement represented the understanding of only one member of Congress, not a powerful or persuasive indicator of Congress’s intent. See *New Eng. Power Co. v. New Hampshire*, 455 U.S. 331, 342 (1982) (“Reliance on such isolated fragments of legislative history in divining the intent of Congress is an exercise fraught with hazards, and ‘a step to be taken cautiously.’” (quoting *Piper v. Chris-Craft Indus., Inc.*, 430 U.S. 1, 26 (1977))). The FTC does not cite to any other portion of the FTC Act’s legislative history to support its position.

## C.

The district court also concluded that the FTC's interpretation, though not entitled to *Chevron* deference,<sup>5</sup> was entitled to some deference under *Skidmore v. Swift & Co.*, 323 U.S. 134 (1944). Under *Skidmore*, non-binding agency opinions may be entitled to deference, with "[t]he weight of such a judgment in a particular case . . . depend[ent] upon the thoroughness evident in its consideration, the validity of its reasoning, its consistency with earlier and later pronouncements, and all those factors which give it power to persuade, if lacking power to control." *Id.* at 140.

It is true, as the district court noted, that the FTC has in recent years interpreted the common carrier exemption as activity-based. *See e.g., FTC-FCC Consumer Protection Memorandum of Understanding*, at 2 (Nov. 16, 2015); *Broadband Connectivity Competition Policy*, FTC Staff Report, at 38 (June 2007); *Prepared Statement of the Fed. Trade Comm'n*, 2003 WL 21353573, at \*19 (2003); *FTC Reauthorization, Hearing Before the Subcommittee on Consumer Affairs, Foreign Commerce and Tourism*, S. Hrg. 107-1147, at 28 (2002) (statement of Hon. Sheila F. Anthony, FTC). Under such circumstances, *Skidmore* deference may be appropriate. We conclude, however, that even if the agency's interpretation is entitled to some deference under *Skidmore*, such deference is insufficient to overcome the factors that point strongly in favor of AT&T's position. Given the language of the common carrier exemption and the

---

<sup>5</sup> The FTC has not argued that *Chevron* deference is appropriate in this case. The FTC explicitly disclaimed any reliance on *Chevron* before the district court. *See AT&T Mobility LLC*, 87 F. Supp. 3d at 1101.

---

structure of the FTC Act, we are not persuaded by the FTC's interpretation.

Because we conclude that the common carrier exemption is a status-based exemption that excludes AT&T from section 5's coverage, we need not address AT&T's remaining arguments regarding overlapping regulation and the effect of the FCC's Reclassification Order.

### III.

The common carrier exemption in section 5 of the FTC Act carves out a group of entities based on their status as common carriers. Those entities are not covered by section 5 even as to non-common carrier activities. Because AT&T was a common carrier, it cannot be liable for the violations alleged by the FTC. The district court's denial of AT&T's motion to dismiss is reversed, and the case is remanded for entry of an order of dismissal.

**REVERSED AND REMANDED.**

**ADDENDUM B**  
**RELEVANT STATUTES**

**Federal Trade Commission Act, § 4  
(codified as amended at 15 U.S.C. § 44)**

As originally enacted in 1914, Section 4 of the FTC Act provided in relevant part as follows:

“Acts to regulate commerce” means the Act entitled “An Act to regulate commerce,” approved February, fourteenth, eighteen hundred and eighty-seven, and all Acts amendatory thereof and supplementary thereto.

Ch. 311, § 4 38 Stat. 717, 719 (1914).

The Wheeler-Lea Act of 1938 amended this language to read as follows:

“Acts to regulate commerce” means the Act entitled “An Act to regulate commerce,” approved February 14, 1887, and all Acts amendatory thereof and supplementary thereto and the Communications Act of 1934 and all Acts amendatory thereof and supplementary thereto.

Ch. 49, § 2, 52 Stat. 111 (1938).

Although the official statutory language has not been amended since, this language was revised in the United States Code on the authority of Pub. L. 95-473, §3(b), 92 Stat. 1337, 1466 (1978), to read as follows:

“Acts to regulate commerce” means subtitle IV of title 49 and the Communications Act of 1934 [47 U.S.C. § 151 et seq.] and all Acts amendatory thereof and supplementary thereto.

**Federal Trade Commission Act, § 5**  
**(codified as amended at 15 U.S.C. § 45)**

As originally enacted in 1914, Section 5 of the FTC Act provided in relevant part:

SEC. 5. That unfair methods of competition in commerce are hereby declared unlawful.

The commission is hereby empowered and directed to prevent persons, partnerships, or corporations, except banks, and common carriers subject to the Acts to regulate commerce, from using unfair methods of competition in commerce.

\* \* \*

Ch. 311, § 5, 38 Stat. 717, 719 (1914).

The Wheeler-Lea Act of 1938 amended this language to read as follows:

SEC. 5. (a) Unfair methods of competition in commerce, and unfair or deceptive acts or practices in commerce, are hereby declared unlawful.

The Commission is hereby empowered and directed to prevent persons, partnerships, or corporations, except banks, common carriers subject to the Acts to regulate commerce, and persons, partnerships, or corporations subject to the Packers and Stockyards Act, 1921, except as provided in section 406 (b) of said Act, from using unfair methods of competition in commerce and unfair or deceptive acts or practices in commerce.

\* \* \*

Ch, 49, § 3, 52 Stat. 111, 111-12 (1938).

The Civil Aeronautics Act of 1938 further amended this language to read as follows:

SEC. 5. (a) Unfair methods of competition in commerce, and unfair or deceptive acts or practices in commerce, are hereby declared unlawful.

The Commission is hereby empowered and directed to prevent persons, partnerships, or corporations, except banks, common carriers subject to the Acts to regulate commerce, air carriers and foreign air carriers subject to the Civil Aeronautics Act of 1938, and persons, partnerships, or corporations subject to the Packers and Stockyards Act, 1921, except as provided in section 406 (b) of said Act, from using unfair methods of competition in commerce and unfair or deceptive acts or practices in commerce.

\* \* \*

Ch. 601, § 1107(f), 52 Stat. 973, 1028 (1938).

In 1958, Public Law 85-809 amended this language to read as follows:

SEC. 5. (a) Unfair methods of competition in commerce, and unfair or deceptive acts or practices in commerce, are hereby declared unlawful.

The Commission is hereby empowered and directed to prevent persons, partnerships, or corporations, except banks, common carriers subject to the Acts to regulate commerce, air carriers and foreign air carriers subject to the Civil Aeronautics Act of 1938, and persons, partnerships, or corporations insofar as they are subject to the Packers and Stockyards Act, 1921, as amended, except as provided in section 406 (b) of said Act, from using unfair methods of competition in commerce and unfair or deceptive acts or practices in commerce.

\* \* \*

Pub. L. 85-909, § 3, 72 Stat. 1749, 1750 (1958).

As subsequently amended, the relevant paragraphs of Section 5 currently provide as follows:

**§45. Unfair methods of competition unlawful; prevention by Commission**

**(a) Declaration of unlawfulness; power to prohibit unfair practices; inapplicability to foreign trade**

(1) Unfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce, are hereby declared unlawful.

(2) The Commission is hereby empowered and directed to prevent persons, partnerships, or corporations, except banks, savings and loan institutions described in section 57a(f)(3) of this title, Federal credit unions described in section 57a(f)(4) of this title, common carriers subject to the Acts to regulate commerce, air carriers and foreign air carriers subject to part A of subtitle VII of title 49, and persons, partnerships, or corporations insofar as they are subject to the Packers and Stockyards Act, 1921, as amended [7 U.S.C. 181 et seq.], except as provided in section 406(b) of said Act [7 U.S.C. 227(b)], from using unfair methods of competition in or affecting commerce and unfair or deceptive acts or practices in or affecting commerce.
