

UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF MICHIGAN

ANDREI FENNER and JOSHUA
HERMAN, individually and on behalf of
themselves and all others similarly
situated,

Plaintiffs,

v.

GENERAL MOTORS LLC, a Delaware
Limited Liability Company; ROBERT
BOSCH GMBH, a corporation organized
under the laws of Germany; and
ROBERT BOSCH LLC, a Delaware
Limited Liability Company,

Defendants.

No.

JURY TRIAL DEMANDED

CLASS ACTION COMPLAINT

REQUEST FOR RELIEF182

DEMAND FOR JURY TRIAL183

Plaintiffs Andrei Fenner and Joshua Herman, individually and on behalf of all others similarly situated (the “Class”), allege the following based upon the investigation of counsel, the review of scientific papers, and the proprietary investigation of experts:

I. INTRODUCTION

1. This is what General Motors (“GM”) promised when selling its popular Silverado and Sierra HD Vehicles—that its Duramax engines turned “heavy diesel fuel into a fine mist,” delivering “low emissions” that were a “whopping reduction” compared to the prior model and at the same time produced a vehicle with “great power.” GM claimed its engineers had accomplished a “remarkable reduction of diesel emissions.”

2. As explained in detail below, this is not what GM delivered in the estimated 705,000 or more Silverado and Sierra diesels on the road. In contrast to GM’s promises, emissions testing has revealed that the Sierra and Silverado models emit levels of NOx many times higher than (i) their gasoline counterparts, (ii) what a reasonable consumer would expect, (iii) the Environmental Protection Agency’s maximum standards, and (iv) the levels set for the vehicles to obtain a certificate of compliance that allows them to be sold in the United States.

3. In the last two years, there have been major scandals involving diesel vehicles made by Volkswagen, Audi, Mercedes, and Fiat Chrysler America.

Volkswagen pled guilty to criminal violations of the Clean Air Act, Mercedes is under investigation by the Department of Justice, and Fiat Chrysler America has been notified by the EPA that it has violated the Clean Air Act for improper emissions in hundreds of thousands of 2014-2016 Dodge Ram 1500 EcoDiesels and 2014-2016 Jeep Grand Cherokee EcoDiesels. The diesel vehicles made by these manufacturers evade emissions standards with the help of certain software that turns off emissions controls when the vehicles are not being tested.

4. Testing conducted by engineering experts in emissions testing indicates that GM is no different. Its top selling Silverado and Sierra 2500HD vehicles emit far more pollution on the road than in the emission certification testing environment, and these vehicles exceed federal and state emission standards and employ at least three different “defeat devices” to turn down the emissions controls when the vehicle senses that it is not in the certification test cycle. A defeat device means an auxiliary emissions control device that reduces the effectiveness of the emission control system under conditions which may reasonably be expected to be encountered in normal vehicle operation and use.

5. GM Defeat Device No. 1 reduces or derates the emissions system when temperatures are above the emissions certification test range (86°F). GM Defeat Device No. 2 operates to reduce emissions control when temperatures are below the emissions certification low temperature range (68°F). Testing reveals

that at temperatures below 68°F (the lower limit of the certification test temperature), stop and go emissions are 2.1 times the emissions standard at 428 mg/mile (the standard is 200 mg/mile). At temperatures above 86°F, stop and go emissions are an average of 2.4 times the standard with some emissions as high as 5.8 times the standard. Based on temperatures in the top 30 metropolitan areas, these vehicles are operating with the emissions systems derated a material amount of their vehicle miles travelled. But the emission scheme is a step more nefarious: enter GM Defeat Device No. 3, which reduces the level of emissions controls after 200-500 seconds of steady speed operation in all temperature windows, causing emissions to increase on average of a factor of 4.5. Based on a study of temperatures in 30 major metropolitan areas as well as the demographics of Silverado sales, it is estimated that due to the temperature-triggered defeat devices, the vehicles operate at 65-70% of their miles driven with emissions that are 2.1 to 5.8 times the standard.

6. Increased sales and thus increased profits drove GM to use at least these three defeat devices in its Duramax diesel engines. By reversing the traditional order of the exhaust treatment components and putting the Selective Catalytic Reduction (SCR) in front of the Diesel Particulate Filter (DPF), GM could obtain and market higher power and efficiency from its engines while still passing the cold-start emissions certification tests. This made GM's trucks more

appealing and competitive in the marketplace, driving up sales and profits. But the reordering would have also drastically increased the need to employ Active Regeneration and other power- and efficiency-sapping exhaust treatment measures, reversing the very advantage gained. GM's solution was to install defeat devices to purposefully reduce SCR dosing, increase NO_x emissions, and thus decrease Active Regeneration. The defeat devices allowed GM to have its cake and eat too. It could gain the advantage of hot exhaust going into the SCR system needed to pass cold-start tests, while avoiding the fuel- and power-robbing Active Regeneration procedure that the DPF filter requires when the SCR treatment comes first. GM turned a blind eye to the twofold to fivefold increase in deadly NO_x emissions its scheme caused—all to drive up its sales and profits.

7. Diesel engines pose a difficult challenge to the environment because they have an inherent trade-off between power, fuel efficiency, and emissions. Compared to gasoline engines, diesel engines generally produce greater torque, low-end power, better drivability, and much higher fuel efficiency. But these benefits come at the cost of much dirtier and more harmful emissions.

8. One by-product of diesel combustion is NO_x, which generally describes several compounds comprised of nitrogen and oxygen atoms. These compounds are formed in the cylinder of the engine during the high temperature combustion process. NO_x pollution contributes to nitrogen dioxide, particulate

matter in the air, and reacts with sunlight in the atmosphere to form ozone.

Exposure to these pollutants has been linked with serious health dangers, including serious respiratory illnesses and premature death due to respiratory-related or cardiovascular-related effects. The United States Government, through the Environmental Protection Agency (EPA), has passed and enforced laws designed to protect United States citizens from these pollutants and certain chemicals and agents known to cause disease in humans. Automobile manufacturers must abide by these U.S. laws and must adhere to EPA rules and regulations. This case is not based on these laws but on deception aimed at consumers.

9. Seeing a major opportunity for growth, almost all of the major automobile manufacturers rushed to develop “clean diesel” and promoted new diesel vehicles as environmentally friendly and clean. Volkswagen, Mercedes, GM, Fiat Chrysler America, and other manufacturers began selling diesel cars and trucks as more powerful, yet also as an environmentally friendly alternative to gasoline vehicles. And the marketing worked, as millions of diesel vehicles were purchased between 2007 and 2016.

10. The green bubble with respect to diesel vehicles popped on September 18, 2015, when the EPA issued a Notice of Violation of the Clean Air Act (the “First NOV”) to Volkswagen Group of America, Audi AG, and Volkswagen America for installing illegal “defeat devices” in 2009-2015

Volkswagen and Audi diesel cars equipped with 2.0-liter diesel engines. A defeat device, as defined by the EPA, is any apparatus that unduly reduces the effectiveness of emissions control systems under conditions a vehicle may reasonably be expected to experience. The EPA found that the Volkswagen/Audi defeat device allowed the vehicles to pass emissions testing while in the real world these vehicles polluted far in excess of emissions standards. The California Air Resources Board also announced that it had initiated an enforcement investigation of Volkswagen pertaining to the vehicles at issue in the First NOV.

11. On September 22, 2015, Volkswagen announced that 11 million diesel cars worldwide were installed with the same defeat device software that had evaded emissions testing by U.S. regulators. Volkswagen pled guilty to criminal charges and settled civil class actions for over ten billion dollars.¹

12. Volkswagen wasn't alone—soon, government agencies began to reveal that many manufacturers both in the U.S. and in Europe had produced dozens of models that were exceeding emissions standards. On January 12, 2017, the EPA issued a Notice of Violation to Fiat Chrysler America because it had cheated on its emissions certificates with respect to its popular Dodge Ram and Jeep Grand Cherokee vehicles, and on May 23, 2017 the United States filed a civil

¹ See Exhibit 1, Nathan Bomey, *Volkswagen Emission Scandal Widens: 11 Million Cars Affected*, USA Today (Sept. 22, 2015), <http://www.usatoday.com/story/money/cars/2015/09/22/volkswagen-emissions-scandal/72605874/>.

suit in the Eastern District of Michigan alleging violations of the Clean Air Act (E.D. Mich. No. 2:17-cv-11633).

13. GM is no different. To appeal to environmentally conscious consumers, GM markets its Silverado and Sierra Duramax vehicles as having low emissions, high fuel economy, and powerful torque and towing capacity. GM charges a premium of approximately \$5,000 for diesel-equipped vehicles over comparable gas vehicles.

14. GM's representations are deceptive and false, and GM sold these vehicles while omitting information that would be material to a reasonable consumer that GM has programmed its Silverado and Sierra Duramax vehicles to significantly reduce the effectiveness of the NOx reduction systems during real-world driving conditions.

15. Plaintiffs' on-road testing has confirmed that GM's Silverado and Sierra vehicles with a Duramax engine produce NOx emissions that are not "reduced" or "low" but in fact exceed emission standards, and that GM has programmed the vehicles so that in a wide range of conditions, the emissions systems are powered down, producing NOx in excess of emissions standards. This testing indicates that GM and Bosch have programmed the software to detect a possible emission testing environment and to comply with emissions requirements in that circumstance, but to turn off the emissions controls when a testing

environment is not detected. A reasonable consumer would not expect their Silverado or Sierra vehicle to spew unmitigated NO_x in this fashion while driving in the city or on the highway.

16. Plaintiffs allege that the following GM models powered by Duramax engines are affected by the unlawful, unfair, deceptive, and otherwise defective emission controls utilized by GM: model year 2011-2016 GM Sierra 2500HD and 3500 HD trucks and GM Silverado 2500 HD and 3500 HD trucks (the “Affected Vehicles”).

17. In addition, GM markets the Affected Vehicles as fuel efficient, if not the “best” of any full-sized pickup. Without manipulating its software to turn off the emissions controls, GM could not achieve the fuel economy and range it promises.

18. GM did not previously disclose to Plaintiffs or Class members that in real-world driving conditions, the Affected Vehicles can only achieve high fuel economy, power, and durability by reducing emissions controls in order to spew NO_x into the air.

19. GM never disclosed to consumers that the Affected Vehicles may be “clean” diesels in very limited circumstances but are “dirty” diesels under most driving conditions. GM never disclosed to consumers that it programs its emissions systems to work only under certain conditions. GM never disclosed that it

prioritizes engine power and profits over the environment. GM never disclosed that the Affected Vehicles' emissions materially exceed the emissions from gasoline powered vehicles, that the emissions exceed what a reasonable consumer would expect from a "low emissions" vehicle, and that the emissions materially exceed applicable emissions limits in real-world driving conditions. And GM collected a premium for these trucks by selling them at thousands of dollars over the cost of a comparable gasoline powered truck.

20. GM did not act alone. At the heart of the diesel scandal in the United States and Europe are Bosch GmbH and Bosch LLC (together, "Bosch"). Bosch was an active and knowing participant in the scheme to evade U.S. emissions requirements. Bosch developed, manufactured, and tested the electronic diesel control (EDC) that allowed GM to implement the defeat device. The Bosch EDC-17 is a good enabler for manufacturers to employ "defeat devices" as it enables the software to detect conditions when emissions controls can be detected—*i.e.*, conditions outside of the emissions test cycle. Almost all of the vehicles found or alleged to have been manipulating emissions in the United States (Mercedes, Fiat Chrysler America, Volkswagen, Chevy Cruze) use a Bosch device.

21. Plaintiffs bring this action individually and on behalf of all other current and former owners or lessees of the Affected Vehicles. The Affected Vehicles include all 2011 to 2016 GM Sierra 2500HD/3500HD and Silverado

2500HD/3500HD vehicles. Plaintiffs seek damages, injunctive relief, and equitable relief for GM's and Bosch's misconduct related to the design, manufacture, marketing, sale, and lease of Affected Vehicles, as alleged in this Complaint.

II. JURISDICTION

22. This Court has subject matter jurisdiction over this action under 28 U.S.C. § 1331 because Plaintiffs' claims arise under the RICO Act, 18 U.S.C. § 1962. The Court also has diversity jurisdiction because Plaintiffs and Defendants reside in different states. The Court has supplemental jurisdiction over Plaintiffs' state law claims under 28 U.S.C. § 1367.

23. This Court also has original jurisdiction over this lawsuit pursuant to 28 U.S.C. § 1332(a)(1), as modified by the Class Action Fairness Act of 2005, because Plaintiffs and Defendants are citizens of different states; there are more than 100 members of the Class (as defined herein); the aggregate amount in controversy exceeds \$5 million, exclusive of attorneys' fees, interest, and costs; and Class members reside across the United States. The citizenship of each party is described further below in the "Parties" section.

24. This Court has personal jurisdiction over each Defendant pursuant to 18 U.S.C. § 1965(b) & (d). This Court has personal jurisdiction over Defendants because they have minimum contacts with the United States, this judicial district, and this State, and they intentionally availed themselves of the laws of the United

States and this state by conducting a substantial amount of business throughout the state, including the design, manufacture, distribution, testing, sale, lease, and/or warranty of GM vehicles in this State and District. At least in part because of Defendants' misconduct as alleged in this lawsuit, Affected Vehicles ended up on this state's roads and in dozens of franchise dealerships.

III. VENUE

25. Venue is proper in this Court under 28 U.S.C. § 1391 because:

(i) Defendants conduct substantial business in this District and have intentionally availed themselves of the laws and markets of the United States and this District; and/or (ii) many of the acts and transactions giving rise to this action occurred in this District, including, *inter alia*, GM's promotion, marketing, distribution and sale of the Affected Vehicles to Plaintiffs in this District. Defendant GM sells a substantial number of automobiles in this District, has dealerships located throughout this District, and the misconduct occurred in part in this District. Venue is also proper under 18 U.S.C. § 1965(a) because Defendants are subject to personal jurisdiction in this District, as alleged in the preceding paragraph, and Defendants have agents located in this District.

IV. PARTIES

A. Plaintiffs

1. Andrei Fenner

26. Plaintiff Andrei Fenner (for the purpose of this paragraph, “Plaintiff”) is an individual residing in Mountain View, California. On August 1, 2013, Plaintiff purchased a used 2011 GMC Sierra from Cardinale GMC, an authorized GM dealer in Monterey, California. Plaintiff purchased and still owns this vehicle. Unknown to Plaintiff at the time the vehicle was purchased, it only achieved its promised fuel economy and performance because it was equipped with an emissions system that, during normal driving conditions, exceeded the allowed level of pollutants such as NO_x. GM’s unfair, unlawful, and deceptive conduct in designing, manufacturing, marketing, selling, and leasing the vehicle without proper emission controls has caused Plaintiff out-of-pocket loss, future attempted repairs, and diminished value of his vehicle. GM knew about, or recklessly disregarded, the inadequate emission controls during normal driving conditions, but did not disclose such facts or their effects to Plaintiff, so Plaintiff purchased his vehicle on the reasonable but mistaken belief that his vehicle was a “clean diesel” and/or a “low emission diesel,” complied with U.S. emissions standards, was properly EPA-certified, and would retain all of its promised fuel economy and performance throughout its useful life. Plaintiff selected and ultimately purchased his vehicle, in part, because of the diesel system, as represented through

advertisements and representations made by GM. Plaintiff recalls that before he purchased the vehicle, he reviewed advertisements on GM's website and representations from GM's authorized dealer touting the efficiency, fuel economy, and power and performance of the engine. Had GM disclosed this design or the fact that the GMC Sierra actually emitted unlawfully high levels of pollutants, Plaintiff would not have purchased the vehicle or would have paid less for it. Plaintiff and each Class member has suffered an ascertainable loss as a result of GM's omissions and/or misrepresentations associated with the Duramax engine system, including but not limited to a high premium for the Duramax engine compared to what they would have paid for a gas-powered engine, out-of-pocket losses by overpaying for the vehicles at the time of purchase, and future attempted repairs, future additional fuel costs, decreased performance of the vehicles, and diminished value of the vehicles. Neither GM nor any of its agents, dealers, or other representatives informed Plaintiff or Class members of the existence of the unlawfully high emissions and/or defective nature of the diesel engine system of the Affected Vehicles prior to purchase.

2. Joshua Herman

27. Plaintiff Joshua Herman (for the purpose of this paragraph, "Plaintiff") is an individual residing in Sulphur, Louisiana. On June 4, 2016, Plaintiff purchased a new 2016 Silverado with a Duramax diesel engine from Billy

Navarre Chevrolet, an authorized GM dealer in Sulphur, Louisiana. Plaintiff purchased and still owns this vehicle. Unknown to Plaintiff at the time the vehicle was purchased, it only achieved its promised fuel economy and performance because it was equipped with an emissions system that, during normal driving conditions, emitted many multiples of the allowed level of pollutants such as NOx. GM's unfair, unlawful, and deceptive conduct in designing, manufacturing, marketing, selling, and leasing the vehicle without proper emission controls has caused Plaintiff out-of-pocket loss, future attempted repairs, and diminished value of his vehicle. GM knew about, or recklessly disregarded, the inadequate emission controls during normal driving conditions, but did not disclose such facts or their effects to Plaintiff, so Plaintiff purchased his vehicle on the reasonable but mistaken belief that his vehicle was a "clean diesel," complied with U.S. emissions standards, was properly EPA-certified, and would retain all of its promised fuel economy and performance throughout its useful life. Plaintiff selected and ultimately purchased his vehicle, in part, because of the diesel system, as represented through advertisements and representations made by GM. Plaintiff recalls that before he purchased the vehicle, he reviewed advertisements on GM's website and representations from GM's authorized dealer touting the efficiency, fuel economy, and power and performance of the engine. Had GM disclosed this design or the fact that the Silverado actually emitted unlawfully high levels of

pollutants, Plaintiff would not have purchased the vehicle or would have paid less for it. Plaintiff and each Class member has suffered an ascertainable loss as a result of GM's omissions and/or misrepresentations associated with the Duramax engine system, including but not limited to a high premium for the Duramax engine compared to what they would have paid for a gas-powered engine, out-of-pocket losses by overpaying for the vehicles at the time of purchase, and future attempted repairs, future additional fuel costs, decreased performance of the vehicles, and diminished value of the vehicles. Neither GM nor any of its agents, dealers, or other representatives informed Plaintiff or Class members of the existence of the unlawfully high emissions and/or defective nature of the diesel engine system of the Affected Vehicles prior to purchase.

B. Defendants

1. General Motors

28. Defendant General Motors LLC (GM) is a Delaware limited liability company with its principal place of business located at 300 Renaissance Center, Detroit, Michigan, and is a citizen of the States of Delaware and Michigan. The sole member and owner of General Motors LLC is General Motors Holdings LLC. General Motors Holdings LLC is a Delaware limited liability company with its principal place of business in the State of Michigan.

29. GM, through its various entities, including Chevrolet and GMC, designs, manufactures, markets, distributes, and sells GM automobiles in this District and multiple other locations in the United States and worldwide. GM and/or its agents designed, manufactured, and installed the GM engine systems in the Silverado and Sierra vehicles. GM also developed and disseminated the owner's manuals and warranty booklets, advertisements, and other promotional materials relating to the Affected Vehicles.

2. The Bosch Defendants

30. From at least 2005 to 2015, Robert Bosch GmbH, Robert Bosch LLC, and currently unnamed Bosch employees (together, "Bosch") were knowing and active participants in the creation, development, marketing, and sale of illegal defeat devices specifically designed to evade U.S. emissions requirements in vehicles sold solely in the United States and Europe. These vehicles include the Dodge Ram 1500 EcoDiesel and Jeep Grand Cherokee EcoDiesel, as well as models made by Volkswagen, Audi, Porsche, and Mercedes.

31. The following is a list, excluding the GM vehicles in this case, of all diesel models in the United States with Bosch-supplied software whose emissions exceed standards and are beyond what a reasonable consumer would expect from cars marketed as "clean" or "low emission":

AFFECTED VEHICLES

VOLKSWAGEN:

2.0-liter Class Vehicles

VW Jetta TDI 2009-15
VW Jetta SportWagen TDI 2009-14
VW Beetle TDI 2012-15
VW Beetle Convertible TDI 2012-15
Audi A3 TDI 2010-15
VW Golf TDI 2010-15
VW Golf SportWagen TDI 2015
VW Passat TDI 2012-15

3.0-liter Class Vehicles

VW Touareg TDI 2009-16
Porsche Cayenne Diesel 2013-16
Audi A6 Quattro TDI 2014-16
Audi A7 Quattro TDI 2014-16
Audi A8 TDI 2014-16
Audi A8L TDI 2014-16
Audi Q5 TDI 2014-16
Audi Q7 TDI 2009-16

FIAT CHRYSLER:

Jeep Grand Cherokee EcoDiesel 2014-16
Dodge Ram 1500 EcoDiesel 2014-16

MERCEDES:

ML 320 2007-16	R320 2007-16	S Class 2007-16
ML 350 2007-16	E Class 2007-16	GLK Class 2007-16
GL 320 2007-16	GL Class 2007-16	GLE Class 2007-16
E320 2007-16	ML Class 2007-16	Sprinter 2007-16
S350 2007-16	R Class 2007-16	

32. Bosch participated not just in the development of the defeat device, but in the scheme to prevent U.S. regulators from uncovering the device's true functionality. Moreover, Bosch's participation was not limited to engineering the defeat device (in a collaboration described as unusually close). Rather, Bosch marketed "Clean Diesel" in the United States and lobbied U.S. regulators to approve "Clean Diesel," another highly unusual activity for a mere supplier. These lobbying efforts, taken together with evidence of Bosch's actual knowledge that its software could be operated as a defeat device and participation in concealing the

true functionality of the device from U.S. regulators, can be interpreted only one way under U.S. law: Bosch was a knowing and active participant in a massive, decade-long conspiracy with Volkswagen, GM, and others to defraud U.S. consumers, regulators, and diesel car purchasers or lessees.

33. Robert Bosch GmbH is a German multinational engineering and electronics company headquartered in Gerlingen, Germany. Robert Bosch GmbH is the parent company of Robert Bosch LLC. Robert Bosch GmbH, directly and/or through its North American subsidiary Robert Bosch LLC, at all material times, designed, manufactured, and supplied elements of the defeat device to GM for use in the Affected Vehicles. Bosch GmbH is subject to the personal jurisdiction of this Court because it has availed itself of the laws of the United States through its management and control over Bosch LLC and over the design, development, manufacture, distribution, testing, and sale of hundreds of thousands of the defeat devices installed in the Affected Vehicles sold or leased in the U.S.

34. Robert Bosch LLC is a Delaware limited liability company with its principal place of business located at 38000 Hills Tech Drive, Farmington Hills, Michigan. Robert Bosch LLC is a wholly owned subsidiary of Robert Bosch GmbH. Robert Bosch LLC, directly and/or in conjunction with its parent Robert Bosch GmbH, at all material times, designed, manufactured, and supplied elements of the defeat device to GM for use in the Affected Vehicles.

35. Both Robert Bosch GmbH and Robert Bosch LLC operate under the umbrella of the Bosch Group, which encompasses some 340 subsidiaries and companies. The Bosch Group is divided into four business sectors: Mobility Solutions (formerly Automotive Technology), Industrial Technology, Consumer Goods, and Energy and Building Technology. The Mobility Solutions sector, which supplies parts to the automotive industry, and its Diesel Systems division, which develops, manufactures, and supplies diesel systems, are particularly at issue here and include the relevant individuals at both Bosch GmbH and Bosch LLC. Bosch's sectors and divisions are grouped not by location but by subject matter. Mobility Solutions includes the relevant individuals at both Bosch GmbH and Bosch LLC. Regardless of whether an individual works for Bosch in Germany or the U.S., the individual holds him or herself out as working for Bosch. This collective identity is captured by Bosch's mission statement: "We are Bosch," a unifying principle that links each entity and person within the Bosch Group.²

V. FACTUAL ALLEGATIONS

A. The Environmental Challenges Posed by Diesel Engines and the U.S. Regulatory Response Thereto

36. The U.S. government, through the Environmental Protection Agency (EPA), has passed and enforced laws designed to protect U.S. citizens from

² Exhibit 2, Bosch 2014 Annual Report, *Experiencing quality of life*, available at http://www.bosch.com/media/com/bosch_group/bosch_in_figures/publications/archive/GB2014_EN.pdf (last accessed May 24, 2017).

pollution and, in particular, certain chemicals and agents known to cause disease in humans. Automobile manufacturers must abide by these laws and must adhere to EPA rules and regulations.

37. The U.S. Clean Air Act has strict emissions standards for vehicles, and it requires vehicle manufacturers to certify to the EPA that the vehicles sold in the U.S. meet applicable federal emissions standards to control air pollution. Every vehicle sold in the U.S. must be covered by an EPA-issued certificate of conformity.

38. There is a very good reason that these laws and regulations exist, particularly in regards to vehicles with diesel engines: in 2012, the World Health Organization declared diesel vehicle emissions to be carcinogenic and about as dangerous as asbestos.

39. Diesel engines pose a particularly difficult challenge to the environment because they have an inherent trade-off between power, fuel efficiency, and emissions: the greater the power and fuel efficiency, the dirtier and more harmful the emissions.

40. Instead of using a spark plug to combust highly refined fuel with short hydrocarbon chains, as gasoline engines do, diesel engines compress a mist of liquid fuel and air to very high temperatures and pressures, which causes the diesel

to spontaneously combust. This causes a more powerful compression of the pistons, which produces greater engine torque (that is, more power).

41. The diesel engine is able to do this both because it operates at a higher compression ratio than a gasoline engine and because diesel fuel contains more energy than gasoline.

42. But this greater energy and fuel efficiency comes at a cost: diesel produces dirtier and more dangerous emissions. One byproduct of diesel combustion is oxides of nitrogen (NO_x), which includes a variety of nitrogen and oxygen chemical compounds that only form at high temperatures.

43. NO_x pollution contributes to nitrogen dioxide, particulate matter in the air, and reacts with sunlight in the atmosphere to form ozone. Exposure to these pollutants has been linked with serious health dangers, including asthma attacks and other respiratory illnesses serious enough to send people to the hospital. Ozone and particulate matter exposure have been associated with premature death due to respiratory-related or cardiovascular-related effects. Children, the elderly, and people with pre-existing respiratory illness are at acute risk of health effects from these pollutants. As a ground level pollutant, NO₂, a common byproduct of NO_x reduction systems using an oxidation catalyst, is highly toxic in comparison to nitric oxide (NO). If overall NO_x levels are not sufficiently controlled, then

concentrations of NO₂ levels at ground level can be quite high, where they have adverse acute health effects.

B. Both the Silverado and Sierra Share a Common Duramax Engine

44. For the purposes of this complaint, the following terms are used to describe the Duramax engine found in all Silverado and Sierra vehicles at issue in this case. These two models share the same engine test group and are considered by EPA and ARB to have identical engines.

45. Critical components of the engine are:

1. HCI – Hydrocarbon Injector

46. The hydrocarbon injector (HCI) is located in the turbocharger downpipe. It is simply a fuel injector used to inject diesel fuel into the exhaust stream during active regeneration (cleaning of the diesel particulate filter). This active regeneration strategy is unique as the previous version allowed fuel to be injected into the cylinder during the exhaust stroke instead of utilizing a separate injector.

2. DOC – Diesel Oxidation Catalyst

47. The diesel oxidation catalyst (DOC) converts hydrocarbons and carbon monoxide into water and carbon dioxide through an oxidization reaction. The DOC also converts nitric oxide to nitrogen dioxide to generate favorable conditions for the reduction of NO_x in the SCR system downstream of the DOC.

Finally, the DOC oxidizes fuel injected from the HCI to generate the temperatures required for active regeneration.

3. Diesel Exhaust Fluid Injector

48. The diesel exhaust fluid (DEF) is injected downstream of the DOC. DEF is composed of 32.5% urea (its active ingredient), distilled water, and a very small amount of additives. Because of its urea content, some people call the process “urea injection.” DEF is required for the selective catalytic reduction process to occur. The heat of the exhaust converts the DEF into carbon dioxide and ammonia.

4. SCR – Selective Catalytic Reduction

49. Once DEF is added to the exhaust, it travels through the selective catalytic reduction (SCR) catalyst. Here, oxides of nitrogen (NO_x) are converted to nitrogen gas (N₂) and water (H₂O) by means of a reduction reaction. The SCR system significantly reduces NO_x emissions, reducing the frequency of active regeneration cycles and allowing for more freedom in the calibration of the engine. The drawback of SCR is its increased complexity and the need to carry and replenish the urea fluid (also known by its trademark name AdBlue).

5. DPF – Diesel Particulate Filter

50. Once the exhaust stream has been treated by the DOC and SCR, it travels through the diesel particulate filter (DPF), where particulate matter (soot) is trapped and stored. The DPF is cleaned through a process known as regeneration,

which is divided into two strategies. Passive regeneration occurs at any time the vehicle is being operated and the exhaust gas temperature is high enough to burn the particulate matter trapped by the filter. It is a continuously occurring process, meaning that it naturally occurs whenever the conditions are met under normal operation. Active regeneration occurs only when the engine senses that the DPF needs to be cleaned as the DPF is approaching maximum capacity and generating too much exhaust backpressure. When active regeneration occurs, fuel is injected into the exhaust stream via the HCI to increase the exhaust gas temperature so that the particulate matter can be burned off at carbon's non-catalytic oxidation temperature. Active regeneration dramatically reduces fuel economy since fuel is being used for purposes other than moving the vehicle. The exhaust system features a specifically designed air-cooled exhaust tip to reduce the heat of the exhaust gases as they are expelled. While the DPF is highly effective at trapping particulates, as the amount of particulates accumulates, the resistance to air flow increases also, increasing the load of the engine. To purge the DPF of accumulated deposits, it must undergo a regeneration cycle approximately every 500 km, lasting about 30 minutes. DPF regeneration requires high exhaust temperatures of approximately 600°C that are almost never achieved under normal engine operating conditions. Unfortunately, these conditions may not arise in normal urban driving, requiring the ECU to perform *active regeneration*. In this mode, the

ECU adjusts engine operation to increase exhaust temperature to regenerate the DPF; however, if the vehicle is only driven for short distances, such a temperature may never be reached. At sufficiently high soot load, the vehicle will illuminate a special warning lamp, prompting the driver to drive the vehicle at increased speed to allow active regeneration to take place. Thus, while the DPF is highly effective at reducing particulate emissions, it imposes a performance penalty and can become a hassle for owners who drive their vehicle for short distances.

Furthermore, as demonstrated over the course of testing the Duramax-equipped Silverado, NOx emissions increase by a factor of 5-10 compared to normal driving conditions.

6. EGR – Exhaust Gas Recirculation

51. Exhaust gas recirculation (EGR) is used to reduce NOx emissions. Since oxides of nitrogen form in oxygen rich, high temperature environments, introducing exhaust gases back into the intake air charge reduces the amount of these compounds that form. Exhaust gas recirculation is not a new technology and has been regularly used on diesel engines for many years.

52. The following is a depiction of these components:

C. Emission Test Cycles and Emission Standards

53. An emissions test cycle defines a protocol that enables repeatable and comparable measurements of exhaust emissions to evaluate compliance. The protocol specifies all conditions under which the engine is tested, including lab temperature and vehicle conditions. Most importantly, the test cycle defines the speed and load over time that is used to simulate a typical driving scenario. An example of a driving cycle is shown in Figure A. This graph represents the FTP-75 (Federal Test Procedure) cycle that has been created by the EPA and is used for emission certification and fuel economy testing of light-duty vehicles in the U.S. The cycle simulates an urban route with frequent stops, combined with both a cold and a hot start transient phase. The cycle lasts 1,877 seconds (about 31 minutes) and covers a distance of 11.04 miles (17.77 km) at an average speed of 21.2 mph (34.12 km/h).

54. Besides urban test cycles such as FTP-75, there are also cycles that simulate driving patterns under different conditions. To assess conformance, several of these tests are carried out on a chassis dynamometer, a fixture that holds a car in place while allowing its drive wheel to turn with varying resistance. Emissions are measured during the test and compared to an emissions standard that defines the maximum pollutant levels that can be released during such a test. In the U.S., emissions standards are managed on a national level by the EPA. In addition, California has its own emissions standards that are defined and enforced by the California Air Resources Board (CARB). California standards are also used by a number of other states (“Section 177” states). Together with California, these states cover a significant fraction of the U.S. market, making them a de facto second

national standard. In Europe, the emissions standards are called Euro 1 through Euro 6, where Euro 6 is the most recent standard in effect since September 2014.

55. The FTP-75 is the primary dynamometer cycle used to certify the light- and medium-duty passenger cars/trucks. This cycle is primarily a dynamic cycle, with rapid changes in speed and acceleration meant to reflect city driving along with some steadier higher speed sections meant to account for some highway driving.

56. One critically important thing to understand about the FTP-75 is that it's a "cold start" cycle. That means the vehicle starts the cycle with the engine having been off for at least eight hours and in a completely cold state. The "cold start" portion of the test is challenging for diesel engines employing SCR because catalysts meant to control emissions are not yet at temperatures where they work (*i.e.*, above their "light-off" temperature).

D. GM Profited from Using Multiple Defeat Devices in Its Duramax Diesel Powertrains

57. As noted, the Duramax exhaust treatment system consists of four components: the Exhaust Gas Recirculation System (EGR); the Diesel Oxidation Catalyst (DOC); the Selective Catalytic Reduction (SCR); and the Diesel Particulate Filter (DPF). The DPF traps particulate pollutants (like soot) but has to regenerate regularly in order to maintain low exhaust backpressure. There are two ways the DPF can regenerate: passively through catalysts built into the component

(Passive Regeneration) that use NO₂ (nitrogen dioxide) as the primary oxidizer, and actively, where the engine and HCl generate temperatures high enough to oxidize trapped carbon via direct (*i.e.*, non-catalytic) oxidation (Active Regeneration). Active Regenerations generally, though not always, require the vehicle to be driven at highway speeds for a continuous period. Active regeneration reduces fuel economy, decreasing miles per gallon and engine efficiency. Thus, manufacturers like GM seek to minimize Active Regeneration cycles. Active regeneration also leads to excessive NO_x and reduces the life span of the SCR catalyst as the high temperatures drive hydrothermal aging and deactivation of the SCR catalyst.

58. Passive regeneration relies on the presence of NO_x (specifically NO₂) to catalytically oxidize captured soot. The catalyst oxidizes nitric oxide to nitrogen dioxide, which then reacts at relatively low temperatures to oxidize and remove captured soot. That is, it works best when the exhaust passing through the DPF still contains high levels of NO_x pollutants that trigger the catalyst to regenerate the filter. As a result, most diesel engine manufacturers put the DOC upstream of the SCR system where NO_x concentrations are still relatively high and the DPF is more likely to regenerate via the passive regeneration mechanism.³

³ Exhibit 3, Hannu Jääskeläinen et al., *Heavy-Duty Diesel Engines with Aftertreatment*, DieselNet (Dec. 2016), https://www.dieselnet.com/tech/engine_heavy-duty_aftertreatment.php.

Figure 11. Schematic of typical US 2010 aftertreatment system

59. While the SCR is very effective at reducing NO_x emissions, it requires hot exhaust for the urea catalyst to function properly. Thus, when it is placed downstream of the DPF, so as to increase Passive Regeneration and decrease the need for Active Regeneration, the system takes some time to warm up and does not work well when the engine system is cold. The DPF absorbs much of the heat during exhaust warmup and delays the time for the SCR catalyst to reach its light-off temperature.

60. But emissions testing to allow trucks such as those at issue here to be sold in the United States requires a “cold start” emissions measurement. That is, trucks must emit low levels of NO_x even when they have just started and are not yet operating at high exhaust temperatures. GM did not want to increase Engine Gas Recirculation (EGR) or use other inefficient methods to reduce “cold start” emissions, so it departed from the DOC–DPF–SCR order that other manufacturers use and designed its Duramax engines with the SCR system closer to the engine than the DPF. In the Duramax, the order is as follows:

61. This configuration allows the SCR system to warm up sooner, thus allowing sufficiently reduced NO_x emissions to pass the cold start test required for certification. But there is a catch. Because the NO_x is reduced before the exhaust reaches the DPF filter, there is little Passive Regeneration in the DPF. Without relatively high NO_x levels going into the DPF, more active regenerations would be required, resulting in reduced fuel economy, reduced lifetime of the SCR catalysts, and a significant increase in overall NO_x emissions.

62. GM's solution to this problem was to use at least three separate "defeat devices" to increase engine power and efficiency, increase NO_x levels into the DPF, and decrease the need for Active Regeneration. These defeat devices are explained in detail below. GM cared not that these defeat devices caused the Duramax engine to emit 1.5 to 5.5 times the permissible limit for deadly NO_x pollutants during real-world driving.

63. The defeat devices solved GM's problem by decreasing the dosing of urea used by the SCR system and reducing the overall EGR rate: above (defeat

device 1) and below (defeat device 2) the narrow temperature band in which certification testing is performed (68-86°F); and decreasing the dose of the SCR system and rate of EGR (defeat device 3) after 5-8 minutes of relatively constant engine speed (which never happens during an emissions test). By decreasing the dosing of urea, the SCR allows more NO_x to pass through to the DPF, thus increasing Passive Regeneration in the DPF and decreasing the need for Active Regenerations, which reduce fuel economy, reduce the lifetime of the SCR catalysts, and result in significant increases in overall NO_x emissions. Reduced urea dosing has the added advantage of lower urea consumption, which means lower operating costs and longer service intervals between having to fill the urea catalyst tank.

64. Thus, by putting the SCR in front of the DPF and employing the defeat devices, GM was able to market and sell millions of Duramax-equipped trucks with power and efficiency characteristics that made them very appealing but also caused illegal levels of deadly NO_x pollution. If GM had not employed illegal defeat devices, then its trucks would have been less efficient and less powerful, meaning that GM would not have sold as many and would not have been able to charge as much for them.

E. GM Promoted the Silverado and Sierra Duramax as Low Emission Vehicles Because It Knew the Environment Is Material to a Reasonable Consumer

65. GM understood that a vehicle's pollution footprint is a factor in a reasonable consumer's decision to purchase a vehicle. GM, in press releases, owner's manuals, and brochures that it intended to reach the eyes of consumers, promoted the Duramax engine as delivering "low emissions" or having "reduced NOx emissions." GM was acutely aware of this due to the public perception that diesels are "dirty."

66. Another example where GM promised clean diesel:⁴

67. Likewise, GM's brochure for the Sierra Duramax engine promised "low emissions":⁵

⁴ Exhibit 4, *Five Diesel Myths Debunked*, GM, available at http://www.torquenews.com/sites/default/files/image-119/%5Btitle-raw%5D/dieselmyths_v2.jpg (last accessed May 24, 2017).

DIRECT INJECTION TECHNOLOGY

For fast starts in cold weather, quiet operation and maximum efficiency, the direct injection system helps Sierra HD with the available DURAMAX diesel engine start in as little as 3 seconds at -40°C and operates at nearly 30,000 psi to turn heavy diesel fuel into a fine mist, delivering low emissions and great power.

68. A 2011 Silverado owner's manual promised a 63% reduction in emissions over the previous model:⁶

New system reduces tailpipe NOx emissions

The enhanced, legendary Duramax 6.6L Turbo-Diesel is the most powerful Duramax ever built-generating more horsepower and torque than any competitor. This proven powerplant gets the job done while being friendlier to the environment.

The improved Duramax uses the latest emission control technology, reducing Nitrogen Oxide (NOx) emissions by a whopping 63%, when compared to the 2010 model. GM engineers determined the best way to accomplish this remarkable reduction of diesel emissions was to employ a Selective Catalytic Reduction (SCR) system that uses Diesel Exhaust Fluid (DEF).

Diesel exhaust fluid (DEF)

Diesel Exhaust Fluid (DEF) is a non-flammable fluid comprised of 33% ammonia-based urea and 67% purified water. DEF is used with diesel engine exhaust systems to reduce the amount of emissions produced by turning Nitrogen Oxide (NOx) into nitrogen and water vapor. DEF technology has a proven track record since it has been used in Europe for years.

69. A 2011 advertisement for the Duramax engine stated:⁷

⁵ Exhibit 5, *2016 Sierra 2500*, GMC, <http://www.gmc.com/previous-year/sierra-2500hd-pickup-truck.html> (last accessed May 24, 2017).

⁶ Exhibit 6, *Using Diesel Exhaust Fluid with the Duramax 6.6L Turbo-Diesel*, Chevrolet.

6.6L Duramax LML Duramax LML SPECS & INFO

The LML Duramax was released for 2011 model General Motors & Chevrolet HD trucks. The latest version of the 6.6L Duramax requires advanced emissions equipment, including the use of diesel exhaust fluid injection, to reduce nitrogen oxide emission levels by 63 percent over LMM powered trucks.

70. GM's advertising for the Sierra consistently featured claims of "low emissions":⁸

2016 GMC Sierra 2500HD

DIRECT INJECTION TECHNOLOGY

For fast starts in cold weather, quiet operation and maximum efficiency, the direct injection system helps Sierra HD with the available Duramax diesel engine start in as little as 3 seconds at -40°C and operates at nearly 30,000 psi to turn heavy diesel fuel into a fine mist, delivering low emissions and great power.

71. Another example, from the 2015 GMC Sierra 2500HD brochure, promises "lower emissions":⁹

**FOR FASTER STARTS IN COLD WEATHER,
QUIETER OPERATION AND MAXIMUM
EFFICIENCY, DIRECT INJECTION HELPS THE
AVAILABLE DURAMAX DIESEL START IN AS
LITTLE AS 3.0 SECONDS AT -40°F AND OPERATE
AT NEARLY 30,000 PSI TO TURN HEAVY DIESEL
FUEL INTO A FINE MIST, *BURNING CLEANER***

75. An owner's manual for the 2011 Duramax vehicles promised a "whopping reduction".¹³

NEW SYSTEM REDUCES TAILPIPE NO_x EMISSIONS

The enhanced, legendary Duramax 6.6L Turbo-Diesel is the most powerful Duramax ever built-generating more horsepower and torque than any competitor. This proven powerplant gets the job done while being friendlier to the environment.

The improved Duramax uses the latest emission control technology, reducing Nitrogen Oxide (NO_x) emissions by a whopping 63%, when compared to the 2010 model. GM engineers determined the best way to accomplish this remarkable reduction of diesel emissions was to employ a Selective Catalytic Reduction (SCR) system that uses Diesel Exhaust Fluid (DEF).

76. A 2011 GM press release promised more power and lower emissions:¹⁴

New 6.6L Duramax diesel delivering more power, up to 11-percent greater highway fuel economy up to 63-percent lower emissions, B20 biodiesel capability and quicker acceleration

F. The Deception

1. The 2013 Silverado 2500 diesel test setup.

77. Plaintiffs have extensively tested a 2013 Silverado 2500 diesel using a Portable Emissions Measurement System (PEMS).

¹³ Exhibit 6, *Using Diesel Exhaust Fluid with the Duramax 6.6L Turbo-Diesel*, Chevrolet.

¹⁴ Exhibit 12, *GMC Sierra 2500HD Denali 2500HD - 2011*, GMC Pressroom, http://media.gmc.com/media/us/en/gmc/vehicles/sierra_hd/2011.brand_gmc.html (last accessed May 24, 2017).

78. The vehicle is representative of the class of Duramax diesel engines present in both the Chevrolet Silverado and GMC Sierra model years 2011 to 2016. The population of both the 2500 series and 3500 is large, though the population will most certainly be dominated by the 2500 series. For this reason, a 2500 series was chosen.

79. The vehicle as acquired had approximately 51,000 miles. It is therefore less than mid-way through its full useful life and is still covered under the emissions warranty. Furthermore, the vehicle was factory certified at the time of purchase.

80. The vehicle went through a rigorous check-in process. The vehicle was placed on a hydraulic rack, the underbody cowlings were removed, and the emission control system was examined to confirm the configuration was as expected and that parts were intact and free from damage. The emissions tag was analyzed and compared to the expected emission control group to ensure beyond a shadow of a doubt that the right engine was present and are comparing to the right certified emission standard.

81. The vehicle was also checked for engine faults and maintenance to ensure the maintenance records are clean and that there are no fault codes related to the emission control system. In this case, the vehicle purchased was factory certified, as previously mentioned.

82. The tire pressure and vehicle weight were checked, and the vehicle was loaded to the weight for the test configuration, in this case 9,500 lbs, so that the configuration is equivalent to the certification configuration.

2. Initial results indicate higher than expected emissions.

83. Testing confirmed that the vehicle complies with emissions standards at the temperature windows where the emissions test is performed for certification. But the NO_x emissions increase significantly when the temperature is below 68°F or above 86°F. This means that GM, using software supplied by Bosch, employs a “defeat device” that allows the vehicle to meet emissions standards in the test temperature range. At all other times, NO_x is allowed to be emitted in a much greater amount.

84. Plaintiffs’ experts created a special program that is specific to each vehicle to allow communication with the vehicle’s computer (ECM) in order to extract important operational information like exhaust temperatures, EGR rates, NO_x concentrations upstream of the SCR catalysts, and other information the vehicle’s computer might collect.

85. The Silverado was certified at 100 mg/mile for the highway fuel economy standard test (HWFET), where the standard is 400 mg/mile. Initial testing at steady 60 mph speeds indicated emissions of 533 mg/mile on flat roads or 1.3

times the standard. The Silverado's emission on flat roads for the stop and go standard was 538 mg/mile or 2.7 times the standard of 200 mg/mile.

86. Further testing was done in stop and go conditions with average speeds and relative positive acceleration values that correlate well with the FTP-75 emissions cycle. The blue dots show data where the defeat device below 68°F is active; the green dots represent conditions within the certification temperature window (68°F-86°F); the red dots represent data where the defeat device above 86°F is active. The vertical blue lines represent the temperature limits of the test standard for the test cycle, while the horizontal red line represents the emission standard.

87. One important point must be emphasized in analyzing this data. The PEMS temperature sensor, which collects ambient temperature data, is mounted on top of the vehicle (*i.e.*, at roof level), shielded from the sun by horizontal white metal fins, and well ventilated. This is the ideal setup to collect the true ambient temperature of the surroundings without complication from the sun's radiant heat or stagnant heating because of poor flow.

88. The vehicle's ambient temperature sensor, by contrast, is usually mounted in front of the radiator close to the road. These sensors are not necessarily

shielded from the sun and are highly susceptible to false readings at high ambient temperatures from heat generated by hot black top.

89. When it comes to a defeat device based on ambient temperature, obviously the vehicle will be using its own sensors to trigger the defeat. There are several temperature sensors in the intake manifold for the engine, any combination of which could be used to trigger a defeat device (in addition to the possible use of the ambient temperature sensor). The temperature sensors may not directly measure ambient temperature but are certainly related to ambient temperature. Therefore, the cutoff temperatures, as measured by the PEMS ambient temperature sensor, are not necessarily exactly 68°F or 86°F.

90. It should be noted that the effect of ambient temperature on the inlet NO_x concentrations, the inlet temperature to the SCR catalyst, and outlet temperature of the SCR catalyst were studied to rule out the possibility of delayed light-off because of low ambient temperature. When compared to cold start conditions within the certification temperature window, the cold start temperatures into and out of the SCR catalyst as well as the NO_x concentrations into the SCR catalyst were found to be the same. Thus, the effect of ambient temperature on its own was ruled out as the cause of the high cold start emissions at cold temperature. Clearly, the engine was programmed to produce higher emissions at temperatures below 68°F.

91. The points labeled with a “C” are cold start tests, with distances, RPAs (relative positive accelerations), and average speeds, and overall distance that represent very well the characteristics of the FTP-75 certification cycle. In the case of temperatures below 68°F, cold start emissions exceed the standard by a factor of 2.1 at 428 mg/mile of NO_x with a maximum of 483 mg/mile. During active regenerations, emissions are 1,402 mg/mile on average, or 7 times the emission standard. In the certification temperature window, cold start emissions are 178 mg/mile, which is close to the certification emissions of 200 mg/mile and below the standard of 200 mg/mile. At temperatures above 86°F, cold start emissions were not examined in great detail because hot start emissions were so far in excess of the standard. On average, emissions above 86°F are 479 mg/mile (2.4 times the standard), with excursions as high 1,153 mg/mile (5.8 times the standard).

92. It should be noted, significantly, that the same high temperature behavior was observed in the Chevrolet Cruze and is part of that vehicle’s defeat strategy. Given that the Silverado is a Chevrolet product, it is not surprising that the same defeat strategy was employed.

93. Based on a study of temperatures in 30 major metropolitan areas as well as the demographics of Silverado sales, it is estimated that the high temperature defeat device is active 30-35% of the total population vehicle miles

traveled (VMT). Similar estimates show that the cold temperature defeat device is active approximately 35% of the VMT. In total, these two defeat devices are active 65-70% of VMT with emissions that are 2.1 to 5.8 times the standard.

94. This type of emissions performance is not what a reasonable consumer would expect from a vehicle that “turns NO_x into nitrogen and water vapor,” or “into a fine mist,” or “reduces emissions by a whopping amount.”

3. Further testing demonstrates that GM—enabled by Bosch’s EDC-17—employs three defeat devices.

95. Further testing was conducted so that the vehicle was tested for over 3,500 miles and over a wide range of conditions.

96. Testing confirms the existence of three “defeat devices.” The three cheats, or defeat devices, are:

One:

The vehicles produce emissions above the certification tests at temperatures above the certification range (86°F).

Two:

The vehicles produce higher emissions when temperatures are below the certification test range (68°F).

Three:

Higher emissions occur after the vehicle has been run for 200-500 seconds of steady speed operation on average by a factor of 4.5 in all temperature windows.

a. Defeat Devices One and Two: the Temperature Defeat Devices

97. The test results for Defeat Device One, in stop and go testing with temperatures above 86°F, are 2.4 times the emissions standard, with maximum measured emissions of 1,153 mg/mile or 5.8 times the standard.

98. The test results for Defeat Device Two, in stop and go testing at temperatures below 68°F, were 2.1 times the emissions standard.

99. Further testing at temperatures below 68°F reveals that the vehicle has several active regenerations. Such regenerations are on average 7 times the emissions standard.

b. Defeat Device Three: the Steady Speed Time-Out Defeat

100. In controlled track testing at steady speed, following at steady speeds of 40, 50, and 60 mph, the following observations were made. The blue line represents the NO_x emissions in mg/mile, while the orange line shows vehicle speed in km/hour. What is clear is that NO_x emissions increase over time and markedly about 500 seconds after the steady speed is achieved (40 mph in this case). This is counterintuitive as, if anything, emissions performance should

improve as the catalyst warms up. *It should be noted, importantly, that this data was taken at ambient temperatures in the certification test window.*

101. In this case, the emissions increase by about a factor of 4, while the EGR rate and SCR reduction are significantly reduced. Note that CO₂ emissions go down, which would be reflected in better fuel economy.

102. The motivation for such a defeat is simple. It increases the NO_x going into the DPF, thereby ensuring better passive regeneration performance and, perhaps just as important, better fuel economy. Furthermore, decreasing the effectiveness of the SCR system economizes urea usage, which leads to improved customer satisfaction. Lower EGR rates and higher NO_x mode are generally associated with better fuel economy.

103. An example of this timing defeat device is depicted below:

40 mph Steady Operation

104. The same behavior is observed in the 50 mph test. Again, a large increase in emissions (factor of 2.2) with a drop in EGR rate, a small decrease in SCR rate, and a decrease in CO₂ emissions (*i.e.*, better fuel economy).

105. At 60 mph, the same phenomenon was observed. Emissions double, while EGR rate and SCR reduction go down.

106. After observing this behavior on the test track, experts reviewed previous over-the-road test data in a variety of steady speed conditions (mostly at approximately 60 mph) and found at least 22 instances where the same time phenomenon occurred.

107. The following table summarizes the events:

Condition	Ambient Temp. (°F)	Event #	Pre timeout NO_x (mg/mile)	After timeout NO_x (mg/mile)	Factor Increase	Increase in NO_x (mg/mile) from pre-timeout condition
Downhill 0.7%	55.5	1	200	422	2.1	222
Downhill 0.4%	77.3	2	274	360	1.3	86
Flat	47	3	344	512	1.5	168
Uphill 0.7%	63.6	4	62	197	3.2	135
Mild Hills	63	5	442	531	1.2	89
Downhill 0.7%	52.5	6	17	276	16.2	259
Flat	47.6	7	21	191	9.1	170
Downhill 0.4%	48.3	8	94	372	4.0	278
Downhill 0.6%	53.3	9	47	265	5.6	218
Downhill 0.5%	62.9	10	149	408	2.7	259
Flat	78.8	11	152	273	1.8	121
Downhill 1.3%	70	12	152	596	3.9	444
Uphill 1.3%	64.9	13	177	1428	8.1	1251
Slight hills	68.8	14	129	286	2.2	157
Downhill 0.5%	62.6	15	37	203	5.5	166
Downhill 0.4%	73	16	72	393	5.5	321
Flat	75.3	17	27	168	6.2	141

Condition	Ambient Temp. (°F)	Event #	Pre timeout NOx (mg/mile)	After timeout NOx (mg/mile)	Factor Increase	Increase in NOx (mg/mile) from pre-timeout condition
Downhill 0.7%	90.1	18	28	309	11.0	281
Downhill 0.3%	87.9	19	61	164	2.7	103
Downhill 0.2%	88.4	20	94	231	2.5	137
Downhill 1.4%	67.3	21	475	778	1.6	303
Downhill 0.3%	102.5	22	291	442	1.5	151
				Average	4.5	248

108. The key conclusion here is that this defeat device appears to be active at all temperatures. *In general, the “timeout” defeat device results in a factor of 4.5 increase in NOx once activated.* The exact time for the defeat device to activate varies, but is generally 200-500 seconds. At steady speed, the average increase in NOx once the defeat device kicks in is 248 mg/mile.

109. On average, there is a reduction in the EGR rate (from 18.9% to 17.9% pre- and post-timer) and SCR effectiveness (from 90% to 74% pre- and post-timer). The de-rated use of the SCR system would result in significant savings in urea and would also ensure better operation of the downstream DPF.

4. The test vehicle is representative of all Sierra and Silverado vehicles.

110. Plaintiffs allege that the following GM models are affected by the unlawful, unfair, deceptive, and otherwise defective emission controls: 2011-2016 Silverado 2500HD/3500 HD trucks and Sierra 2500HD /3500HD trucks.

111. Plaintiffs did not test each model to derive plausible allegations that each Affected Vehicle violates U.S. and CARB emissions standards and produces emissions beyond those a reasonable consumer would have expected when he or she purchased their vehicles. Plaintiffs did not need to. As set forth in more detail below, all of the models share either identical or very similar engines and emissions systems, allowing Plaintiffs' experts to plausibly conclude that all Affected Vehicles violate U.S. and CARB standards and the expectations of a reasonable consumer.

112. GM itself grouped the engine used for both the Silverado and Sierra into the same application and test group. CARB and EPA certified the engines in the test group which means, from an emissions standpoint, the engines are considered identical.

113. All variants of the Silverado and Sierra sold in the U.S. are well represented by both the Plaintiffs' list of vehicles and Plaintiffs' test vehicles since GM did not change the engine in any significant way between 2011 and 2016; all vehicles employ the same generation of Duramax engine.

114. Plaintiffs' experts also conducted additional research into the technical literature to understand the various configurations of Duramax engines sold between 2011 and 2016. The literature provides some insight into the architecture of the variants of the engines. In all cases, the engines are shown to have much more commonality than not, leading Plaintiffs' experts to conclude that there is a strong basis for sufficient similarity or "sameness" to warrant inclusion on the list of Affected Vehicles. The vehicles are either equivalent from an emissions standpoint to the test vehicles or use the same core technologies and engine platforms as the test vehicles.

G. This Is Not the Only GM Model to Employ This Deception

115. GM's deceptive emissions practice are also found in the GM Chevy Cruze, giving rise to the inference that its emissions manipulation strategy occurred here and is part of an overall diesel strategy employed by GM and facilitated by Bosch.

116. This is what GM promised for the Chevy Cruze:

117. Plaintiffs have tested the Cruze using a Portable Emissions Measurement System (PEMS). Testing revealed that the Cruze fails to meet U.S. emissions standards as promised. The U.S. standard on the HWFET test is 70 mg/mile. In steady highway driving at 60 mph, the Cruze averaged 128 mg/mile with a high of 557 mg/mile. In stop and go driving, the average was 182 mg/mile with a maximum of 689 mg/mile, or 3.6 to 13.8 times the federal standard. When tested at temperatures below 50°F, the NO_x was 689 mg/mile and it appears the emissions control system stops working. The same is true at temperatures over 85°F, where NO_x rates were tested and ran at 450 to 550 mg/mile.

H. The Bosch EDC-17

118. All modern engines are integrated with sophisticated computer components to manage the vehicle's operation, such as an electronic diesel control.

Bosch tested, manufactured, and sold the EDC system used by Volkswagen, Fiat Chrysler America, Mercedes, and GM. This system is more formally referred to as the Electronic Diesel Control Unit 17 (“EDC Unit 17” or “ED17”). Upon its introduction, EDC Unit 17 was publicly touted by Bosch as follows:¹⁵

EDC17 . . . controls every parameter that is important for effective, low-emission combustion.

Because the computing power and functional scope of the new EDC17 can be adapted to match particular requirements, it can be used very flexibly in any vehicle segment on all the world’s markets. In addition to controlling the precise timing and quantity of injection, exhaust gas recirculation, and manifold pressure regulation, it also offers a large number of options such as the control of particulate filters or systems for reducing nitrogen oxides. The Bosch EDC17 determines the injection parameters for each cylinder, making specific adaptations if necessary. This improves the precision of injection throughout the vehicle’s entire service life. The system therefore makes an important contribution to observing future exhaust gas emission limits.

119. Bosch worked with each vehicle manufacturer that utilized EDC Unit 17 to create a unique set of specifications and software code to manage the vehicles’ engine operation.

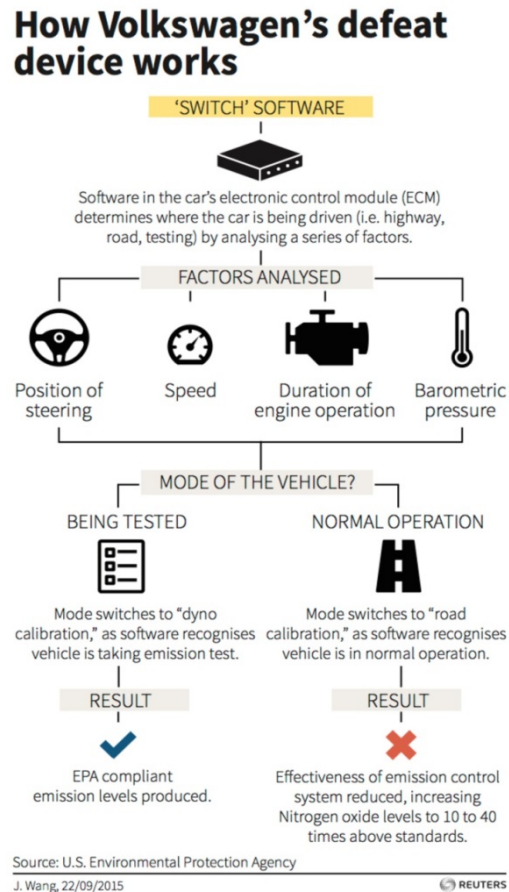

120. With respect to the Affected Vehicles, however, EDC Unit 17 was also enabled by Bosch and GM to surreptitiously evade emissions regulations. Bosch and GM worked together to develop and implement a specific set of

¹⁵ See Exhibit 13, Bosch Press Release, *The brain of diesel injection: New Bosch EDC17 engine management system* (Feb. 28, 2006), <http://www.bosch-presse.de/presseforum/details.htm?txtID=2603&locale=en>.

software algorithms for implementation in the Affected Vehicles, which enabled GM to adjust fuel levels, exhaust gas recirculation, air pressure levels, and even urea injection rates (for applicable vehicles).¹⁶ When carmakers test their vehicles against EPA emission standards, they place their cars on dynamometers (large rollers) and then perform a series of specific maneuvers prescribed by federal regulations. Bosch's EDC Unit 17 gave Volkswagen, GM, and other manufacturers the power to detect test scenarios by monitoring vehicle speed, acceleration, engine operation, air pressure, and even the position of the steering wheel. When the EDC Unit 17's detection algorithm detected that the vehicle was on a dynamometer (and undergoing an emission test), additional software code within the EDC Unit 17 downgraded the engine's power and performance and upgraded the emissions control systems' performance by switching to a "dyno calibration" to cause a subsequent reduction in emissions to legal levels. Once the EDC Unit 17 detected that the emission test was complete, the EDC Unit would then enable a different "road calibration" that caused the engine to return to full power while reducing the emissions control systems' performance, and consequently caused the vehicle to

¹⁶ See, e.g., Exhibit 14, *Engine management*, Bosch Auto Parts, http://de.bosch-automotive.com/en/parts_and_accessories/motor_and_sytems/diesel/engine_management_2/engine_control_unit_1 (last accessed May 24, 2017).

spew the full amount of illegal NOx emissions out on the road.¹⁷ This process is illustrated in the following diagram, applicable to GM as well:

121. This workaround was illegal. The Clean Air Act expressly prohibits defeat devices, defined as any auxiliary emission control device “that reduces the effectiveness of the emission control system under conditions which may reasonably be expected to be encountered in normal vehicle operation and use.” 40 C.F.R. § 86.1803-01; *see also id.* § 86.1809-10 (“No new light-duty vehicle,

¹⁷ Exhibit 15, Russell Hotten, *Volkswagen: The scandal explained*, BBC (Dec. 10, 2015), <http://www.bbc.com/news/business-34324772>.

light-duty truck, medium-duty passenger vehicle, or complete heavy-duty vehicle shall be equipped with a defeat device.”). Moreover, the Clean Air Act prohibits the sale of components used as defeat devices “where the person knows or should know that such part or component is being offered for sale or installed for such use or put to such use.” 42 U.S.C. § 7522(a)(3). Finally, in order to obtain a certificate of compliance (“COC”), automakers must submit an application, which lists all auxiliary emission control devices installed in the vehicle, a justification for each, and an explanation of why the control device is not a defeat device.

122. Thus, in order to obtain the COCs necessary to sell their vehicles, GM did not disclose, and affirmatively concealed from government regulators, the presence of the test-detecting and performance-altering software code that it developed with Bosch, thus making that software an illegal defeat device. In other words, GM, working closely with Bosch, lied to the government, its customers, its dealers, and the public at large.

123. Because the COCs were fraudulently obtained, and because the Affected Vehicles did not conform “in all material respects” to the specifications provided in the COC applications, the Affected Vehicles were never covered by a valid COC, and thus were never legal for sale, nor were they EPA and/or CARB compliant as represented. GM and Bosch hid these facts from the EPA, CARB and other regulators, its dealers, and consumers, and it continued to sell and lease the

Affected Vehicles to the driving public despite their illegality and with the complicity of Bosch.

124. GM's illegal workaround was enabled by its close partnership with Bosch, which enjoyed a sizable portion of its annual revenue from manufacturing parts used in GM's and other manufacturers' diesel vehicles.¹⁸ Bosch was well aware that GM was using its emissions control components as a defeat device and, in fact, worked with GM to develop the software algorithm specifically tailored for the Affected Vehicles.

125. Because the COCs were fraudulently obtained, the Affected Vehicles were never covered by valid COCs and thus were never offered legally for sale. GM hid these facts from the EPA, CARB and other state regulators, and consumers, and it continued to sell and lease the Affected Vehicles despite their illegality and with the complicity of Bosch.

I. Bosch Played a Critical Role in the Defeat Device Scheme in Many Diesel Vehicles in the U.S.

126. Although this case is not about Volkswagen, Bosch's history with Volkswagen provides background and support for its participation in the RICO enterprise alleged herein, of which Bosch and GM were participants. The

¹⁸ Approximately 50,000 of Bosch's 375,000 employees worked in the diesel technology operations branch of Bosch, and Volkswagen was the biggest diesel manufacturer in the world. See Exhibit 16, *Bosch probes whether its staff helped VW's emissions rigging*, Automotive News (Jan. 27, 2016), <http://www.autonews.com/article/20160127/COPY01/301279955/bosch-probes-whether-its-staff-helped-vws-emissions-rigging>.

following details of Bosch's involvement with Volkswagen are taken from the publicly filed complaint in the Volkswagen litigation, which was filed after the benefit of discovery. On information and belief, Plaintiffs allege that the same level of coordination between Bosch and Volkswagen also occurred between Bosch and GM.

1. Volkswagen and Bosch conspire to develop the illegal defeat device.

127. Bosch tightly controlled development of the control units in the Affected Vehicles and actively participated in the development of the defeat device.

128. As discussed above, Bosch introduced a new generation of diesel ECUs for Volkswagen.

129. A February 28, 2006 Bosch press release introduced the "New Bosch EDC17 engine management system" as the "brain of diesel injection" which "controls every parameter that is important for effective, low-emission combustion." The EDC17 offered "[e]ffective control of combustion" and a "[c]oncept tailored for all vehicle classes and markets." In the press release, Bosch touted the EDC17 as follows:¹⁹

¹⁹ See Exhibit 13, Bosch press release, *The brain of diesel injection: New Bosch EDC17 engine management system* (Feb. 28, 2006), <http://www.bosch-presse.de/presseforum/details.htm?txtID=2603&locale=en>.

EDC17: Ready for future demands

Because the computing power and functional scope of the new EDC17 can be adapted to match particular requirements, it can be used very flexibly in any vehicle segment on all the world's markets. In addition to controlling the precise timing and quantity of injection, exhaust gas recirculation, and manifold pressure regulation, it also offers a large number of options such as the control of particulate filters or systems for reducing nitrogen oxides. The Bosch EDC17 determines the injection parameters for each cylinder, making specific adaptations if necessary. This improves the precision of injection throughout the vehicle's entire service life. The system therefore makes an important contribution to observing future exhaust gas emission limits.

130. Bosch and Volkswagen worked together closely to modify the software and to create specifications for each vehicle model. Indeed, customizing a road-ready ECU is an intensive three- to five-year endeavor involving a full-time Bosch presence at an automaker's facility.

131. All Bosch ECUs, including the EDC17, run on complex, highly proprietary engine management software over which Bosch exerts nearly total control. In fact, the software is typically locked to prevent customers, like Volkswagen and GM, from making significant changes on their own.

132. Bosch's security measures further confirm that its customers cannot make significant changes to Bosch software without Bosch involvement. Bosch boasts that its security modules protect vehicle systems against unauthorized access in every operating phase, meaning that no alteration could have been made

without either a breach of that security—and no such claims have been advanced—or Bosch’s knowing participation.²⁰

133. Unsurprisingly, then, at least one car company engineer has confirmed that Bosch maintains absolute control over its software as part of its regular business practices:²¹

I’ve had many arguments with Bosch, and they certainly own the dataset software and let their customers tune the curves. Before each dataset is released it goes back to Bosch for its own validation.

Bosch is involved in all the development we ever do. They insist on being present at all our physical tests and they log all their own data, so someone somewhere at Bosch will have known what was going on.

All software routines have to go through the software verification of Bosch, and they have hundreds of milestones of verification, that’s the structure

The car company is *never* entitled by Bosch to do something on their own.

Thus, Bosch cannot convincingly argue that the development of the “akustik” device was the work of a small group of rogue engineers.

134. In fact, Volkswagen’s and Bosch’s work on the EDC17 reflected a highly unusual degree of coordination. It was a massive project that required the work of numerous Bosch coders for a period of more than ten years, or perhaps

²⁰ Exhibit 17, *Reliable Protection for ECUs*, ESCRYPT (May 12, 2016), <https://www.escrypt.com/en/news-events/protection-for-ecus>.

²¹ Exhibit 18, Michael Taylor, *EPA Investigating Bosch over VW Diesel Cheater Software*, Car and Driver (Nov. 23, 2015), <http://blog.caranddriver.com/epa-investigating-bosch-over-vw-diesel-cheater-software/>.

more.²² Although Bosch publicly introduced the EDC17 in 2006, it had started to develop the engine management system years before.²³

135. In fact, Bosch was in on the secret and knew that Volkswagen was using Bosch's software algorithm as an "on/off" switch for emission controls when the vehicles were undergoing testing. As noted above, it has been said the decision to cheat was an "open secret" at Volkswagen.²⁴ It was an "open secret" at Bosch as well.

136. Volkswagen and Bosch personnel employed code language for the defeat device, referring to it as the "acoustic function" (in German, "akustikfunktion"). As described above, the roots of the "akustikfunktion"—and likely the cheating—can be traced back to the late 1990s when Audi devised software called the "akustikfunktion" that could switch off certain functions when

²² Approximately 50,000 of Bosch's 375,000 employees worked in the diesel technology operations branch of Bosch, and Volkswagen was the biggest diesel manufacturer in the world. See Exhibit 16, *Bosch Probes Whether Its Staff Helped VW's Emissions Rigging*, Automotive News (Jan. 27, 2016), <http://www.autonews.com/article/20160127/COPY01/301279955/bosch-probes-whether-its-staff-helped-vws-emissions-rigging>.

²³ Exhibit 13, Bosch press release, *The brain of diesel injection: New Bosch EDC17 engine management system* (Feb. 28, 2006), <http://www.bosch-presse.de/presseforum/details.htm?txtID=2603&locale=en>.

²⁴ Exhibit 19, Georgina Prodham, *Volkswagen probe finds manipulation was open secret in department*, Reuters (Jan. 23, 2016), <http://www.reuters.com/article/us-volkswagen-emissions-investigation-idUSKCN0V02E7>. See also Exhibit 20, Jay Ramey, *VW chairman Poetsch: Company 'tolerated breaches of rules'*, Autoweek (Dec. 10, 2015), <http://autoweek.com/article/vw-diesel-scandal/vw-chairman-poetsch-company-tolerated-breaches-rules> (it was necessary for the "EA 189 engine to pass U.S. diesel emissions limits within the budget and time frame allotted").

the vehicle was in a test mode.²⁵ The “akustik” term is derived from the function’s ability to modify the noise and vibration produced by the engine. News articles report that, in 2006, Volkswagen further developed this “akustikfunktion” for the affected vehicles.²⁶

137. In sum, Bosch worked hand-in-glove with Volkswagen to develop and maintain the akustikfunktion/defeat device. On information and belief, it did so with GM as well.

2. Volkswagen and Bosch conspire to conceal the illegal “akustikfunktion.”

138. By 2007, and likely earlier, Bosch was critical not only in developing the “akustikfunktion” but also in concealing it.

139. Bosch was concerned about getting caught participating in the defeat device fraud. As reported in a German newspaper, *Bild am Sonntag*, and a French

publication, a Volkswagen internal inquiry found that in 2007, Bosch warned Volkswagen by letter that using the emissions-altering software in production vehicles would constitute an “offense.”²⁷

3. Volkswagen and Bosch conspire in the U.S. and Germany to elude U.S. regulators who regulated not just Volkswagen diesels but all diesels.

140. The purpose of the defeat device was to evade stringent U.S. emissions standards. Once Bosch and Volkswagen perfected the defeat device, therefore, their attention turned to deceiving U.S. regulators.

141. Bosch’s North American subsidiary, defendant Robert Bosch LLC, was also part of and essential to the fraud. Bosch LLC worked closely with Bosch GmbH and Volkswagen in the United States and in Germany to ensure that the non-compliant affected vehicles passed U.S. emissions tests. Bosch LLC employees frequently communicated with U.S. regulators and actively worked to ensure the affected vehicles were approved by regulators.

142. Employees of Bosch LLC, Bosch GmbH, and IAV provided specific information to U.S. regulators about how Volkswagen’s vehicles functioned and unambiguously stated that the vehicles met emissions standards. Bosch LLC

²⁷ Exhibit 23, *Bosch warned VW about illegal software use in diesel cars, report says*, Automotive News (Sept. 27, 2015), <http://www.autonews.com/article/20150927/COPY01/309279989/bosch-warned-vw-about-illegal-software-use-in-diesel-cars-report-says>; Exhibit 24, *VW Scandal: Company Warned over Test Cheating Years Ago*, BBC (Sept. 27, 2015), <http://www.bbc.com/news/business-34373637>.

regularly communicated to its colleagues and clients in Germany about ways to deflect and diffuse questions from US regulators about the affected vehicles—particularly CARB.

4. Bosch keeps Volkswagen’s secret safe and pushes “clean” diesel in the U.S.

143. Bosch not only kept Volkswagen’s dirty secret safe, it went a step further and actively lobbied lawmakers to push “Clean Diesel” in the U.S., including making affected vehicles available for regulators to drive.

144. As early as 2004, Bosch announced a push to convince U.S. automakers that its diesel technology could meet tougher 2007 U.S. emission standards.²⁸ Its efforts ended up being a multi-year, multi-million dollar effort involving key players from both Bosch in Germany and Bosch in the U.S.

145. Bosch’s promotion of diesel technology specifically targeted the U.S. For example, Bosch put on “California Diesel Days”²⁹ and “SAE World Congress in Detroit.”³⁰ In 2008, Bosch LLC and Volkswagen America co-sponsored the “Future Motion Made in Germany-Second Symposium on Modern Drive

Technologies” at the German Embassy in Washington, D.C., with the aim of providing a venue for “stakeholders to gain insight into the latest technology trends and engage in a vital dialogue with industry leaders and policymakers.”³¹

146. Bosch LLC hosted multi-day conferences open to many regulators and legislators and held private meetings with regulators in which it proclaimed extensive knowledge of the specifics of Volkswagen technology, including calibrations necessary for the affected vehicles to comply with emissions regulations.

147. For example, in April 2009, Bosch organized and hosted a two-day “California Diesel Days” event in Sacramento, California. Bosch invited a roster of lawmakers, journalists, executives, regulators, and NGOs³² with the aim of changing perceptions of diesel from “dirty” to “clean.” The event featured affected vehicles as ambassadors of “Clean Diesel” technology, including a 2009 Volkswagen Jetta “green car.” The stated goals were to “build support for light-duty diesel as a viable solution for achieving California’s petroleum and emission reduction objectives.”

³¹ Exhibit 28, *Bosch: Clean Diesel is Key Part of Future Technology Mix*, Bosch, <http://us.bosch-press.com/tbwebdb/bosch-usa/en-US/PressText.cfm?CFID=60452038&CFTOKEN=9c778a2564be2c9b-56CC21B6-96AB-5F79-32445B13EC121DBE&nh=00&Search=0&id=364> (last accessed May 24, 2017).

³² Exhibit 26, *Bosch drives clean diesel in California*, Bosch, http://www.bosch.us/content/language1/html/734_4066.htm?section=28799C0E86C147799E02226E942307F2 (last accessed May 24, 2017); *see also* Exhibit 29, *California Diesel Days*, The U.S. Coalition for Advanced Diesel Cars, <http://www.californiadieseldays.com/> (last accessed May 24, 2017).

148. In 2009, Bosch also became a founding member of the U.S. Coalition for Advanced Diesel Cars.³³ One of this advocacy group's purposes included "promoting the energy efficiency and environmental benefits of advanced clean diesel technology for passenger vehicles in the U.S. marketplace."³⁴ This group lobbies Congress, U.S. regulators, and the California Air Resources Board in connection with rules affecting "Clean Diesel" technology.³⁵

149. In 2010, Bosch sponsored the Virginia International Raceway with the support of the 2010 Volkswagen Jetta TDI Cup Series. This event included TDI vehicles featuring Bosch technology.³⁶

150. In 2012, Audi, BMW, Bosch, Daimler, Porsche, and Volkswagen joined to form The Clearly Better Diesel initiative.³⁷ The initiative was announced in Berlin by the German Association of the Automotive Industry. Its stated goal

³³ Exhibit 30, Chrissie Thompson, *New Coalition Aims To Promote Diesel Cars*, Automotive News (Feb. 2, 2009), <http://www.autonews.com/article/20090202/OEM06/302029728/new-coalition-aims-to-promote-diesel-cars>.

³⁵ *Id.* See also, e.g., Exhibit 32, Letter to Chairman Mary Nichols and CARB concerning a statement made about diesel technology (Jan. 8, 2016), available at <http://cleandieseldelivers.com/media/Mary-Nichols-Letter-01082016.pdf>.

³⁶ Exhibit 33, *Volkswagen Jetta TDI Cup Drivers Take to the Track for the First Time in 2010 at VIR*, Volkswagen of America, Inc. (April 23, 2010), available at <http://www.prnewswire.com/news-releases/volkswagen-jetta-tdi-cup-drivers-take-to-the-track-for-the-first-time-in-2010-at-vir-91985604.html>.

³⁷ Exhibit 34, "Clean Diesel Clearly Better" Campaign for Clean Diesel Cars Welcomed, Diesel Technology Forum (Dec. 12, 2012), available at <http://www.prnewswire.com/news-releases/clean-diesel-clearly-better-campaign-for-clean-diesel-cars-welcomed-183261432.html>.

was to promote the sale of clean diesel vehicles in the U.S. The initiative's slogan was "Clean Diesel. Clearly Better."

151. In its efforts to promote "Clean Diesel," including the affected vehicles, Bosch GmbH acted on behalf of its global group.

5. Bosch also made the EDC-17 found in Fiat Chrysler vehicles that pollute excessively.

152. To appeal to environmentally conscious consumers, Fiat Chrysler America (FCA) *vigorously* markets its EcoDiesel vehicles as "clean diesel" with ultra-low emissions, high fuel economy, and powerful torque and towing capacity. FCA calls its EcoDiesel "ultra clean," "emissions compliant," and claims that "*no NOx*" exits the tailpipe. FCA charges a premium for EcoDiesel-equipped vehicles. For example, selecting the 3.0-liter EcoDiesel engine for the 2016 Dodge Ram 1500 Laramie adds \$4,770 to the purchase price. And the 2016 Jeep Grand Cherokee Overland EcoDiesel costs \$4,500 more than its gasoline counterpart.

153. These representations are deceptive and false. FCA programmed its EcoDiesel vehicles to significantly reduce the effectiveness of the NOx reduction systems during real-world driving conditions. The EPA has determined that the affected vehicles contain defeat devices. After a lawsuit had already been filed by Plaintiffs' counsel, on January 12, 2017, the EPA issued a notice of violation against FCA because FCA "failed to disclose Auxiliary Emission Control Devices

(AECDs)” in the affected vehicles.³⁸ The EPA identified eight specific devices that cause the vehicle to perform effectively when being tested for compliance and then reduce the effectiveness of the emissions control system during normal operation and use.

154. “Once again,” said CARB Chair Mary D. Nichols about FCA’s cheating, “a major automaker made the business decision to skirt the rules and got caught.”³⁹

155. The same experts that tested the Silverado’s performance did on-road testing of the FCA vehicles and confirmed that FCA’s so-called EcoDiesel cars produced NOx emissions at an average of 222 mg/mile in city driving (four times the FTP standard of 50 mg/mile) and 353 mg/mile in highway driving (five times higher than the U.S. highway standard of 70 mg/mile). In many instances, NOx values were in excess of 1,600 mg/mile, more than 20 times the standards. This testing occurred before the EPA announcement.

156. Bosch made the EDC-17 for the polluting FCA vehicles.

³⁸ Exhibit 35, EPA’s January 12, 2017 Notice of Violation to Fiat Chrysler Automobiles, available at <https://www.epa.gov/sites/production/files/2017-01/documents/fca-caa-nov-2017-01-12.pdf>.

³⁹ Exhibit 36, EPA News Release, *EPA Notifies Fiat Chrysler of Clean Air Act Violations* (Jan. 12, 2017), available at <https://www.epa.gov/newsreleases/epa-notifies-fiat-chrysler-clean-air-act-violations>.

6. Bosch also made the EDC-17 found in polluting Mercedes diesels.

157. Plaintiffs' experts in this case tested the Mercedes diesel vehicles and made the first public disclosure of Mercedes' unlawful conduct through counsel in a civil suit filed in the District of New Jersey. Reportedly as a result of that lawsuit, Mercedes is under investigation by DOJ and German authorities with respect to its BlueTEC diesel vehicles. Over 14 Mercedes diesel models are alleged to produce emissions 8.1 to 19.7 times relevant standards. Bosch supplied the EDC-17 in the polluting Mercedes vehicles.

J. The Damage from Excessive NO_x

158. NO_x contributes to ground-level ozone and fine particulate matter. According to the EPA, "Exposure to these pollutants has been linked with a range of serious health effects, including increased asthma attacks and other respiratory illnesses that can be serious enough to send people to the hospital. Exposure to ozone and particulate matter have also been associated with premature death due to respiratory-related or cardiovascular-related effects. Children, the elderly, and people with pre-existing respiratory disease are particularly at risk for health effects of these pollutants."

159. The EPA describes the danger of NO_x as follows:

Acid Rain - NO_x and sulfur dioxide react with other substances in the air to form acids which fall to earth as rain, fog, snow, or dry particles. Some may be carried by the wind for hundreds of miles. Acid rain damages forests; causes deterioration of cars, buildings, and historical monuments; and causes lakes and streams to become acidic and unsuitable for many fish.

Water Quality Deterioration

- Increased nitrogen loading in water bodies, particularly coastal estuaries, upsets the chemical balance of nutrients used by aquatic plants and animals. Additional nitrogen accelerates "eutrophication," which leads to oxygen depletion and reduces fish and shellfish populations. NO_x emissions in the air are one of the largest sources of nitrogen pollution to the Chesapeake Bay.

Toxic Chemicals - In the air, NO_x reacts readily with common organic chemicals, and even ozone, to form a wide variety of toxic products, some of which may cause biological mutations. Examples of these chemicals include the nitrate radical, nitroarenes, and nitrosamines.

Ground-level Ozone (Smog) - is formed when NO_x and volatile organic compounds (VOCs) react in the presence of heat and sunlight. Children, the elderly, people with lung diseases such as asthma, and people who work or exercise outside are susceptible to adverse effects such as damage to lung tissue and reduction in lung function. Ozone can be transported by wind currents and cause health impacts far from the original sources. Millions of Americans live in areas that do not meet the health standards for ozone. Other impacts from ozone include damaged vegetation and reduced crop yields.

Particles - NO_x react with ammonia, moisture, and other compounds to form nitric acid vapor and related particles. Human health concerns include effects on breathing and the respiratory system, damage to lung tissue, and premature death. Small particles penetrate deeply into sensitive parts of the lungs and can cause or worsen respiratory disease, such as emphysema and bronchitis, and aggravate existing heart disease.

Global Warming - One member of the NO_x family, nitrous oxide, is a greenhouse gas. It accumulates in the atmosphere with other greenhouse gases causing a gradual rise in the earth's temperature. This will lead to increased risks to human health, a rise in the sea level, and other adverse changes to plant and animal habitat.

160. A recent study published in NATURE estimates that there are 38,000 deaths worldwide due to excess NOx emissions.

161. GM and Bosch will not be able to make the Affected Vehicles comply with emissions standards without substantially degrading their performance characteristics, including their horsepower and their fuel efficiency. As a result, even if GM and Bosch are able to make Class members' Affected Vehicles EPA-compliant, Class members will nonetheless suffer actual harm and damages because their vehicles will no longer perform as they did when purchased and as advertised. This will necessarily result in a diminution in value of every Affected Vehicle and it will cause owners of Affected Vehicles to pay more for fuel while using their Affected Vehicles.

162. Plaintiffs and members of the Class paid a premium of at least \$5,000, as GM charged more for its diesel car than a comparable gas car.

163. As a result of GM's unfair, deceptive, and/or fraudulent business practices, and its failure to disclose that under normal operating conditions the Affected Vehicles are not "clean" diesels, emit more pollutants than do gasoline powered vehicles, and emit more pollutants than permitted under federal and state laws, owners and/or lessees of the Affected Vehicles have suffered losses in money and/or property. Had Plaintiffs and Class members known of the higher emissions at the time they purchased or leased their Affected Vehicles, they would not have

purchased or leased those vehicles, or would have paid substantially less for the vehicles than they did. Moreover, when and if GM recalls the Affected Vehicles and degrades the GM Clean Diesel engine performance and fuel efficiency in order to make the Affected Vehicles compliant with EPA standards, Plaintiffs and Class members will be required to spend additional sums on fuel and will not obtain the performance characteristics of their vehicles when purchased. Moreover, Affected Vehicles will necessarily be worth less in the marketplace because of their decrease in performance and efficiency and increased wear on their cars' engines.

164. Without cheating emissions, GM could not achieve the fuel economy and range that it promises. Moreover, when and if GM recalls the Affected Vehicles and degrades the Duramax engine performance in order to make the Affected Vehicles compliant with EPA standards, Plaintiffs and Class members will be required to spend additional sums on fuel and will not obtain the performance characteristics of their vehicles when purchased. And Affected Vehicles will necessarily be worth less in the marketplace because of their decrease in performance and efficiency and increased wear on their vehicles' engines.

K. The GM Scheme Is Just the Latest in a Worldwide Diesel Emissions Cheating Scandal That Adds Plausibility to the Allegations as Virtually All Diesel Manufacturers Are Falsely Advertising Their Vehicles

165. As noted, the world was shocked to learn that Volkswagen had manufactured over 11 million cars that were on the road in violation of European emissions standards, and over 480,000 vehicles were operating in the U.S. in violation of EPA and state standards. But Volkswagen was not the only manufacturer of vehicles that exceeded emissions standards.

166. In the wake of the major scandal involving Volkswagen and Audi diesel vehicles evading emissions standards with the help of certain software that manipulates emissions controls (called “defeat devices”),⁴⁰ scientific literature and reports and testing indicate that most of the diesel vehicle manufactures of so-called “Clean Diesel” vehicles emit far more pollution on the road than in lab tests. The EPA has widened its probe of auto emissions to include, for example, the Mercedes E250 BlueTEC.

⁴⁰ Exhibit 37, EPA’s Sept. 18, 2015 Notice of Violation to Volkswagen Group of America, Inc., available at <https://www.epa.gov/sites/production/files/2015-10/documents/vw-nov-cao-09-18-15.pdf>. As detailed in the NOV, software in Volkswagen and Audi diesel vehicles detects when the vehicle is undergoing official emissions testing and turns full emissions controls on only during the test. But otherwise, while the vehicle is running, the emissions controls are suppressed. This results in cars that meet emissions standards in the laboratory or at the state testing station, but during normal operation they emit NOx at up to 40 times the standard allowed under U.S. laws and regulations. Volkswagen has admitted to installing a defeat device in its diesel vehicles.

167. In May 2015, a study conducted on behalf of the Dutch Ministry of Infrastructure and the Environment found that all sixteen vehicles made by a variety of manufacturers, when tested, emitted significantly more NOx on real-world trips while they passed laboratory tests. The report concluded that “[i]n most circumstances arising in normal situations on the road, the system scarcely succeeded in any effective reduction of NOx emissions.”⁴¹

168. The report further remarked:⁴²

It is remarkable that the NOx emission under real-world conditions exceeds the type approval value by [so much]. It demonstrates that the settings of the engine, the EGR and the SCR during a real-world test trip are such that they do not result in low NOx emissions in practice. In other words: ***In most circumstances arising in normal situations on the road, the systems scarcely succeed in any effective reduction of NOx emissions.***

The lack of any “effective reduction of NOx emissions” is a complete contradiction of GM’s claim that its vehicles are clean.

169. Other organizations are beginning to take notice of the emissions deception. The Transportation and Environment (T&E) organization, a European group aimed at promoting sustainable transportation, compiled data from “respected testing authorities around Europe.” T&E stated in September 2015 that real-world emissions testing showed drastic differences from laboratory tests such

⁴¹ Exhibit 38, *Detailed investigations and real-world emission performance of Euro 6 diesel passenger cars*, TNO (May 18, 2015), <http://publications.tno.nl/publication/34616868/a1Ug1a/TNO-2015-R10702.pdf>.

⁴² *Id.* at 6 (emphasis added).

that models tested emitted more pollutants on the road than in their laboratory tests. “For virtually every new model that comes onto the market the gap between test and real-world performance leaps,” the report asserts.⁴³

170. In a summary report, T&E graphically depicted the widespread failure of most manufacturers:⁴⁴

2. The problem is endemic across the car industry – but the performance of individual models and manufacturers varies widely

In tests by the ICCT¹ 12 out of 13 modern diesel cars failed to achieve the Euro 6 limit in on the road. The worst vehicle, an Audi, emitted 22 times the allowed limit. Emissions are highest in urban areas where most people are exposed to the pollution. On average a new diesel car emits **over** 800mg/km of nitrogen oxides driving in town compared to the limit of 80mg/km. Data obtained on around 20 modern diesel cars by T&E shows every major manufacturer is selling cars that fail to meet Euro 6 limits on the road. A minority of vehicles do meet the limits – but most don't. This is because the industry uses cheaper less effective exhaust treatment systems or fails to configure the best systems in a way that minimizes emissions. The cost of a modern diesel after treatment system is just €300.

Above and beyond the safe limit

Source: T&E

Transport & Environment

⁴³ Exhibit 39, *VW's cheating is just the tip of the iceberg*, Transport & Environment (Sept. 21, 2015), <http://www.transportenvironment.org/publications/vw%E2%80%99s-cheating-just-tip-iceberg>.

⁴⁴ Exhibit 40, *Five facts about diesel the car industry would rather not tell you*, Transport & Environment (Sept. 2015), http://www.transportenvironment.org/sites/te/files/publications/2015_09_Five_facts_about_diesel_FINAL.pdf.

171. The T&E report found that the current system for testing cars in a laboratory produces “meaningless results.”⁴⁵

172. Emissions Analytics is a U.K. company which says that it was formed to “overcome the challenge of finding accurate fuel consumption and emissions figures for road vehicles.” With regard to its recent on-road emissions testing, the company explains:⁴⁶

[I]n the European market, we have found that real-world emissions of the regulated nitrogen oxides are four times above the official level, determined in the laboratory. Real-world emissions of carbon dioxide are almost one-third above that suggested by official figures. For car buyers, this means that fuel economy on average is one quarter worse than advertised. This matters, even if no illegal activity is found.

VI. TOLLING OF THE STATUTE OF LIMITATIONS

A. Discovery Rule Tolling

173. Class members had no way of knowing about GM’s deception with respect to the comparatively and unlawfully high emissions of its GM Clean Diesel engine system in the Affected Vehicles. To be sure, GM continues to market the Affected Vehicles as “clean” diesels that have lower emissions than gasoline vehicles and also continues to claim that the Affected Vehicles comply with EPA emissions standards.

⁴⁵ *Id.*

⁴⁶ Exhibit 41, Emissions Analytics Press Release (Sept. 28, 2015), available at <http://www.abvwc.com/home/emissions-analytics>.

174. Within the period of any applicable statutes of limitation, Plaintiffs and members of the proposed Classes could not have discovered through the exercise of reasonable diligence that GM was concealing the conduct complained of herein and misrepresenting the Company's true position with respect to the emission qualities of the Affected Vehicles.

175. Plaintiffs and the other Class members did not discover, and did not know of, facts that would have caused a reasonable person to suspect that GM did not report information within its knowledge to federal and state authorities, its dealerships, or consumers; nor would a reasonable and diligent investigation have disclosed that GM had concealed information about the true emissions of the Affected Vehicles, which was discovered by Plaintiffs only shortly before this action was filed. Nor in any event would such an investigation on the part of Plaintiffs and other Class members have disclosed that GM valued profits over truthful marketing and compliance with the law.

176. For these reasons, all applicable statutes of limitation have been tolled by operation of the discovery rule with respect to claims as to the Affected Vehicles.

B. Fraudulent Concealment Tolling

177. All applicable statutes of limitation have also been tolled by GM's knowing and active fraudulent concealment and denial of the facts alleged herein throughout the period relevant to this action.

178. Instead of disclosing its emissions scheme, or that the quality and quantity of emissions from the Affected Vehicles were far worse than represented, and of its disregard of the law, GM falsely represented that the Affected Vehicles had emissions cleaner than their gasoline powered counterparts, complied with federal and state emissions standards, that the diesel engines were "Clean," and that it was a reputable manufacturer whose representation could be trusted.

C. Estoppel

179. GM was under a continuous duty to disclose to Plaintiffs and the other Class members the true character, quality, and nature of emissions from the Affected Vehicles and of those vehicles' emissions systems.

180. GM knowingly, affirmatively, and actively concealed or recklessly disregarded the true nature, quality, and character of the emissions systems, and the emissions, of the Affected Vehicles.

181. Based on the foregoing, GM is estopped from relying on any statutes of limitations in defense of this action.

VII. CLASS ALLEGATIONS

182. Plaintiffs bring this action on behalf of themselves and as a class action, pursuant to the provisions of Rules 23(a) and (b)(3) of the Federal Rules of Civil Procedure, on behalf of the following class (collectively, the “Class”):

All persons who purchased or leased a model year 2011-2016 GM Silverado 2500HD or 3500HD, or a GM Sierra 2500HD or 3500HD (the “Affected Vehicles”).

183. Excluded from the Class are individuals who have personal injury claims resulting from the high emissions in the Affected Vehicles. Also excluded from the Class are GM and its subsidiaries and affiliates; all persons who make a timely election to be excluded from the Class; governmental entities; the Judge to whom this case is assigned and his/her immediate family; and Plaintiffs’ Counsel. Plaintiffs reserve the right to revise the Class definition based upon information learned through discovery.

184. Certification of Plaintiffs’ claims for class-wide treatment is appropriate because Plaintiffs can prove the elements of their claims on a class-wide basis using the same evidence as would be used to prove those elements in individual actions alleging the same claim.

185. This action has been brought and may be properly maintained on behalf of the Class proposed herein under Federal Rule of Civil Procedure 23.

186. **Numerosity**. Federal Rule of Civil Procedure 23(a)(1): The members of the Class are so numerous and geographically dispersed that individual joinder

of all Class members is impracticable. For purposes of this complaint, Plaintiffs allege that there are estimated to be 705,000 or more vehicles in the Class. The precise number of Class members is unknown to Plaintiffs but may be ascertained from GM's books and records. Class members may be notified of the pendency of this action by recognized, Court-approved notice dissemination methods, which may include U.S. Mail, electronic mail, Internet postings, and/or published notice.

187. **Commonality and Predominance**: Federal Rule of Civil Procedure 23(a)(2) and 23(b)(3): This action involves common questions of law and fact, which predominate over any questions affecting individual Class members, including, without limitation:

- a) Whether GM and Bosch engaged in the conduct alleged herein;
- b) Whether GM designed, advertised, marketed, distributed, leased, sold, or otherwise placed Affected Vehicles into the stream of commerce in the United States;
- c) Whether the GM engine system in the Affected Vehicles emit pollutants at levels that do not make them "clean" diesels and that do not comply with U.S. EPA requirements;
- d) Whether GM and Bosch knew about the comparatively and unlawfully high emissions and, if so, how long GM and Bosch have known;

- e) Whether GM designed, manufactured, marketed, and distributed Affected Vehicles with defective or otherwise inadequate emission controls;
- f) Whether GM's conduct violates RICO and consumer protection statutes, and constitutes breach of contract and fraudulent concealment, as asserted herein;
- g) Whether there is an Enterprise;
- h) Whether Bosch participated in the Enterprise;
- i) Whether Plaintiffs and the other Class members overpaid for their vehicles; and
- j) Whether Plaintiffs and the other Class members are entitled to damages and other monetary relief and, if so, in what amount.

188. **Typicality**: Federal Rule of Civil Procedure 23(a)(3): Plaintiffs' claims are typical of the other Class members' claims because, among other things, all Class members were comparably injured through GM's wrongful conduct as described above.

189. **Adequacy**: Federal Rule of Civil Procedure 23(a)(4): Plaintiffs are adequate Class representatives because their interests do not conflict with the interests of the other members of the Classes they seek to represent; Plaintiffs have retained counsel competent and experienced in complex class action litigation; and

Plaintiffs intend to prosecute this action vigorously. The Classes' interests will be fairly and adequately protected by Plaintiffs and their counsel.

190. **Superiority**: Federal Rule of Civil Procedure 23(b)(3): A class action is superior to any other available means for the fair and efficient adjudication of this controversy, and no unusual difficulties are likely to be encountered in the management of this class action. The damages or other financial detriment suffered by Plaintiffs and the other Class members are relatively small compared to the burden and expense that would be required to individually litigate their claims against GM, so it would be impracticable for the members of the Classes to individually seek redress for GM's wrongful conduct. Even if Class members could afford individual litigation, the court system could not. Individualized litigation creates a potential for inconsistent or contradictory judgments and increases the delay and expense to all parties and the court system. By contrast, the class action device presents far fewer management difficulties and provides the benefits of single adjudication, economy of scale, and comprehensive supervision by a single court.

VIII. CLAIMS

A. Claims Brought on Behalf of the Nationwide RICO Class

COUNT 1

VIOLATIONS OF RACKETEER INFLUENCED AND CORRUPT ORGANIZATIONS ACT (RICO) VIOLATION OF 18 U.S.C. § 1962(C), (D)

191. Plaintiffs incorporate by reference each preceding and succeeding paragraph as though fully set forth herein.

192. Plaintiffs bring this Count individually and on behalf of the Nationwide RICO Class against Defendants GM, Robert Bosch GmbH, and Robert Bosch LLC (collectively, “RICO Defendants”).

193. The RICO Defendants are all “persons” under 18 U.S.C. § 1961(3) because they are capable of holding, and do hold, “a legal or beneficial interest in property.”

194. Section 1962(c) makes it “unlawful for any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise’s affairs through a pattern of racketeering activity.” Section 1962(d), in turn, makes it unlawful for “any person to conspire to violate.”

195. For many years now, the RICO Defendants have aggressively sought to increase the sales of Affected Vehicles in an effort to bolster revenue, augment profits, and increase GM’s share of the diesel vehicle market. Finding it impossible

to achieve their goals lawfully, however, the RICO Defendants resorted instead to orchestrating a fraudulent scheme and conspiracy. In particular, the RICO Defendants, along with other entities and individuals, created and/or participated in the affairs of an illegal enterprise (“Emissions Fraud Enterprise”) whose direct purpose was to deceive the regulators and the public into believing the Affected Vehicles were “clean” and “environmentally friendly.” As explained in greater detail below, the RICO Defendants’ acts in furtherance of the Emissions Fraud Enterprise violate Section 1962(c) and (d).

1. The members of the Emissions Fraud Enterprise

196. Upon information and belief, the Emissions Fraud Enterprise consisted of the following entities and individuals: GM, Robert Bosch GmbH, and Robert Bosch LLC.

197. Robert Bosch GmbH and Robert Bosch LLC (together, “Bosch” or “Bosch Defendants”) tested, manufactured, and sold the electronic control module (ECM) that managed the emissions control system used by GM in the Affected Vehicles. This particular ECM is more formally referred to as the Electronic Diesel Control Unit 17.

198. Defendant Bosch GmbH is a multinational engineering and electronics company headquartered in Gerlingen, Germany, which has hundreds of subsidiaries and companies. It wholly owns defendant Bosch LLC, a Delaware

limited liability company headquartered in Farmington Hills, Michigan. As explained above, Bosch's sectors and divisions are grouped by subject matter, not location. Mobility Solutions (formerly Automotive Technology) is the Bosch sector at issue, particularly its Diesel Services division, and it encompasses employees of Bosch GmbH and Bosch LLC. These individuals were responsible for the design, manufacture, development, customization, and supply of the defeat device to GM for use in the Affected Vehicles.

199. Bosch worked with GM, Volkswagen, Mercedes, and FCA to develop and implement a specific and unique set of software algorithms to surreptitiously evade emissions regulations. Bosch customized their EDC Unit 17s for installation in the Affected Vehicles with unique software code to detect when it was undergoing emissions testing, as described above, and did so for other vehicles with defeat devices in Volkswagen and Mercedes vehicles.⁴⁷

200. Bosch's conduct with respect to Volkswagen, outlined below, adds plausibility to its participation in the enterprise described herein. For example, Bosch was well aware that the EDC Unit 17 would be used by automobile manufacturers, including GM, to cheat on emissions testing. Bosch was also critical to the concealment of the defeat device in communications with U.S.

⁴⁷ Exhibit 18, Michael Taylor, *EPA Investigating Bosch over VW Diesel Cheater Software*, Car and Driver (Nov. 23, 2015), <http://blog.caranddriver.com/epa-investigating-bosch-over-vw-diesel-cheater-software/>.

regulators and went even further to actively lobby U.S. lawmakers on behalf of Volkswagen and its “Clean Diesel” vehicles.

201. EDC Unit 17 could not effectively lower NOx emissions to legal levels during normal operating conditions. In order to pass the emissions test, then, EDC Unit 17 is equipped with a “defeat device,” which is software that allows the vehicle to determine whether it is being operated under normal conditions or testing conditions.

202. As was publicly reported, the Bosch Defendants, seeking to conceal their involvement in the unlawful Emissions Fraud Enterprise, sent a letter to Volkswagen AG in 2007 stating that Volkswagen Diesels *could not be lawfully operated* if the LNT or SCR after-treatment system was disabled.⁴⁸ The exact same logic applies to the GM Affected Vehicles.

203. Indeed, notwithstanding their knowledge that the Volkswagen Diesels *could not be lawfully operated* if the emissions system was disabled, the Bosch Defendants, driven to cement their position as a leading supplier of diesel emissions equipment, went on to sell approximately *eleven million* EDC Unit 17s

⁴⁸ Exhibit 42, Stef Shrader, *Feds Are Now Investigating Volkswagen Supplier Bosch Over Dieselgate*, Jalopnik (Nov. 19, 2015), <http://jalopnik.com/feds-are-now-investigating-volkswagen-supplier-bosch-ov-1743624448>.

to Volkswagen over an eight-year period and sold hundreds of thousands of EDC units to GM for use in Affected Vehicles.⁴⁹

204. The persons and entities described in the preceding section are members of and constitute an “association-in-fact” enterprise.

205. At all relevant times, the Emissions Fraud Enterprise: (a) had an existence separate and distinct from each Defendant; (b) was separate and distinct from the pattern of racketeering in which the RICO Defendants engaged; and (c) was an ongoing organization consisting of legal entities, including GM, the Bosch Defendants, and other entities and individuals associated for the common purpose of designing, manufacturing, distributing, testing, and selling the Affected Vehicles through fraudulent COCs and EOs, false emissions tests, deceptive and misleading marketing and materials, and deriving profits and revenues from those activities. Each member of the Emissions Fraud Enterprise shared in the bounty generated by the enterprise—*i.e.*, by sharing the benefit derived from increased sales revenue generated by the scheme to defraud consumers and franchise dealers alike nationwide.

206. The Emissions Fraud Enterprise functioned by selling vehicles and component parts to the consuming public. Many of these products are legitimate,

⁴⁹ Exhibit 18, Michael Taylor, *EPA Investigating Bosch over VW Diesel Cheater Software*, Car and Driver (Nov. 23, 2015), <http://blog.caranddriver.com/epa-investigating-bosch-over-vw-diesel-cheater-software/>.

including vehicles that do not contain defeat devices and software capable of allowing the engine to manipulate the software such that the emissions system is turned on or off at certain times. However, the RICO Defendants and their co-conspirators, through their illegal Enterprise, engaged in a pattern of racketeering activity, which involves a fraudulent scheme to increase revenue for Defendants and the other entities and individuals associated-in-fact with the Enterprise's activities through the illegal scheme to sell the Affected Vehicles.

207. The Emissions Fraud Enterprise engaged in and its activities affected interstate and foreign commerce because it involved commercial activities across state boundaries, such as the marketing, promotion, advertisement and sale or lease of the Affected Vehicles throughout the country and the receipt of monies from the sale of the same.

208. Within the Emissions Fraud Enterprise, there was a common communication network by which co-conspirators shared information on a regular basis. The Emissions Fraud Enterprise used this common communication network for the purpose of manufacturing, marketing, testing, and selling the Affected Vehicles to the general public nationwide.

209. Each participant in the Emissions Fraud Enterprise had a systematic linkage to each other through corporate ties, contractual relationships, financial ties, and continuing coordination of activities. Through the Emissions Fraud

Enterprise, the RICO Defendants functioned as a continuing unit with the purpose of furthering the illegal scheme and their common purposes of increasing their revenues and market share, and minimizing losses.

210. The RICO Defendants participated in the operation and management of the Emissions Fraud Enterprise by directing its affairs, as described herein. While the RICO Defendants participated in, and are members of, the enterprise, they have a separate existence from the enterprise, including distinct legal statuses, different offices and roles, bank accounts, officers, directors, employees, individual personhood, reporting requirements, and financial statements.

211. GM exerted substantial control and participated in the affairs of the Emissions Fraud Enterprise by:

- a. Designing the Affected Vehicles with defeat devices;
- b. Failing to correct or disable the defeat devices;
- c. Manufacturing, distributing, and selling the Affected Vehicles that emitted greater pollution than allowable under the applicable regulations;
- d. Misrepresenting and omitting (or causing such misrepresentations and omissions to be made) vehicle specifications on COC and EO applications;
- e. Introducing the Affected Vehicles into the stream of U.S. commerce without a valid COC and/or EO;
- f. Concealing the existence of the defeat devices and the unlawfully high emissions from regulators and the public;

- g. Persisting in the manufacturing, distribution, and sale of the Affected Vehicles even after questions were raised about the emissions testing and discrepancies concerning the same;
- h. Misleading government regulators as to the nature of the defeat devices and the defects in the Affected Vehicles;
- i. Misleading the driving public as to the nature of the defeat devices and the defects in the Affected Vehicles;
- j. Designing and distributing marketing materials that misrepresented and concealed the defects in the vehicles;
- k. Otherwise misrepresenting or concealing the defective nature of the Affected Vehicles from the public and regulators; and
- l. Illegally selling and/or distributing the Affected Vehicles; collecting revenues and profits from the sale of such products; and ensuring that the other RICO Defendants and unnamed co-conspirators complied with the fraudulent scheme.

212. Bosch also participated in, operated, and/or directed the Emissions Fraud Enterprise. Bosch participated in the fraudulent scheme by manufacturing, installing, testing, modifying, and supplying the EDC Unit 17 which operated as a “defeat device” in the Affected Vehicles. Bosch exercised tight control over the coding and other aspects of the defeat device software and closely collaborated with GM to develop, customize, and calibrate the defeat devices. Additionally, Bosch continuously cooperated with GM to ensure that the EDC Unit 17 was fully integrated into the Affected Vehicles. Bosch also participated in the affairs of the Enterprise by concealing the defeat devices on U.S. documentation and in

communications with U.S. regulators. Bosch collected tens of millions of dollars in revenues and profits from the hidden defeat devices installed in the Affected Vehicles.

213. Without the RICO Defendants' willing participation, including Bosch's active involvement in developing and supplying the critical defeat devices for the Affected Vehicles, the Emissions Fraud Enterprise's scheme and common course of conduct would not have been successful.

214. The RICO Defendants directed and controlled the ongoing organization necessary to implement the scheme at meetings and through communications of which Plaintiffs cannot fully know at present because such information lies in the Defendants' and others' hands.

215. The members of the Emissions Fraud Enterprise all served a common purpose; namely, to outsell their law-abiding competitors and increase their revenues through the sale of as many Affected Vehicles (including the emissions components made and sold by Bosch) as possible. Each member of the Emissions Fraud Enterprise shared the bounty generated by the enterprise—*i.e.*, by sharing the benefit derived from increased sales revenue generated by the scheme to defraud. GM sold more Affected Vehicles by utilizing an emissions control system that was cheaper to install and allowed for generous performance and efficiency tuning, all while charging consumers a premium for purportedly “clean” and “fuel

efficient” Affected Vehicles. The Bosch Defendants, in turn, sold more EDC Units because GM manufactured and sold more Affected Vehicles. The RICO Defendants achieved their common purpose by repeatedly misrepresenting and concealing the nature of the Affected Vehicles and the ability of the emissions control systems (including the Bosch-supplied parts) to effectively reduce toxic emissions during normal operating conditions.

2. The Predicate Acts

216. To carry out, or attempt to carry out, the scheme to defraud, the RICO Defendants conducted or participated in the conduct of the affairs of the Emissions Fraud Enterprise through a pattern of racketeering activity that employed the use of mail and wire facilities, in violation of 18 U.S.C. §§ 1341 (mail fraud) and 1343 (wire fraud).

217. Specifically, the RICO Defendants participated in the scheme to defraud by using mail, telephone, and the Internet to transmit writings travelling in interstate or foreign commerce.

218. The RICO Defendants’ use of the mails and wires include but are not limited to the transmission, delivery, or shipment of the following by the RICO Defendants or third parties that were foreseeably caused to be sent as a result of Defendants’ illegal scheme:

- a. Application for certificates submitted to the EPA and CARB;

- b. The Affected Vehicles themselves;
- c. Component parts for the defeat devices;
- d. Essential hardware for the Affected Vehicles;
- e. Falsified emission tests;
- f. Fraudulently-obtained COCs and EOs;
- g. Vehicle registrations and plates as a result of the fraudulently-obtained COCs and EOs;
- h. Documents and communications that facilitated the falsified emission tests;
- i. False or misleading communications intended to lull the public and regulators from discovering the defeat devices and/or other auxiliary devices;
- j. Sales and marketing materials, including advertising, websites, product packaging, brochures, and labeling, which misrepresented and concealed the true nature of the Affected Vehicles;
- k. Documents intended to facilitate the manufacture and sale of the Affected Vehicles, including bills of lading, invoices, shipping records, reports and correspondence;
- l. Documents to process and receive payment for the Affected Vehicles by unsuspecting franchise dealers, including invoices and receipts;
- m. Payments to Bosch;
- n. Deposits of proceeds; and
- o. Other documents and things, including electronic communications.

219. The RICO Defendants utilized the interstate and international mail and wires for the purpose of obtaining money or property by means of the omissions, false pretense, and misrepresentations described therein.

220. The RICO Defendants also used the Internet and other electronic facilities to carry out the scheme and conceal the ongoing fraudulent activities. Specifically, GM made misrepresentations about the Affected Vehicles on their websites, YouTube, and through ads online, all of which were intended to mislead regulators and the public about the fuel efficiency, emissions standards, and other performance metrics.

221. The RICO Defendants also communicated by U.S. Mail, by interstate facsimile, and by interstate electronic mail with various other affiliates, regional offices, divisions, dealerships, and other third-party entities in furtherance of the scheme.

222. The mail and wire transmissions described herein were made in furtherance of Defendants' scheme and common course of conduct to deceive regulators and consumers and lure consumers into purchasing the Affected Vehicles, which Defendants knew or recklessly disregarded as emitting illegal amounts of pollution, despite their advertising campaign that the Affected Vehicles were "clean" diesel cars.

223. Many of the precise dates of the fraudulent uses of U.S. Mail and interstate wire facilities have been deliberately hidden and cannot be alleged without access to Defendants' books and records. However, Plaintiffs have described the types of, and in some instances, occasions on which the predicate

acts of mail and/or wire fraud occurred. They include thousands of communications to perpetuate and maintain the scheme, including the things and documents described in the preceding paragraphs.

224. The RICO Defendants have not undertaken the practices described herein in isolation, but as part of a common scheme and conspiracy. In violation of 18 U.S.C. § 1962(d), the RICO Defendants conspired to violate 18 U.S.C. § 1962(c), as described herein. Various other persons, firms, and corporations, including third-party entities and individuals not named as defendants in this Complaint, have participated as co-conspirators with the RICO Defendants in these offenses and have performed acts in furtherance of the conspiracy to increase or maintain revenues, increase market share, and/or minimize losses for the Defendants and their unnamed co-conspirators throughout the illegal scheme and common course of conduct.

225. The RICO Defendants aided and abetted others in the violations of the above laws, thereby rendering them indictable as principals in the 18 U.S.C. §§ 1341 and 1343 offenses.

226. To achieve their common goals, the RICO Defendants hid from the general public the unlawfulness and emission dangers of the Affected Vehicles and obfuscated the true nature of the defect even after regulators raised concerns. The RICO Defendants suppressed and/or ignored warnings from third parties,

whistleblowers, and governmental entities about the discrepancies in emissions testing and the defeat devices present in the Affected Vehicles.

227. The RICO Defendants and each member of the conspiracy, with knowledge and intent, have agreed to the overall objectives of the conspiracy and participated in the common course of conduct to commit acts of fraud and indecency in designing, manufacturing, distributing, marketing, testing, and/or selling the Affected Vehicles (and the defeat devices contained therein).

228. Indeed, for the conspiracy to succeed, each of the RICO Defendants and their co-conspirators had to agree to implement and use the similar devices and fraudulent tactics—specifically, complete secrecy about the defeat devices in the Affected Vehicles.

229. The RICO Defendants knew and intended that government regulators, as well as Plaintiffs and Class members, would rely on the material misrepresentations and omissions made by them about the Affected Vehicles. The RICO Defendants knew and intended that Plaintiffs and the Class would incur costs and damages as a result. As fully alleged herein, Plaintiffs and the Class relied upon Defendants' representations and omissions that were made or caused by them. Plaintiffs' reliance is made obvious by the fact that: (1) they purchased hundreds of thousands of vehicles that never should have been introduced into the U.S. stream of commerce and whose worth is far less than was paid. In addition,

the EPA, CARB, and other regulators relied on the misrepresentations and material omissions made or caused to be made by the RICO Defendants; otherwise, GM could not have obtained valid COCs and EOs to sell the Affected Vehicles.

230. The RICO Defendants' conduct in furtherance of this scheme was intentional. Plaintiffs and the Class were harmed as a result of the RICO Defendants' intentional conduct. Plaintiffs, the Class, regulators, and consumers, among others, relied on the RICO Defendants' material misrepresentations and omissions.

231. As described herein, the RICO Defendants engaged in a pattern of related and continuous predicate acts for many years. The predicate acts constituted a variety of unlawful activities, each conducted with the common purpose of defrauding Plaintiffs and other Class members and obtaining significant monies and revenues from them and through them while providing Affected Vehicles worth significantly less than the invoice price paid. The predicate acts also had the same or similar results, participants, victims, and methods of commission. The predicate acts were related and not isolated events.

232. The predicate acts all had the purpose of generating significant revenue and profits for the RICO Defendants at the expense of Plaintiffs, the Class, and consumers. The predicate acts were committed or caused to be committed by the RICO Defendants through their participation in the Emissions Fraud Enterprise

and in furtherance of its fraudulent scheme, and were interrelated in that they involved obtaining Plaintiffs' and Class members' funds, artificially inflating the brand and dealership goodwill values, and avoiding the expenses associated with remediating the Affected Vehicles.

233. During the design, manufacture, testing, marketing, and sale of the Affected Vehicles, the RICO Defendants shared technical, marketing, and financial information that plainly revealed the emissions control systems in the Affected Vehicles as the ineffective, illegal, and fraudulent piece of technology they were and are. Nevertheless, the RICO Defendants shared and disseminated information that deliberately represented Affected Vehicles as "clean," "environmentally friendly," and "fuel efficient."

234. By reason of and as a result of the conduct of the RICO Defendants, and in particular its pattern of racketeering activity, Plaintiffs and the Class have been injured in multiple ways, including but not limited to:

- a. Overpayment for Affected Vehicles, in that Plaintiffs and the Class at the time of purchase believed they were paying for vehicles that met certain emission and fuel efficiency standards and obtained vehicles that did not meet these standards and were worth less than what was paid; and

- b. The value of the Affected Vehicles has diminished, thus reducing their sale and resale value, and has resulted in a loss of property for Plaintiffs and the Class.

235. The RICO Defendants' violations of 18 U.S.C. § 1962(c) and (d) have directly and proximately caused injuries and damages to Plaintiffs and the Class, and Plaintiffs and the Class are entitled to bring this action for three times their actual damages, as well as injunctive/equitable relief, costs, and reasonable attorneys' fees pursuant to 18 U.S.C. § 1964(c). Each of the RICO Defendants knew, understood, and intended for members of the Class to purchase the Affected Vehicles, and knew, understood, and foresaw that revelation of the truth would injure members of the Class.

B. Claims Brought on Behalf of the California Class

COUNT 2

**VIOLATIONS OF THE CALIFORNIA UNFAIR COMPETITION
LAW
(CAL. BUS. & PROF. CODE § 17200 *ET SEQ.*)**

236. Plaintiffs (for purposes of all California Class Counts) incorporate by reference all paragraphs as though fully set forth herein.

237. This claim is brought by Plaintiffs on behalf of residents of California who are members of the Class.

238. California's Unfair Competition Law (UCL), CAL. BUS. & PROF. CODE § 17200 *et seq.*, proscribes acts of unfair competition, including "any

unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising.”

239. GM’s conduct, as described herein, was and is in violation of the UCL. GM’s conduct violates the UCL in at least the following ways:

- i. By failing to disclose that the NOx reduction system in the Affected Vehicles turns off or is limited during normal driving conditions;
- ii. By selling and leasing Affected Vehicles that suffer from a defective emissions control system and that emit unlawfully high levels of pollutants under normal driving conditions;
- iii. By knowingly and intentionally concealing from Plaintiffs and the other Class members that the NOx reduction system in the Affected Vehicles turns off or is limited during normal driving conditions and that the Affected Vehicles suffer from a defective emissions control system and emit unlawfully high levels of pollutants under normal driving conditions;
- iv. By marketing Affected Vehicles as reduced emissions vehicles possessing functional and defect-free, EPA-compliant diesel engine systems;
- vii. By violating other California laws, including California consumer protection laws and California laws governing vehicle emissions and emission testing requirements.

240. GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Class.

241. In purchasing or leasing the Affected Vehicles, Plaintiffs and the other Class members were deceived by GM's failure to disclose the NOx reduction system in the Affected Vehicles turns off or is limited during normal driving conditions, that the emissions controls were defective, and that the Affected Vehicles emitted unlawfully high levels of pollutants, including NOx, as described above.

242. Plaintiffs were also deceived by GM's portrayal of these vehicles as turning NOx into a "fine mist" (misleading since the emissions were not a fine mist but at times an environmental hazard), having "lower emissions" (misleading as at times they were materially and offensively high), accomplishing a "reasonable reduction in emissions" (misleading as at material times the emissions are high and environmentally offensive), and reducing emissions by a "whopping" amount (only under limited circumstances).

243. Plaintiffs and Class members reasonably relied upon GM's false misrepresentations. They had no way of knowing that GM's representations were false and gravely misleading. As alleged herein, GM engaged in extremely sophisticated methods of deception. Plaintiffs and Class members did not, and could not, unravel GM's deception on their own.

244. GM knew or should have known that its conduct violated the UCL.

245. GM owed Plaintiffs and the Class a duty to disclose the truth about its emissions systems manipulation because GM:

- a. Possessed exclusive knowledge that it manipulated the emissions system in the Affected Vehicles to turn off or limit effectiveness in normal driving conditions;
- b. Intentionally concealed the foregoing from Plaintiffs and the Class; and/or
- c. Made incomplete representations that it manipulated the emissions system in the Affected Vehicles to turn off or limit effectiveness in normal driving conditions, while purposefully withholding material facts from Plaintiffs and the Class that contradicted these representations.

246. GM had a duty to disclose that the NO_x reduction system in the Affected Vehicles turns off or is limited during normal driving conditions, emits pollutants at a much higher rate than gasoline powered vehicles, and that the emissions far exceeded those expected by a reasonable consumer. Plaintiffs and the other Class members relied on GM's material representations and/or omissions that the Affected Vehicles they were purchasing were reduced emission vehicles, efficient, and free from defects.

247. GM's conduct proximately caused injuries to Plaintiffs and the other Class members.

248. Plaintiffs and the other Class members were injured and suffered ascertainable loss, injury-in-fact, and/or actual damage as a proximate result of GM's conduct in that Plaintiffs and the other Class members overpaid for their Affected Vehicles and did not receive the benefit of their bargain, and/or their Affected Vehicles have suffered a diminution in value. These injuries are the direct and natural consequence of GM's misrepresentations and omissions.

249. GM's violations present a continuing risk to Plaintiffs as well as to the general public. GM's unlawful acts and practices complained of herein affect the public interest.

250. GM's misrepresentations and omissions alleged herein caused Plaintiffs and the other Class members to make their purchases or leases of their Affected Vehicles. Absent those misrepresentations and omissions, Plaintiffs and the other Class members would not have purchased or leased these vehicles, would not have purchased or leased these Affected Vehicles at the prices they paid, and/or would have purchased or leased less expensive alternative vehicles that did not contain defective GM Clean Diesel engine systems that failed to comply with EPA and California emissions standards.

251. Accordingly, Plaintiffs and the other Class members have suffered injury in fact, including lost money or property, as a result of GM's misrepresentations and omissions.

252. Plaintiffs request that this Court enter such orders or judgments as may be necessary to restore to Plaintiffs and members of the Class any money it acquired by unfair competition, including restitution and/or restitutionary disgorgement, as provided in CAL. BUS. & PROF. CODE § 17203 and CAL. CIV. CODE § 3345; and for such other as may be appropriate.

COUNT 3

VIOLATIONS OF THE CALIFORNIA FALSE ADVERTISING LAW (CAL. BUS. & PROF. CODE § 17500 ET SEQ.)

253. Plaintiffs incorporate by reference all paragraphs as though fully set forth herein.

254. This claim is brought by Plaintiffs on behalf of residents of California who are members of the class.

255. CAL. BUS. & PROF. CODE § 17500 states: "It is unlawful for any . . . corporation . . . with intent directly or indirectly to dispose of real or personal property . . . to induce the public to enter into any obligation relating thereto, to make or disseminate or cause to be made or disseminated . . . from this state before the public in any state, in any newspaper or other publication, or any advertising device, . . . or in any other manner or means whatever, including over the Internet,

any statement . . . which is untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, to be untrue or misleading.”

256. GM caused to be made or disseminated through California and the United States, through advertising, marketing and other publications, statements that were untrue or misleading, and which were known, or which by the exercise of reasonable care should have been known to GM, to be untrue and misleading to consumers, including Plaintiffs and the other Class members.

257. GM has violated § 17500 because the misrepresentations and omissions regarding the functionality, reliability, environmental-friendliness, and lawfulness of Affected Vehicles as set forth in this Complaint were material and likely to deceive a reasonable consumer.

258. Plaintiffs and the other Class members have suffered an injury in fact, including the loss of money or property, as a result of GM’s unfair, unlawful, and/or deceptive practices. In purchasing or leasing their Affected Vehicles, Plaintiffs and the other Class members relied on the misrepresentations and/or omissions of GM with respect to the functionality, reliability, environmental-friendliness, and lawfulness of the Affected Vehicles. GM’s representations turned out not to be true because the NOx reduction system in the Affected Vehicles turns off or is limited during normal driving conditions and the Affected Vehicles are distributed with GM Clean Diesel engine systems that include defective emissions

controls and a “Defeat Device.” Had Plaintiffs and the other Class members known this, they would not have purchased or leased their Affected Vehicles and/or paid as much for them. Accordingly, Plaintiffs and the other Class members overpaid for their Affected Vehicles and did not receive the benefit of their bargain.

259. All of the wrongful conduct alleged herein occurred, and continues to occur, in the conduct of GM’s business. GM’s wrongful conduct is part of a pattern or generalized course of conduct that is still perpetuated and repeated, both in the State of California and nationwide.

260. The facts concealed and omitted by GM to Plaintiffs and the other California Class members are material in that a reasonable consumer would have considered them to be important in deciding whether to purchase or lease the Affected Vehicles or pay a lower price. Had Plaintiffs and the other California Class members known of the higher emissions at the time they purchased or leased their Affected Vehicles, they would not have purchased or leased those vehicles, or would have paid substantially less for the vehicles than they did.

261. Plaintiffs have provided GM with notice of its violations of the CLRA pursuant to CAL. CIV. CODE § 1782(a). The notice was transmitted to GM on May 23, 2017.

262. Plaintiffs’ and the other California Class members’ injuries were proximately caused by GM’s fraudulent and deceptive business practices.

263. Therefore, Plaintiffs and the other California Class members are entitled to equitable relief and will amend this action and seek monetary relief under the CLRA.

264. Plaintiffs, individually and on behalf of the other Class members, request that this Court enter such orders or judgments as may be necessary to restore to Plaintiffs and the other Class members any money GM acquired by unfair competition, including restitution and/or restitutionary disgorgement and for such other relief as may be appropriate.

COUNT 4

BREACH OF CONTRACT (BASED ON CALIFORNIA LAW)

265. Plaintiffs incorporate by reference all paragraphs as though fully set forth herein.

266. This claim is brought by Plaintiffs on behalf of residents of California who are members of the class.

267. GM's misrepresentations and omissions alleged herein, including GM's failure to disclose the existence of the GM Clean Diesel engine system's defect and/or defective design of the emissions controls, caused Plaintiffs and the other Class members to make their purchases or leases of their Affected Vehicles. Absent those misrepresentations and omissions, Plaintiffs and the other Class members would not have purchased or leased these Affected Vehicles, would not

have purchased or leased these Affected Vehicles at the prices they paid, and/or would have purchased or leased less expensive alternative vehicles that did not contain the defective GM Clean Diesel engine system and which were not marketed as including such a system. Accordingly, Plaintiffs and the other Class members overpaid for their Affected Vehicles and did not receive the benefit of their bargain.

268. Each and every sale or lease of an Affected Vehicle constitutes a contract between GM and the purchaser or lessee. GM breached these contracts by selling or leasing to Plaintiffs and the other Class members defective Affected Vehicles and by misrepresenting or failing to disclose that the NOx reduction system in the Affected Vehicles turns off or is limited during normal driving conditions and the existence of the GM Clean Diesel engine system's defect and/or defective design of the emissions controls, including information known to GM, rendering each Affected Vehicle non-EPA-compliant, and thus less valuable than vehicles not equipped with the defective GM Clean Diesel engine system.

269. As a direct and proximate result of GM's breach of contract, Plaintiffs and the Class have been damaged in an amount to be proven at trial, which shall include, but is not limited to, all compensatory damages, incidental and consequential damages, and other damages allowed by law.

COUNT 5

FRAUDULENT CONCEALMENT (BASED ON CALIFORNIA LAW)

270. Plaintiffs incorporate by reference all paragraphs as though fully set forth herein.

271. This claim is brought by Plaintiffs on behalf of residents of California who are members of the class.

272. GM intentionally concealed that the NOx reduction system in the Affected Vehicles turns off or is limited during normal driving conditions, that the Affected Vehicles had defective emissions controls, emitted pollutants at a higher level than gasoline powered vehicles, emitted pollutants higher than a reasonable consumer would expect in light of GM's advertising campaign, emitted unlawfully high levels of pollutants such as NOx, and were non-compliant with EPA emission requirements, or GM acted with reckless disregard for the truth and denied Plaintiffs and the other Class members information that is highly relevant to their purchasing decision.

273. GM further affirmatively misrepresented to Plaintiffs in advertising and other forms of communication, including standard and uniform material provided with each car, that the Affected Vehicles it was selling had no significant defects, were Earth-friendly and low emission vehicles, complied with EPA regulations, and would perform and operate properly when driven in normal usage.

274. GM knew these representations were false when made.

275. The Affected Vehicles purchased or leased by Plaintiffs and the other Class members were, in fact, defective, emitting pollutants at a much higher rate than gasoline powered vehicles and at a much higher rate than a reasonable consumer would expect in light of GM's advertising campaign, non-EPA-compliant, and unreliable because the NOx reduction system in the Affected Vehicles turns off or is limited during normal driving conditions.

276. GM had a duty to disclose that the NOx reduction system in the Affected Vehicles turns off or is limited during normal driving conditions and that these Affected Vehicles were defective, employed a "Defeat Device," emitted pollutants at a much higher rate than gasoline powered vehicles, that the emissions far exceeded those expected by a reasonable consumer, were non-EPA-compliant and unreliable, because Plaintiffs and the other Class members relied on GM's material representations that the Affected Vehicles they were purchasing were reduced emission vehicles, efficient, and free from defects.

277. As alleged in this Complaint, at all relevant times, GM has held out the Affected Vehicles to be reduced emissions and EPA-compliant. GM disclosed certain details about the GM Clean Diesel engine, but nonetheless, GM intentionally failed to disclose the important facts that the NOx reduction system in the Affected Vehicles turns off or is limited during normal driving conditions and

that the Affected Vehicles had defective emissions controls, deploy a “Defeat Device,” emitted higher levels of pollutants than expected by a reasonable consumer, emitted unlawfully high levels of pollutants, and were non-compliant with EPA emissions requirements, making other disclosures about the emission system deceptive.

278. The truth about the defective emissions controls and GM’s manipulations of those controls, unlawfully high emissions, the “Defeat Device,” and non-compliance with EPA emissions requirements was known only to GM; Plaintiffs and the Class members did not know of these facts and GM actively concealed these facts from Plaintiffs and Class members.

279. Plaintiffs and Class members reasonably relied upon GM’s deception. They had no way of knowing that GM’s representations were false and/or misleading. As consumers, Plaintiffs and Class members did not, and could not, unravel GM’s deception on their own. Rather, GM intended to deceive Plaintiffs and Class members by concealing the true facts about the Affected Vehicle emissions.

280. GM also concealed and suppressed material facts concerning what is evidently the true culture of GM—one characterized by an emphasis on profits and sales above compliance with federal and state clean air laws and emissions regulations that are meant to protect the public and consumers. It also emphasized

profits and sales above the trust that Plaintiffs and Class members placed in its representations. Consumers buy diesel cars from GM because they feel they are clean diesel cars. They do not want to be spewing noxious gases into the environment. And yet, that is precisely what the Affected Vehicles are doing.

281. GM's false representations were material to consumers, because they concerned the quality of the Affected Vehicles, because they concerned compliance with applicable federal and state law and regulations regarding clean air and emissions, and also because the representations played a significant role in the value of the vehicles. As GM well knew, its customers, including Plaintiffs and Class members, highly valued that the vehicles they were purchasing or leasing were fuel efficient, clean diesel cars with reduced emissions, and they paid accordingly.

282. GM had a duty to disclose the emissions defect, defective design of the emissions controls, and violations with respect to the Affected Vehicles because details of the true facts were known and/or accessible only to GM, because GM had exclusive knowledge as to such facts, and because GM knew these facts were not known to or reasonably discoverable by Plaintiffs or Class members. GM also had a duty to disclose because it made general affirmative representations about the qualities of its vehicles with respect to emissions, starting with references to them as *reduced emissions* diesel cars and as compliant with all laws in each

state, which were misleading, deceptive, and incomplete without the disclosure of the additional facts set forth above regarding the actual emissions of its vehicles, its actual philosophy with respect to compliance with federal and state clean air laws and emissions regulations, and its actual practices with respect to the vehicles at issue. Having volunteered to provide information to Plaintiffs and Class members, GM had the duty to disclose not just the partial truth, but the entire truth. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and Class members. Whether a manufacturer's products pollute, comply with federal and state clean air laws and emissions regulations, and whether that manufacturer tells the truth with respect to such compliance or non-compliance are material concerns to a consumer, including with respect to the emissions certifications testing their vehicles must pass. GM represented to Plaintiffs and Class members that they were purchasing or leasing *reduced emission* diesel vehicles, when in fact, they were purchasing or leasing defective, high emission, and unlawfully high emission vehicles.

283. GM actively concealed and/or suppressed these material facts, in whole or in part, to pad and protect its profits and to avoid the perception that its vehicles were not clean diesel vehicles and did not or could not comply with federal and state laws governing clean air and emissions, which perception would

hurt the brand's image and cost GM money, and it did so at the expense of Plaintiffs and Class members.

284. GM has still not made full and adequate disclosures, and continues to defraud Plaintiffs and Class members by concealing material information regarding the emissions qualities of its referenced vehicles.

285. Plaintiffs and Class members were unaware of the omitted material facts referenced herein, and they would not have acted as they did if they had known of the concealed and/or suppressed facts, in that they would not have purchased purportedly reduced emissions diesel cars manufactured by GM, and/or would not have continued to drive their heavily polluting vehicles, or would have taken other affirmative steps in light of the information concealed from them. Plaintiffs' and Class members' actions were justified. GM was in exclusive control of the material facts, and such facts were not generally known to the public, Plaintiffs, or Class members.

286. Because of the concealment and/or suppression of the facts, Plaintiffs and Class members have sustained damage because they own vehicles that are diminished in value as a result of GM's concealment of the true quality and quantity of those vehicles' emissions and GM's failure to timely disclose the defect or defective design of the GM Clean Diesel engine system, the actual emissions qualities and quantities of GM-branded vehicles, and the serious issues engendered

by GM's corporate policies. Had Plaintiffs and Class members been aware of the true emissions facts with regard to the Affected Vehicles, and the Company's disregard for the truth and compliance with applicable federal and state law and regulations, Plaintiffs and Class members who purchased or leased new or certified previously owned vehicles would have paid less for their vehicles or would not have purchased or leased them at all.

287. The value of Plaintiffs' and Class members' vehicles has diminished as a result of GM's fraudulent concealment of the defective emissions controls of the Affected Vehicles, and of the unlawfully high emissions of the Affected Vehicles, and of the non-compliance with EPA emissions requirements, all of which has greatly tarnished the GM brand name attached to Plaintiffs' and Class members' vehicles and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

288. Accordingly, GM is liable to Plaintiffs and Class members for damages in an amount to be proven at trial.

289. GM's acts were done wantonly, maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and Class members' rights and the representations that GM made to them in order to enrich GM. GM's conduct warrants an assessment of punitive damages in an

amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

C. Claims Brought on Behalf of the Louisiana Class

COUNT 6

**VIOLATION OF THE LOUISIANA UNFAIR TRADE PRACTICES
AND CONSUMER PROTECTION LAW
(LA. REV. STAT. § 51:1401 *ET SEQ.*)**

290. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

291. This claim is brought by Plaintiffs on behalf of residents of Louisiana who are members of the Class

292. GM, Plaintiffs, and the Louisiana Class members are “persons” within the meaning of the LA. REV. STAT. § 51:1402(8).

293. Plaintiffs and Louisiana Class members are “consumers” within the meaning of LA. REV. STAT. § 51:1402(1).

294. GM engaged in “trade” or “commerce” within the meaning of LA. REV. STAT. § 51:1402(9).

295. The Louisiana Unfair Trade Practices and Consumer Protection Law (“Louisiana CPL”) makes unlawful “deceptive acts or practices in the conduct of any trade or commerce.” LA. REV. STAT. § 51:1405(A). New GM participated in misleading, false, or deceptive acts that violated the Louisiana CPL.

296. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of Affected Vehicles.

297. GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers.

298. GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with intent to mislead Plaintiffs and the Louisiana Class.

299. GM knew or should have known that its conduct violated the Louisiana CPL.

300. GM owed Plaintiffs a duty to disclose the emissions in the Affected Vehicles, because GM:

- a. Possessed exclusive knowledge;
- b. Intentionally concealed the foregoing from Plaintiffs; and/or
- c. Made incomplete representations about the emissions and performance of the Affected Vehicles, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

301. Plaintiffs and the Louisiana Class suffered ascertainable loss caused by GM's misrepresentations and its concealment of and failure to disclose material information.

302. As a direct and proximate result of GM's violations of the Louisiana CPL, Plaintiffs and the Louisiana Class have suffered injury-in-fact and/or actual damage.

303. Pursuant to LA. REV. STAT. § 51:1409, Plaintiffs and the Louisiana Class seek to recover actual damages in an amount to be determined at trial; treble damages for GM's knowing violations of the Louisiana CPL; an order enjoining GM's unfair, unlawful, and/or deceptive practices; declaratory relief; attorneys' fees; and any other just and proper relief available under LA. REV. STAT. § 51:1409.

COUNT 7

FRAUDULENT CONCEALMENT (BASED ON LOUISIANA LAW)

304. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

305. This claim is brought by Plaintiffs on behalf of residents of Louisiana who are members of the Class.

306. GM concealed and suppressed material facts concerning the quality of its vehicles and the emissions system in the Affected Vehicles.

307. Because of the concealment and/or suppression of the facts, Plaintiffs and the Louisiana Class sustained damage because they overpaid for their vehicles and own vehicles that diminished in value as a result of GM's concealment. Had they been aware of the true facts, Plaintiffs and Class members would not have purchase or leased their Affected Vehicles or would have paid less.

D. Claims Brought on Behalf of the Other State Classes

COUNT 8

**VIOLATION OF THE ALABAMA DECEPTIVE TRADE
PRACTICES ACT
(ALA. CODE § 8-19-1 *ET SEQ.*)**

308. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

309. This claim is included here for notice purposes only. Once the statutory notice period has expired, Plaintiffs will amend their complaint to bring this claim on behalf of residents of Alabama who are members of the Class.

310. The Alabama Deceptive Trade Practices Act (Alabama DTPA) declares several specific actions to be unlawful, including: “engaging in any other unconscionable, false, misleading, or deceptive act or practice in the conduct of trade or commerce.” ALA. CODE § 8-19-5.

311. Plaintiffs and Alabama Class members are “consumers” within the meaning of ALA. CODE. § 8-19-3(2).

312. Plaintiffs, Alabama Class members, and GM are “persons” within the meaning of ALA. CODE § 8-19-3(3).

313. Each defendant was and is engaged in “trade or commerce” within the meaning of ALA. CODE § 8-19-3(8).

314. Pursuant to ALABAMA CODE § 8-19-10, Plaintiffs will amend to seek monetary relief against Defendants measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of \$100 for each plaintiff.

315. Plaintiffs also will amend to seek an order enjoining each Defendant’s unfair, unlawful, and/or deceptive practices, attorneys’ fees, and any other just and proper relief available under ALA. CODE. § 8-19-1 *et seq.*

316. On May 23, 2017, Plaintiffs sent a letter complying with ALA. CODE § 8-19-10(e) to Defendants. Should Defendants fail to remedy their unlawful conduct within the requisite period, Plaintiffs will amend to seek all damages and relief to which they are entitled.

COUNT 9

VIOLATION OF THE ALASKA UNFAIR TRADE PRACTICES AND CONSUMER PROTECTION ACT (ALASKA STAT. ANN. § 45.50.471 *ET SEQ.*)

317. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

318. This claim is included here for notice purposes only. Once the statutory notice period has expired, Plaintiffs will amend their complaint to bring this claim on behalf of residents of Alaska who are members of the class.

319. The Alaska Unfair Trade Practices and Consumer Protection Act (Alaska CPA) declared unfair methods of competition and unfair or deceptive acts or practices in the conduct of trade or commerce unlawful, including “using or employing deception, fraud, false pretense, false promise, misrepresentation, or knowingly concealing, suppressing, or omitting a material fact with intent that others rely upon the concealment, suppression or omission in connection with the sale or advertisement of goods or services whether or not a person has in fact been misled, deceived or damaged.” ALASKA STAT. ANN. § 45.50.471.

320. Pursuant to ALASKA STAT ANN. § 45.50.531, Plaintiffs will amend their Complaint to seek monetary relief against each Defendant measured as the greater of (a) three times the actual damages in an amount to be determined at trial or (b) \$500 for each plaintiff.

321. Plaintiffs also will amend to seek an order enjoining each Defendant’s unfair, unlawful, and/or deceptive practices pursuant to ALASKA STAT. ANN. § 45.50.535(b)(1), attorneys’ fees, and any other just and proper relief available under the Alaska CPA.

322. On May 23, 2017, Plaintiffs sent a letter complying with ALASKA STAT. ANN. § 45.50.535(b)(1) to Defendants.

COUNT 10

**VIOLATION OF THE ARIZONA CONSUMER FRAUD ACT
(ARIZONA REV. STAT. § 44-1521 ET SEQ.)**

323. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

324. This claim is brought by Plaintiffs on behalf of residents of Arizona who are members of the class.

325. The Arizona Consumer Fraud Act (Arizona CFA) provides that “[t]he act, use or employment by any person of any deception, deceptive act or practice, fraud . . . , misrepresentation, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale . . . of any merchandise whether or not any person has in fact been misled, deceived or damaged thereby, is declared to be an unlawful practice.” Ariz. Rev. Stat. § 44-1522(A).

326. Defendants, Plaintiffs, and Class members are “persons” within the meaning of the Arizona CFA, ARIZ. REV. STAT. § 44-1521(6).

327. Each Affected Vehicle at issue is “merchandise” within the meaning of ARIZ. REV. STAT. § 44-1521(5).

328. Defendants' conduct, as set forth above, occurred in the conduct of trade or commerce.

329. Pursuant to the Arizona CFA, Plaintiffs seek monetary relief against each Defendant in an amount to be determined at trial. Plaintiffs also seek punitive damages because each Defendant engaged in aggravated and outrageous conduct with an evil mind.

330. Plaintiffs also seek an order enjoining each Defendant's unfair, unlawful, and/or deceptive practices, attorneys' fees, and any other just and proper relief available under the Arizona CFA.

COUNT 11

VIOLATION OF THE ARKANSAS DECEPTIVE TRADE PRACTICES ACT (ARK. CODE ANN. § 4-88-101 *ET SEQ.*)

331. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

332. This claim is brought by Plaintiffs on behalf of residents of Arkansas who are members of the class.

333. The Arkansas Deceptive Trade Practices Act (Arkansas DTPA) prohibits "[d]eceptive and unconscionable trade practices," which include but are not limited to "[e]ngaging in any . . . unconscionable false, or deceptive act or practice in business, commerce, or trade." ARK. CODE. ANN. § 4-88-107(a)(10).

The Arkansas DTPA also prohibits, in connection with the sale or advertisement of any goods, “(1) the act, use, or employment by any person of any deception, fraud, or pretense; or (2) the concealment, suppression, or omission of any material fact with intent that other rely upon the concealment, suppression, or omission.” ARK CODE. ANN. § 4-88-108.

334. Defendants, Plaintiffs, and Class members are “persons” within the meaning of ARK. CODE. ANN. § 4-88-102(5).

335. Each Affected Vehicle at issue constitutes “goods” within the meaning of ARK. CODE ANN. § 4-88-102(4).

336. Plaintiffs seek monetary relief against Defendants in an amount to be determined at trial. Plaintiffs also seek punitive damages because Defendants acted wantonly in causing Plaintiffs’ and Class members’ injuries, or with such a conscious indifference to the consequences that malice may be inferred.

337. Plaintiffs also seek an order enjoining Defendants’ unfair, unlawful, and/or deceptive practices, attorneys’ fees, and any other just and proper relief available under the Arkansas DTPA.

COUNT 12

**VIOLATION OF THE COLORADO CONSUMER PROTECTION
ACT
(COLO. REV. STAT. § 6-1-101 *ET SEQ.*)**

338. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

339. This claim is brought by Plaintiffs on behalf of residents of Colorado who are members of the class.

340. The Colorado Consumer Protection Act (Colorado CPA) prohibits deceptive practices in the course of a person's business, including but not limited to "fail[ing] to disclose material information concerning goods, services, or property which information was known at the time of an advertisement or sale if such failure to disclose such information was intended to induce the consumer to enter into a transaction." COLO. REV. STAT. § 6-1-105.

341. Each Defendant is a "person" under COLO. REV. STAT. § 6-1-102(6).

342. Plaintiffs and Colorado Class members are "consumers" for purposes of COL. REV. STAT § 6-1-113(1)(a).

343. Each Defendant's conduct, as set forth above, occurred in the conduct of trade or commerce.

344. Pursuant to COLO. REV. STAT. § 6-1-113, Plaintiffs seek monetary relief against each Defendant measured as the greater of (a) actual damages in an

amount to be determined at trial and discretionary trebling of such damages, or
(b) statutory damages in the amount of \$500 for each plaintiff or class member.

345. Plaintiffs also seek an order enjoining each Defendant's unfair, unlawful, or deceptive practices, declaratory relief, attorneys' fees, and any other just and proper remedy under the Colorado CPA.

COUNT 13

VIOLATION OF THE CONNECTICUT UNFAIR TRADE PRACTICES ACT (CONN. GEN. STAT. § 42-110A *ET SEQ.*)

346. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

347. This claim is brought by Plaintiffs on behalf of residents of Connecticut who are members of the class.

348. The Connecticut Unfair Trade Practices Act (Connecticut UTPA) provides: "No person shall engage in unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." CONN. GEN. STAT. § 42-110b(a).

349. Plaintiffs, Connecticut Class members, and Defendants are each a "person" within the meaning of CONN. GEN. STAT. § 42-110a(3).

350. Defendants' challenged conduct occurred in "trade" or "commerce" within the meaning of CONN. GEN. STAT. § 42-110a(4).

351. Plaintiffs and Connecticut Class members are entitled to recover their actual damages, punitive damages, and attorneys' fees pursuant to CONN. GEN. STAT. § 42-110g.

352. Defendants acted with reckless indifference to another's rights, or wanton or intentional violation of another's rights, and otherwise engaged in conduct amounting to a particularly aggravated, deliberate disregard for the rights of others. Therefore, punitive damages are warranted.

COUNT 14

VIOLATION OF THE DELAWARE CONSUMER FRAUD ACT (DEL. CODE TIT. 6, § 2513 *ET SEQ.*)

353. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

354. This claim is brought by Plaintiffs on behalf of residents of Delaware who are members of the class.

355. The Delaware Consumer Fraud Act (Delaware CFA) prohibits the "act, use, or employment by any person of any deception, fraud, false pretense, false promise, misrepresentation, or the concealment, suppression, or omission of any material fact with intent that others rely upon such concealment, suppression, or omission, in connection with the sale, lease or advertisement of any merchandise, whether or nor any person has in fact been misled, deceived, or damaged thereby." DEL. CODE TIT. 6, § 2513(a).

356. Each Defendant is a “person” within the meaning of DEL. CODE TIT. 6, § 2511(7).

357. Defendants’ actions, as set forth above, occurred in the conduct of trade or commerce.

358. Plaintiffs seek damages under the Delaware CFA for injury resulting from the direct and natural consequences of each Defendant’s unlawful conduct. *See, e.g., Stephenson v. Capano Dev., Inc.*, 462 A.2d 1069, 1077 (Del. 1980). Plaintiffs also seek an order enjoining each Defendant’s unfair, unlawful, and/or deceptive practices, declaratory relief, attorneys’ fees, and any other just and proper relief available under the Delaware CFA.

359. Defendants engaged in gross, oppressive, or aggravated conduct justifying the imposition of punitive damages.

COUNT 15

VIOLATION OF THE GEORGIA FAIR BUSINESS PRACTICES ACT (GA. CODE ANN. § 10-1-390 *ET SEQ.*)

360. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

361. This claim is included here for notice purposes only. Once the statutory notice period has expired, Plaintiffs will amend their complaint to bring this claim on behalf of residents of Georgia who are members of the class.

362. The Georgia Fair Business Practices Act (Georgia FBPA) declares “[u]nfair or deceptive acts or practices in the conduct of consumer transactions and consumer acts or practices in trade or commerce” to be unlawful, GA. CODE. ANN. § 101-393(b), including but not limited to “representing that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have”; “[r]epresenting that goods or services are of a particular standard, quality, or grade . . . if they are of another”; and “[a]dvertising goods or services with intent not to sell them as advertised.” GA. CODE. ANN. § 10-1-393(b).

363. Plaintiffs and Georgia Class members are “consumers” within the meaning of GA. CODE. ANN. § 10-1-393(b).

364. Each Defendant engaged in “trade or commerce” within the meaning of GA. CODE. ANN. § 10-1-393(b).

365. Once the statutory notice period has expired, Plaintiffs will amend to seek damages and exemplary damages (for intentional violations) per GA. CODE. ANN. § 10-1-399(a).

366. Plaintiffs will also amend to seek an order enjoining Defendants’ unfair, unlawful, and/or deceptive practices, attorneys’ fees, and any other just and proper relief available under the Georgia FBPA per GA. CODE. ANN. § 10-1-399.

367. On May 23, 2017, Plaintiffs sent a letter complying with GA. CODE ANN. § 10-1-399(b) to Defendants.

COUNT 16

**VIOLATION OF THE GEORGIA UNIFORM
DECEPTIVE TRADE PRACTICES ACT
(GA. CODE. ANN § 10-1-370 *ET SEQ.*)**

368. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

369. This claim is brought by Plaintiffs on behalf of residents of Georgia who are members of the class.

370. Georgia's Uniform Deceptive Trade Practices Act (Georgia UDTPA) prohibits "deceptive trade practices," which include "representing that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have"; "[r]epresenting that goods or services are of a particular standard, quality, or grade . . . if they are of another"; and "[a]dvertising goods or services with intent not to sell them as advertised." GA. CODE ANN. § 10-1-393(b).

371. Defendant, Plaintiffs, and Georgia Class members are "persons" within the meaning of GA. CODE ANN. § 10-1-371(5).

372. The Plaintiffs seek an order enjoining each Defendant's unfair, unlawful, and/or deceptive practices, attorneys' fees, and any other just and proper relief available under GA. CODE ANN. § 10-1-373.

COUNT 17

**VIOLATION OF THE HAWAII ACT § 480-2(A)
(HAW. REV. STAT. § 480 *ET SEQ.*)**

373. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

374. This claim is brought by Plaintiffs on behalf of residents of Hawaii who are members of the class.

375. HAWAII ACT § 480-2(a) prohibits “unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce.”

376. Each Defendant is a “person” under HAW. REV. STAT. § 480-1.

377. Plaintiffs and Hawaii Class members are “consumer[s]” as defined by HAW. REV. STAT. § 480-1, who purchased or leased the Affected Vehicles at issue.

378. Pursuant to HAW. REV. STAT. § 480-13, Plaintiffs seek monetary relief against each Defendant measured as the greater of (a) \$1,000 and (b) threefold actual damages in an amount to be determined at trial.

379. Under HAW. REV. STAT. § 480-13.5, Plaintiffs seek an additional award against each Defendant of up to \$10,000 for each violation directed at a Hawaii elder. Each Defendant knew or should have known that its conduct was directed to one or more Plaintiffs who are elders. Defendants’ conduct caused one or more of these elders to suffer a substantial loss of property set aside for retirement or for personal or family care and maintenance, or assets essential to the

health or welfare of the elder. Plaintiffs who are elders are substantially more vulnerable to Defendants' conduct because of age, poor health or infirmity, impaired understanding, restricted mobility, or disability, and each of them suffered a substantial physical, emotional, or economic damage resulting from each Defendant's conduct.

COUNT 18

VIOLATION OF THE IDAHO CONSUMER PROTECTION ACT (IDAHO CODE ANN. § 48-601 *ET SEQ.*)

380. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

381. This claim is brought by Plaintiffs on behalf of residents of Idaho who are members of the class.

382. The Idaho Consumer Protection Act (Idaho CPA) prohibits deceptive business practices, including but not limited to (1) representing that the Affected Vehicles have characteristics, uses, and benefits which they do not have; (2) representing that the Affected Vehicles are of a particular standard, quality, and grade when they are not; (3) advertising the Affected Vehicles with the intent not to sell them as advertised; (4) engaging in acts or practices which are otherwise misleading, false, or deceptive to the consumer; and (5) engaging in any unconscionable method, act or practice in the conduct of trade or commerce. *See* IDAHO CIV. CODE § 48-603.

383. Each Defendant is a “person” under IDAHO CODE ANN. § 48-602(1).

384. Defendants’ acts or practices as set forth above occurred in the conduct of “trade” or “commerce” under IDAHO CODE ANN. § 48-602(2).

385. Pursuant to IDAHO CODE § 48-608, Plaintiffs seek monetary relief against each Defendant measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of \$1,000 for each plaintiff.

386. Plaintiffs also seek an order enjoining each Defendant’s unfair, unlawful, and/or deceptive practices, attorneys’ fees, and any other just and proper relief available under the Idaho CPA.

387. Plaintiffs also seek punitive damages against Defendants because each Defendant’s conduct evidences an extreme deviation from reasonable standards. Defendants’ unlawful conduct constitutes malice, oppression, and fraud warranting punitive damages.

COUNT 19

VIOLATION OF THE INDIANA DECEPTIVE CONSUMER SALES ACT (IND. CODE § 24-5-0.5-3)

388. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

389. This claim is included here for notice purposes only. Once the statutory notice period has expired, Plaintiffs will amend their complaint to bring this claim on behalf of residents of Indiana who are members of the class.

390. Indiana's Deceptive Consumer Sales Act (Indiana DCSA) prohibits a person from engaging in a "deceptive business practice[s]" or acts, including but not limited to "(1) That such subject of a consumer transaction has sponsorship, approval, performance, characteristics, accessories, uses, or benefits that they do not have, or that a person has a sponsorship, approval, status, affiliation, or connection it does not have; (2) That such subject of a consumer transaction is of a particular standard, quality, grade, style or model, if it is not and if the supplier knows or should reasonably know that it is not; . . . (7) That the supplier has a sponsorship, approval or affiliation in such consumer transaction that the supplier does not have, and which the supplier knows or should reasonably know that the supplier does not have; . . . (b) Any representations on or within a product or its packaging or in advertising or promotional materials which would constitute a deceptive act shall be the deceptive act both of the supplier who places such a representation thereon or therein, or who authored such materials, and such suppliers who shall state orally or in writing that such representation is true if such other supplier shall know or have reason to know that such representation was false."

391. Each Defendant is a “person” within the meaning of IND. CODE § 25-5-0.5-2(a)(2) and a “supplier” within the meaning of IND. CODE § 24-5-0.5-2(a)(3).

392. Plaintiffs’ vehicle purchases are “consumer transactions” within the meaning of IND. CODE § 24-5-0.5-2(a)(3).

393. Pursuant to IND. CODE § 24-5-0.5-4, once the statutory notice period has expired, Plaintiffs will seek monetary relief against each Defendant measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of \$500 for each plaintiff, including treble damages up to \$1,000 for Defendants’ willfully deceptive acts.

394. Plaintiffs will also amend to seek punitive damages based on the outrageousness and recklessness of each Defendant’s conduct.

395. On May 23, 2017, Plaintiffs sent a letter complying with IND. CODE § 24-5-0.5-5(a) to Defendants.

COUNT 20

VIOLATION OF THE IOWA PRIVATE RIGHT OF ACTION FOR CONSUMER FRAUDS ACT (IOWA CODE § 714H.1 *ET SEQ.*)

396. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

397. This claim is brought by Plaintiffs on behalf of residents of Iowa who are members of the class.

398. The Iowa Private Right of Action for Consumer Frauds Act (Iowa CFA) prohibits any “practice or act the person knows or reasonably should know is an unfair practice, deception, fraud, false pretense, or false promise, or the misrepresentation, concealment, suppression, or omission of a material fact, with the intent that others rely upon the unfair practice, deception, fraud, false pretense, false promise, misrepresentation, concealment, suppression or omission in connection with the advertisement, sale, or lease of consumer merchandise.” IOWA CODE § 714H.3.

399. Each Defendant is a “person” under IOWA CODE § 714H.2(7).

400. Plaintiffs and Iowa Class members are “consumers” as defined by IOWA CODE § 714H.2(3) who purchased or leased one or more Affected Vehicles.

401. Pursuant to IOWA CODE § 714H.5, Plaintiffs seek an order enjoining each Defendant’s unfair and/or deceptive acts or practices, actual damages, statutory damages up to three times the amount of actual damages awarded as a result of each Defendant’s willful and wanton disregard for the rights of others, attorneys’ fees, and other such equitable relief as the court deems necessary to protect the public from further violations of the Iowa CFA.

COUNT 21

**VIOLATION OF THE KANSAS CONSUMER PROTECTION ACT
(KAN. STAT. ANN. § 50-623 *ET SEQ.*)**

402. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

403. This claim is brought by Plaintiffs on behalf of residents of Kansas who are members of the class.

404. The Kansas Consumer Protection Act (Kansas CPA) states “[n]o supplier shall engage in any deceptive act or practice in connection with a consumer transaction.” KAN. STAT. ANN. § 50-626(a). Deceptive acts or practices include but are not limited to “the willful use, in any oral or written representation, of exaggeration, falsehood, innuendo or ambiguity as to a material fact” and “the willful failure to state a material fact, or the willful concealment, suppression or omission of a material fact.” KAN. STAT. ANN. § 50-626.

405. Plaintiffs and Kansas Class members are “consumers” within the meaning of KAN. STAT. ANN. § 50-624(b) who purchased or leased one or more Affected Vehicles.

406. Each sale or lease of an Affected Vehicle to Plaintiffs was a “consumer transaction” within the meaning of KAN. STAT. ANN. § 50-624(c).

407. Pursuant to KAN. STAT. ANN. § 50-634, Plaintiffs seek monetary relief against each Defendant measured as the greater of (a) actual damages in an amount

to be determined at trial and (b) statutory damages in the amount of \$10,000 for each plaintiff.

408. Plaintiffs also seek an order enjoining each Defendant's unfair, unlawful, and/or deceptive practices, declaratory relief, attorneys' fees, and any other just and proper relief available under KAN. STAT. ANN. § 50-623 *et seq.*

COUNT 22

VIOLATION OF THE KENTUCKY CONSUMER PROTECTION ACT (KY. REV. STAT. ANN. § 367.110 *ET SEQ.*)

409. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

410. This claim is brought by Plaintiffs on behalf of residents of Kentucky who are members of the class.

411. The Kentucky Consumer Protection Act (Kentucky CPA) makes unlawful “[u]nfair, false, misleading, or deceptive acts or practices in the conduct of any trade or commerce” KY. REV. STAT. ANN. § 367.170(1).

412. Defendant, Plaintiffs, and Kentucky Class members are “persons” within the meaning of KY. REV. STAT. ANN. § 367.110(1).

413. Each Defendant engaged in “trade” or “commerce” within the meaning of KY. REV. STAT. ANN. § 367.110(2).

414. Pursuant to KY. REV. STAT. ANN. § 367.220, Plaintiffs seek to recover actual damages in an amount to be determined at trial, an order enjoining each Defendant's unfair, unlawful, and/or deceptive practices, declaratory relief, attorneys' fees, and any other just and proper relief available under KY. REV. STAT. ANN. § 367.220.

COUNT 23

VIOLATION OF THE MAINE UNFAIR TRADE PRACTICES ACT (ME. REV. STAT. ANN. TIT. 5, § 205-A *ET SEQ.*)

415. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

416. This claim is brought by Plaintiffs on behalf of residents of Maine who are members of the class.

417. The Maine Unfair Trade Practices Act (Maine UTPA) makes unlawful “[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce.” ME. REV. STAT. ANN. TIT. 5, § 207.

418. Defendant, Plaintiffs, and Maine Class members are “persons” within the meaning of ME. REV. STAT. ANN. TIT. § 5, 206(2).

419. Defendants are engaged in “trade” or “commerce” within the meaning of ME. REV. STAT. ANN. TIT. § 5, 206(3).

420. Pursuant to ME. REV. STAT. ANN. TIT. 5, § 213, Plaintiffs seek an order enjoining each Defendant's unfair and/or deceptive acts or practices.

421. On May 23, 2017, Plaintiffs sent a letter complying with ME. REV. STAT. ANN. TIT. 5, § 213(1-A) to Defendants. This claim is included here for notice purposes only. Once the statutory notice period has expired, Plaintiffs will amend their complaint to bring this claim on behalf of residents of Maryland who are members of the class.

COUNT 24

VIOLATION OF THE MARYLAND CONSUMER PROTECTION ACT (MD. CODE, COM. LAW § 13-101 *ET SEQ.*)

422. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

423. This claim is brought by Plaintiffs on behalf of residents of Maryland who are members of the class.

424. The Maryland Consumer Protection Act (Maryland CPA) provides that a person may not engage in any unfair or deceptive trade practice in the sale or lease of any consumer good, including “failure to state a material fact if the failure deceives or tends to deceive” and “[d]eception, fraud, false pretense, false premise, misrepresentation, or knowing concealment, suppression, or omission of any material fact with the intent that a consumer rely on the same,” MD. CODE, COM. LAW § 13-301, regardless of whether the consumer is actually deceived or damaged, MD. CODE, COM. LAW § 13-302.

425. Defendants, Plaintiffs, and Maryland Class members are “persons” within the meaning of MD. CODE, COM. LAW § 13-101(h).

426. Pursuant to MD. CODE, COM. LAW § 13-408, Plaintiffs seek actual damages, attorneys’ fees, and any other just and proper relief available under the Maryland CPA.

COUNT 25

VIOLATION OF THE MASSACHUSETTS GENERAL LAW CHAPTER 93(A) (MASS. GEN. LAWS CH. 93A, § 1 *ET SEQ.*)

427. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

428. On May 23, 2017, Plaintiffs sent a letter complying with MASS. GEN. LAWS CH. 93A, § 9(3) to Defendants.

COUNT 26

VIOLATION OF THE MICHIGAN CONSUMER PROTECTION ACT (MICH. COMP. LAWS § 445.903 *ET SEQ.*)

429. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

430. This claim is brought by Plaintiffs on behalf of residents of Michigan who are members of the class.

431. The Michigan Consumer Protection Act (Michigan CPA) prohibits “[u]nfair, unconscionable, or deceptive methods, acts, or practices in the conduct of trade or commerce,” including “[f]ailing to reveal a material fact, the omission of which tends to mislead or deceive the consumer, and which fact could not reasonably be known by the consumer”; “[m]aking a representation of fact or statement of fact material to the transaction such that a person reasonably believes the represented or suggested state of affairs to be other than it actually is”; or “[f]ailing to reveal facts that are material to the transaction in light of representations of fact made in a positive manner.” MICH. COMP. LAWS § 445.903(1).

432. Plaintiffs and Michigan Class members are “person[s]” within the meaning of the MICH. COMP. LAWS § 445.902(1)(d).

433. Each Defendant is a “person” engaged in “trade or commerce” within the meaning of the MICH. COMP. LAWS § 445.902(1)(d) and (g).

434. Plaintiffs seek injunctive relief to enjoin Defendants from continuing their unfair and deceptive acts; monetary relief against each Defendant measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of \$250 for each plaintiff; reasonable attorneys’ fees; and any other just and proper relief available under MICH. COMP. LAWS § 445.911.

435. Plaintiffs also seek punitive damages because each Defendant carried out despicable conduct with willful and conscious disregard of the rights of others. Defendants' conduct constitutes malice, oppression, and fraud warranting punitive damages.

COUNT 27

VIOLATION OF THE MINNESOTA PREVENTION OF CONSUMER FRAUD ACT (MINN. STAT. § 325F.68 *ET SEQ.*)

436. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

437. This claim is brought by Plaintiffs on behalf of residents of Minnesota who are members of the class.

438. The Minnesota Prevention of Consumer Fraud Act (Minnesota CFA) prohibits “[t]he act, use, or employment by any person of any fraud, false pretense, false promise, misrepresentation, misleading statement or deceptive practice, with the intent that others rely thereon in connection with the sale of any merchandise, whether or not any person has in fact been misled, deceived, or damaged thereby.” MINN. STAT. § 325F.69(1).

439. Each purchase or lease of an Affected Vehicle constitutes “merchandise” within the meaning of MINN. STAT. § 325F.68(2).

440. Pursuant to MINN. STAT. § 8.31(3a), Plaintiffs seek actual damages, attorneys' fees, and any other just and proper relief available under the Minnesota CFA.

441. Plaintiffs also seek punitive damages under MINN. STAT. § 549.20(1)(a) given the clear and convincing evidence that each Defendant's acts show deliberate disregard for the rights of others.

COUNT 28

VIOLATION OF THE MINNESOTA DECEPTIVE TRADE PRACTICES ACT (MINN. STAT. § 325D.43-48 *et seq.*)

442. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

443. This claim is brought by Plaintiffs on behalf of residents of Minnesota who are members of the class.

444. The Minnesota Deceptive Trade Practices Act (Minnesota DTPA) prohibits deceptive trade practices, which include “[t]he act, use, or employment by any person of any fraud, false pretense, false promise, misrepresentation, misleading statement or deceptive practice, with the intent that others rely thereon in connection with the sale of any merchandise, whether or not any person has in fact been misled, deceived, or damaged thereby.” MINN. STAT. § 325F.69(1).

445. Pursuant to MINN. STAT. § 8.31(3a), Plaintiffs seek actual damages, attorneys' fees, and any other just and proper relief available under the Minnesota CFA.

446. Plaintiffs also seek punitive damages under MINN. STAT. § 549.20(1)(a) given the clear and convincing evidence that Defendants' acts show deliberate disregard for the rights of others.

COUNT 29

VIOLATION OF THE MISSISSIPPI CONSUMER PROTECTION ACT (MISS. CODE. ANN. § 75-24-1 *et seq.*)

447. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

448. This claim is brought by Plaintiffs on behalf of residents of Mississippi who are members of the class.

449. The Mississippi Consumer Protection Act (Mississippi CPA) prohibits "unfair or deceptive trade practices in or affecting commerce." MISS. CODE ANN. § 75-24-5(1). Unfair or deceptive practices include but are not limited to "(e) Representing that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have or that a person has a sponsorship, approval, status, affiliation, or connection that he does not have"; "(g) Representing that goods or services are of a particular

standard, quality, or grade, or that goods are of a particular style or model, if they are of another”; and “(i) Advertising goods or services with intent not to sell them as advertised.” MISS. CODE ANN. § 75-24-5(2).

450. Plaintiffs seek actual damages in an amount to be determined at trial any other just and proper relief available under the Mississippi CPA.

COUNT 30

VIOLATION OF THE MONTANA UNFAIR TRADE PRACTICES AND CONSUMER PROTECTION ACT OF 1973 (MONT. CODE ANN. § 30-14-101 *ET SEQ.*)

451. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

452. This claim is brought by Plaintiffs on behalf of residents of Montana who are members of the class.

453. The Montana Unfair Trade Practices and Consumer Protection Act (Montana CPA) makes unlawful any “unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce.” MONT. CODE ANN. § 30-14-103.

454. Defendant, Plaintiffs, and Montana Class members are “persons” within the meaning of MONT. CODE ANN. § 30-14-102(6).

455. Plaintiffs and Montana Class members are “consumer[s]” under MONT. CODE ANN. § 30-14-102(1).

456. The sale or lease of each Affected Vehicle at issue occurred within “trade and commerce” within the meaning of MONT. CODE ANN. § 30-14-102(8), and each Defendant committed deceptive and unfair acts in the conduct of “trade and commerce” as defined in that statutory section.

457. Because Defendants’ unlawful methods, acts, and practices have caused Plaintiffs to suffer an ascertainable loss of money and property, Plaintiffs seek from each Defendant: the greater of actual damages or \$500; discretionary treble damages; and reasonable attorneys’ fees.

458. Plaintiffs additionally seek an order enjoining each Defendant’s unfair, unlawful, and/or deceptive practices, and any other relief the Court considers necessary or proper, under MONT. CODE ANN. § 30-14-133.

COUNT 31

VIOLATION OF THE NEBRASKA CONSUMER PROTECTION ACT (NEB. REV. STAT. § 59-1601 *ET SEQ.*)

459. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

460. This claim is brought by Plaintiffs on behalf of residents of Nebraska who are members of the class.

461. The Nebraska Consumer Protection Act (Nebraska CPA) prohibits “unfair or deceptive acts or practices in the conduct of any trade or commerce.” NEB. REV. STAT. § 59-1602.

462. Defendant, Plaintiffs, and Nebraska Class members are “person[s]” under NEB. REV. STAT. § 59-1601(1).

463. Defendants’ actions as set forth herein occurred in the conduct of trade or commerce as defined under NEB. REV. STAT. § 59-1601(2).

464. Because Defendants’ conduct caused injury to Plaintiffs’ property through violations of the Nebraska CPA, Plaintiffs seek recovery of actual damages as well as enhanced damages up to \$1,000, an order enjoining each Defendant’s unfair or deceptive acts and practices, costs of Court, reasonable attorneys’ fees, and any other just and proper relief available under NEB. REV. STAT. § 59-1609.

COUNT 32

VIOLATION OF THE NEVADA DECEPTIVE TRADE PRACTICES ACT (NEV. REV. STAT. § 598.0903 *ET SEQ.*)

465. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

466. This claim is brought by Plaintiffs on behalf of residents of Nevada who are members of the class.

467. The Nevada Deceptive Trade Practices Act (Nevada DTPA) prohibits deceptive trade practices. NEV. REV. STAT. § 598.0915 provides that a person engages in a “deceptive trade practice” if, in the course of business or occupation, the person “[k]nowingly makes a false representation as to the characteristics, ingredients, uses, benefits, alterations or quantities of goods or services for sale or lease or a false representation as to the sponsorship, approval, status, affiliation or connection of a person therewith”; “[r]epresents that goods or services for sale or lease are of a particular standard, quality or grade, or that such goods are of a particular style or model, if he or she knows or should know that they are of another standard, quality, grade, style or model”; “[a]dvertises goods or services with intent not to sell or lease them as advertised”; or “[k]nowingly makes any other false representation in a transaction.” NEV. REV. STAT. §§ 598.0915–598.0925.

468. Accordingly, Plaintiffs seek their actual damages, punitive damages, an order enjoining Defendants’ deceptive acts or practices, costs of Court, attorney’s fees, and all other appropriate and available remedies under the Nevada DTPA. NEV. REV. STAT. § 41.600.

COUNT 33

**VIOLATION OF THE NEW HAMPSHIRE
CONSUMER PROTECTION ACT
(N.H. REV. STAT. ANN. § 358-A:1 *ET SEQ.*)**

469. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

470. This claim is brought by Plaintiffs on behalf of residents of New Hampshire who are members of the class.

471. The New Hampshire Consumer Protection Act (New Hampshire CPA) prohibits a person, in the conduct of any trade or commerce, from “using any unfair or deceptive act or practice,” including “but . . . not limited to, the following: . . . [r]epresenting that goods or services have . . . characteristics, . . . uses, benefits, or quantities that they do not have”; “[r]epresenting that goods or services are of a particular standard, quality, or grade, . . . if they are of another”; and “[a]dvertising goods or services with intent not to sell them as advertised.” N.H. REV. STAT. § 358-A:2.

472. Defendant, Plaintiffs, and New Hampshire Class members are “persons” under N.H. REV. STAT. ANN. § 358-A:1.

473. Defendants’ actions as set forth herein occurred in the conduct of trade or commerce as defined under N.H. REV. STAT. ANN. § 358-A:1.

474. Because Defendants' willful conduct caused injury to Plaintiffs' property through violations of the New Hampshire CPA, Plaintiffs seek recovery of actual damages or \$1,000, whichever is greater; treble damages; costs and reasonable attorneys' fees; an order enjoining each Defendant's unfair and/or deceptive acts and practices; and any other just and proper relief under N.H. REV. STAT. ANN. § 358-A:10.

COUNT 34

VIOLATION OF THE NEW JERSEY CONSUMER FRAUD ACT (N.J. STAT. ANN. § 56:8-1 *et seq.*)

475. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

476. This claim is brought by Plaintiffs on behalf of residents of New Jersey who are members of the class.

477. The New Jersey Consumer Fraud Act (New Jersey CFA) makes unlawful "[t]he act, use or employment by any person of any unconscionable commercial practice, deception, fraud, false pretense, false promise, misrepresentation, or the knowing concealment, suppression or omission of any material fact with the intent that others rely upon such concealment, suppression or omission, in connection with the sale or advertisement of any merchandise or real estate, or with the subsequent performance of such person as aforesaid, whether or

not any person has in fact been misled, deceived or damaged thereby.” N.J. STAT. ANN. § 56:8-2.

478. Defendant, Plaintiffs, and New Jersey Class members are “persons” within the meaning of N.J. STAT. ANN. § 56:8-1(d).

479. Defendants engaged in “sales” of “merchandise” within the meaning of N.J. STAT. ANN. § 56:8-1(c), (d).

480. Plaintiffs are entitled to recover legal and/or equitable relief, including an order enjoining Defendants’ unlawful conduct, treble damages, costs, and reasonable attorneys’ fees pursuant to N.J. STAT. ANN. § 56:8-19, and any other just and appropriate relief.

COUNT 35

VIOLATION OF THE NEW MEXICO UNFAIR TRADE PRACTICES ACT (N.M. STAT. ANN. § 57-12-1 *ET SEQ.*)

481. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

482. This claim is brought by Plaintiffs on behalf of residents of New Mexico who are members of the class.

483. The New Mexico Unfair Trade Practices Act (New Mexico UTPA) makes unlawful “a false or misleading oral or written statement, visual description or other representation of any kind knowingly made in connection with the sale,

lease, rental or loan of goods or services . . . by a person in the regular course of the person's trade or commerce, that may, tends to or does deceive or mislead any person," including but not limited to "failing to state a material fact if doing so deceives or tends to deceive." N.M. STAT. ANN. § 57-12-2(D).

484. Defendant, Plaintiffs, and New Mexico Class members are "person[s]" under N.M. STAT. ANN. § 57-12-2.

485. Defendants' actions as set forth herein occurred in the conduct of trade or commerce as defined under N.M. STAT. ANN. § 57-12-2.

486. Because Defendants' unconscionable, willful conduct caused actual harm to Plaintiffs, Plaintiffs seek recovery of actual damages or \$100, whichever is greater; discretionary treble damages; punitive damages; and reasonable attorneys' fees and costs, as well as all other proper and just relief available under N.M. STAT. ANN. § 57-12-10.

COUNT 36

VIOLATION OF THE NEW YORK GENERAL BUSINESS LAW (N.Y. GEN. BUS. LAW §§ 349–350)

487. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

488. This claim is brought by Plaintiffs on behalf of residents of New York who are members of the class.

489. The New York General Business Law (New York GBL) makes unlawful “[d]eceptive acts or practices in the conduct of any business, trade or commerce.” N.Y. GEN. BUS. LAW § 349.

490. Plaintiffs and New York Class members are “persons” within the meaning of N.Y. GEN. BUS. LAW § 349(h).

491. Each Defendant is a “person,” “firm,” “corporation,” or “association” within the meaning of N.Y. GEN. BUS. LAW § 349.

492. Defendants’ deceptive acts and practices, which were intended to mislead consumers who purchased or leased an Affected Vehicle, was conduct directed at consumers.

493. Because Defendants’ willful and knowing conduct caused injury to Plaintiffs, Plaintiffs seek recovery of actual damages or \$50, whichever is greater; discretionary treble damages up to \$1,000; punitive damages; reasonable attorneys’ fees and costs; an order enjoining Defendants’ deceptive conduct; and any other just and proper relief available under N.Y. GEN. BUS. LAW § 349.

COUNT 37

VIOLATION OF THE NORTH CAROLINA UNFAIR AND DECEPTIVE ACTS AND PRACTICES ACT (N.C. GEN. STAT. § 75-1.1 *ET SEQ.*)

494. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

495. This claim is brought by Plaintiffs on behalf of residents of North Carolina who are members of the class.

496. North Carolina's Unfair and Deceptive Acts and Practices Act (the North Carolina Act) broadly prohibits "unfair or deceptive acts or practices in or affecting commerce." N.C. GEN. STAT. § 75-1.1(a).

497. Defendants engaged in "commerce" within the meaning of N.C. GEN. STAT. § 75-1.1(b).

498. Plaintiffs seek an order for treble their actual damages, an order enjoining Defendants' unlawful acts, costs of Court, attorney's fees, and any other just and proper relief available under the North Carolina Act, N.C. GEN. STAT. § 75-16.

COUNT 38

VIOLATION OF THE NORTH DAKOTA CONSUMER FRAUD ACT (N.D. CENT. CODE § 51-15-02)

499. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

500. This claim is brought by Plaintiffs on behalf of residents of North Dakota who are members of the class.

501. The North Dakota Consumer Fraud Act (North Dakota CFA) makes unlawful "[t]he act, use, or employment by any person of any deceptive act or practice, fraud, false pretense, false promise, or misrepresentation, with the intent

that others rely thereon in connection with the sale or advertisement of any merchandise.” N.D. CENT. CODE § 51-15-02.

502. Defendant, Plaintiffs, and North Dakota Class members are “persons” within the meaning of N.D. CENT. CODE § 51-15-02(4).

503. Defendants’ engaged in the “sale” of “merchandise” within the meaning of N.D. CENT. CODE § 51-15-02(3), (5).

504. Defendants knowingly committed the conduct described above and therefore, under N.D. CENT. CODE § 51-15-09, Defendants are liable to Plaintiffs for treble damages in amounts to be proven at trial, as well as attorneys’ fees, costs, and disbursements. Plaintiffs further seek an order enjoining each Defendant’s unfair and/or deceptive acts or practices, and other just and proper available relief under the North Dakota CFA.

COUNT 39

VIOLATION OF THE OHIO CONSUMER SALES PRACTICES ACT (OHIO REV. CODE ANN. § 1345.01 *et seq.*)

505. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

506. This claim is brought by Plaintiffs on behalf of residents of Ohio who are members of the class.

507. Ohio Consumer Sales Practices Act (Ohio CSPA), OHIO REV. CODE ANN. § 1345.02, broadly prohibits unfair or deceptive acts or practices in

connection with a consumer transaction. Specifically, and without limitation of the broad prohibition, the Act prohibits (1) representing that Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have, (2) representing that Affected Vehicles are of a particular standard, quality, and grade when they are not, (3) advertising Affected Vehicles with the intent not to sell them as advertised, and (4) engaging in acts or practices which are otherwise unfair, misleading, false, or deceptive to the consumer. OHIO REV. CODE ANN. § 1345.02.

508. The Ohio Attorney General has made available for public inspection prior state court decisions which have held that the acts and omissions of GM in this Complaint, including but not limited to the failure to honor both implied warranties and express warranties, the making and distribution of false, deceptive, and/or misleading representations, and the concealment and/or non-disclosure of a dangerous defect, constitute deceptive sales practices in violation of the OCSPA. These cases include, but are not limited to, the following:

- a. *Mason v. Mercedes Benz USA, LLC* (OPIF #10002382);
- b. *State ex rel. Betty D. Montgomery v. Volkswagen Motor Co.* (OPIF #10002123);
- c. *State ex rel. Betty D. Montgomery v. Bridgestone/Firestone, Inc.* (OPIF #10002025);
- d. *Bellinger v. Hewlett-Packard Co.*, No. 20744, 2002 Ohio App. LEXIS 1573 (Ohio Ct. App. Apr. 10, 2002) (OPIF #10002077);

- e. *Borror v. MarineMax of Ohio*, No. OT-06-010, 2007 Ohio App. LEXIS 525 (Ohio Ct. App. Feb. 9, 2007) (OPIF #10002388);
- f. *State ex rel. Jim Petro v. Craftmatic Organization, Inc.* (OPIF #10002347);
- g. *Mark J. Craw Volkswagen, et al. v. Joseph Airport Toyota, Inc.* (OPIF #10001586);
- h. *State ex rel. William J. Brown v. Harold Lyons, et al.* (OPIF #10000304);
- i. *Brinkman v. Mazda Motor of America, Inc.* (OPIF #10001427);
- j. *Khouri v. Don Lewis* (OPIF #100001995);
- k. *Mosley v. Performance Mitsubishi aka Automanage* (OPIF #10001326);
- l. *Walls v. Harry Williams dba Butch's Auto Sales* (OPIF #10001524); and
- m. *Brown v. Spears* (OPIF #10000403).

509. Each Defendant is a “supplier” as that term is defined in OHIO REV. CODE ANN. § 1345.01(C).

510. Plaintiffs and Ohio Class members are “consumers” as that term is defined in OHIO REV. CODE ANN. § 1345.01(D), and their purchase or lease of one or more Affected Vehicles is a “consumer transaction” within the meaning of OHIO REV. CODE ANN. § 1345.01(A).

511. As a result of the foregoing wrongful conduct, Plaintiffs have been damaged in an amount to be proven at trial and seek all just and proper remedies, including but not limited to actual and statutory damages, an order enjoining

Defendants' deceptive and unfair conduct, treble damages, court costs, and reasonable attorneys' fees, pursuant to OHIO REV. CODE ANN. § 1345.09 *et seq.*

COUNT 40

**VIOLATION OF THE OKLAHOMA CONSUMER PROTECTION
ACT
(OKLA. STAT. TIT. 15, § 751 *ET SEQ.*)**

512. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

513. This claim is brought by Plaintiffs on behalf of residents of Oklahoma who are members of the class.

514. The Oklahoma Consumer Protection Act (Oklahoma CPA) declares unlawful, *inter alia*, the following acts or practices when committed in the course of business: making a “misrepresentation, omission or other practice that has deceived or could reasonably be expected to deceive or mislead a person to the detriment of that person” and “any practice which offends established public policy or if the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.” OKLA. STAT. TIT. 15, §§ 752–753.

515. Plaintiffs and Oklahoma Class members are “persons” under OKLA. STAT. TIT. 15, § 752.

516. Each Defendant is a “person,” “corporation,” or “association” within the meaning of OKLA. STAT. TIT. 15, § 15-751(1).

517. The sale or lease of an Affected Vehicle to Plaintiffs was a “consumer transaction” within the meaning of OKLA. STAT. TIT. 15, § 752 and each Defendants’ actions as set forth herein occurred in the conduct of trade or commerce.

518. Defendants’ acts were made knowingly, intentionally, and with malice. Defendants demonstrated a complete lack of care and were in reckless disregard for the rights of Plaintiffs and the other Class members. Plaintiffs and the other Class members are therefore entitled to an award of punitive damages to the extent permitted under applicable law.

519. Defendants’ conduct as alleged herein was unconscionable because (1) Defendants, knowingly or had reason to know, took advantage of consumers reasonably unable to protect their interests because of their ignorance of GM’s fraudulent omissions and representations; (2) at the time the consumer transaction was entered into, Defendants knew or had reason to know that price the consumers were charged grossly exceeded the price at which they would have paid if they had known of the Defendants’ scheme, and (3) Defendant knew or had reason to know that the transaction Defendants induced the consumers to enter into was excessively one-sided in favor of each Defendant.

520. Because Defendants’ unconscionable conduct caused injury to Plaintiffs, Plaintiffs seek recovery of actual damages, discretionary penalties up to

\$2,000 per violation, and reasonable attorneys' fees, under OKLA. STAT. TIT. 15, § 761.1. Plaintiffs further seek an order enjoining each Defendant's unfair and/or deceptive acts or practices, and any other just and proper relief available under the Oklahoma CPA.

COUNT 41

VIOLATION OF THE OREGON UNLAWFUL TRADE PRACTICES ACT (OR. REV. STAT. § 646.605 *ET SEQ.*)

521. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

522. This claim is brought by Plaintiffs on behalf of residents of Oregon who are members of the class.

523. The Oregon Unfair Trade Practices Act (Oregon UTPA) prohibits a person from, in the course of the person's business, doing any of the following: representing that goods have characteristics uses, benefits, or qualities that they do not have; representing that goods are of a particular standard or quality if they are of another; advertising goods or services with intent not to provide them as advertised; and engaging in any other unfair or deceptive conduct in trade or commerce. OR. REV. STAT. § 646.608(1).

524. Each Defendant is a person within the meaning of OR. REV. STAT. § 646.605(4).

525. Each Affected Vehicle is a “good” obtained primarily for personal family or household purposes within the meaning of OR. REV. STAT. § 646.605(6).

526. Plaintiffs are entitled to recover the greater of actual damages or \$200 pursuant to OR. REV. STAT. § 646.638(1). Plaintiffs are also entitled to punitive damages because Defendants engaged in conduct amounting to a particularly aggravated, deliberate disregard of the rights of others.

COUNT 42

VIOLATION OF THE PENNSYLVANIA UNFAIR TRADE PRACTICES AND CONSUMER PROTECTION LAW (73 PA. CONS. STAT. § 201-1 *et seq.*)

527. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

528. This claim is brought by Plaintiffs on behalf of residents of Pennsylvania who are members of the class.

529. The Pennsylvania Unfair Trade Practices and Consumer Protection Law (Pennsylvania CPL) prohibits unfair or deceptive acts or practices, including representing that goods or services have characteristics, benefits or qualities that they do not have; representing that goods or services are of a particular standard, quality or grade if they are of another; advertising goods or services with intent not to sell them as advertised; and engaging in any other fraudulent or deceptive

conduct which creates a likelihood of confusion or misunderstanding. 73 P.S. § 201-2(4).

530. Defendant, Plaintiffs, and Pennsylvania Class members are “persons” within the meaning of 73 PA. CONS. STAT. § 201-2(2).

531. Plaintiffs purchased or leased Affected Vehicles primarily for personal, family, or household purposes within the meaning of 73 PA. CONS. STAT. § 201-9.2.

532. All of the acts complained of herein were perpetrated by Defendants in the course of trade or commerce within the meaning of 73 PA. CONS. STAT. § 201-2(3).

533. Defendants are liable to Plaintiffs for treble their actual damages or \$100, whichever is greater, and attorneys’ fees and costs. 73 PA. CONS. STAT. § 201-9.2(a). Plaintiffs are also entitled to an award of punitive damages given that Defendants’ conduct was malicious, wanton, willful, oppressive, or exhibited a reckless indifference to the rights of others.

COUNT 43

VIOLATION OF THE RHODE ISLAND UNFAIR TRADE PRACTICES AND CONSUMER PROTECTION ACT (R.I. GEN. LAWS § 6-13.1 *ET SEQ.*)

534. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

535. This claim is brought by Plaintiffs on behalf of residents of Rhode Island who are members of the class.

536. Rhode Island's Unfair Trade Practices and Consumer Protection Act (Rhode Island CPA) prohibits "unfair or deceptive acts or practices in the conduct of any trade or commerce," including "[e]ngaging in any act or practice that is unfair or deceptive to the consumer" and "[u]sing any other methods, acts or practices which mislead or deceive members of the public in a material respect." R.I. GEN. LAWS § 6-13.1-1(6).

537. Defendant, Plaintiffs, and Rhode Island Class members are "persons" within the meaning of R.I. GEN. LAWS § 6-13.1-1(3).

538. Defendants were engaged in "trade" and "commerce" within the meaning of R.I. GEN. LAWS § 6-13.1-1(5).

539. Plaintiffs purchased or leased Affected Vehicles primarily for personal, family, or household purposes within the meaning of R.I. GEN. LAWS § 6-13.1-5.2(a).

540. Plaintiffs are entitled to recover the greater of actual damages or \$200 pursuant to R.I. GEN. LAWS § 6-13.1-5.2(a). Plaintiffs also seek punitive damages at the discretion of the Court.

COUNT 44

**VIOLATION OF THE SOUTH CAROLINA UNFAIR TRADE
PRACTICES ACT
(S.C. CODE ANN. § 39-5-10 *ET SEQ.*)**

541. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

542. This claim is brought by Plaintiffs on behalf of residents of South Carolina who are members of the class.

543. The South Carolina Unfair Trade Practices Act (South Carolina UTPA) prohibits “unfair or deceptive acts or practices in the conduct of any trade or commerce.” S.C. CODE ANN. § 39-5-20(a).

544. Each Defendant is a “person” under S.C. CODE ANN. § 39-5-10.

545. Pursuant to S.C. CODE ANN. § 39-5-140(a), Plaintiffs seek monetary relief to recover their economic losses. Because Defendants’ actions were willful and knowing, Plaintiffs’ damages should be trebled.

546. Plaintiffs further allege that Defendants’ malicious and deliberate conduct warrants an assessment of punitive damages because Defendants carried out despicable conduct with willful and conscious disregard of the rights of others. Defendants’ unlawful conduct constitutes malice, oppression, and fraud warranting punitive damages.

547. Plaintiffs further seek an order enjoining each Defendant's unfair or deceptive acts or practices.

COUNT 45

**VIOLATION OF THE SOUTH DAKOTA DECEPTIVE TRADE
PRACTICES
AND CONSUMER PROTECTION LAW
(S.D. CODIFIED LAWS § 37-24-6)**

548. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

549. This claim is brought by Plaintiffs on behalf of residents of South Dakota who are members of the class.

550. The South Dakota Deceptive Trade Practices and Consumer Protection Law (South Dakota CPL) prohibits deceptive acts or practices, which include “[k]nowingly act[ing], us[ing], or employ[ing] any deceptive act or practice, fraud, false pretense, false promises, or misrepresentation or to conceal, suppress, or omit any material fact in connection with the sale or advertisement of any merchandise, regardless of whether any person has in fact been misled, deceived, or damaged thereby.” S.D. CODIFIED LAWS §§ 37-24-6(1), 37-24-31.

551. Under S.D. CODIFIED LAWS § 37-24-31, Plaintiffs are entitled to a recovery of their actual damages suffered as a result of Defendants' acts and practices.

COUNT 46

**VIOLATIONS OF THE TEXAS DECEPTIVE TRADE
PRACTICES AND CONSUMER PROTECTION ACT
(TEX. BUS. & COM. CODE § 17.4 ET SEQ.)**

552. Plaintiffs incorporate by reference all paragraphs as though fully set forth herein.

553. This claim is included here for notice purposes only. Once the statutory notice period has expired, Plaintiffs will amend their complaint to bring this claim on behalf of the Texas Class.

554. Plaintiffs and the Texas Class members are individuals with assets of less than \$25 million (or are controlled by corporations or entities with less than \$25 million in assets). *See* TEX. BUS. & COM. CODE § 17.41.

555. The Texas Deceptive Trade Practices-Consumer Protection Act (“Texas DTPA”) provides a private right of action to a consumer where the consumer suffers economic damage as the result of either (i) the use of false, misleading, or deceptive act or practice specifically enumerated in TEX. BUS. & COM. CODE § 17.46(b); or (ii) “an unconscionable action or course of action by any person.” TEX. BUS. & COM. CODE § 17.50(a)(2) & (3). The Texas DTPA declares several specific actions to be unlawful, including: “(5) Representing that goods or services have. sponsorship, approval, characteristics, ingredients, uses, benefits, or qualities that they do not have”; “(7) Representing that goods or services are of a

particular standard, quality, or grade, or that goods are of a particular style or model, if they are of another”; and “(9) advertising goods or services with intent not to sell them as advertised.” An “unconscionable action or course of action” means “an act or practice which, to a consumer’s detriment, takes advantage of the lack of knowledge, ability, experience, or capacity of the consumer to a grossly unfair degree.” TEX. BUS. & COM. CODE § 17.45(5). As detailed herein, GM has engaged in an unconscionable action or course of action and thereby caused economic damages to the Texas Class.

556. In the course of business, GM willfully failed to disclose and actively concealed the conduct discussed herein and otherwise engaged in activities with a tendency or capacity to deceive. GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression, or omission of any material fact with intent that others rely upon such concealment, suppression, or omission, in connection with the sale of Affected Vehicles.

557. GM’s unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs and the other Texas Class members, about the true performance of the Affected Vehicles, the devaluing of the environmental impacts of its vehicles at GM, and the true value of the Affected Vehicles.

558. GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with intent to mislead Plaintiffs and the Texas Class.

559. GM knew or should have known that their conduct violated the Texas DTPA.

560. GM owed Plaintiffs and Texas Class members a duty to disclose the true environmental impact, performance, fuel mileage, and reliability of the Affected Vehicles, because GM:

- a. Possessed exclusive knowledge that they were selling and distributing Affected Vehicles throughout the United States that did not perform as advertised;
- b. Intentionally concealed the foregoing from Plaintiffs and the Texas Class; and/or
- c. Made incomplete representations about the environmental friendliness, fuel mileage, towing capacity, and performance of the Affected Vehicles while purposefully withholding material facts from Plaintiffs and the Texas Class that contradicted these representations.

561. Because GM fraudulently concealed the defective emissions treatment system, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to the Affected Vehicles by GM's conduct, they are now worth significantly less than they otherwise would be.

562. GM's omissions and/or misrepresentations about the emissions treatment system of the Affected Vehicles were material to Plaintiffs and the Texas Class.

563. Plaintiffs and the Texas Class suffered ascertainable loss caused by GM's misrepresentations and their concealment of and failure to disclose material information. Class members who purchased the Affected Vehicles either would have paid less for their vehicles or would not have purchased or leased them at all but for GM's violations of the Texas DTPA.

564. GM had an ongoing duty to all GM customers to refrain from unfair and deceptive practices under the Texas DTPA. All owners of Affected Vehicles suffered ascertainable loss in the form of the diminished value of their vehicle as a result of GM's deceptive and unfair acts and practices made in the course of GM's business.

565. GM's violations present a continuing risk to Plaintiffs as well as to the general public. GM's unlawful acts and practices complained of herein affect the public interest.

566. As a direct and proximate result of GM's violations of the Texas DTPA, Plaintiffs and the Texas Class have suffered injury-in-fact and/or actual damage.

567. Pursuant to TEX. BUS. & COM. CODE § 17.50(a)(1) and (b), once the notice period expires, Plaintiffs will amend to seek monetary relief against GM measured as actual damages in an amount to be determined at trial, treble damages for GM's knowing violations of the Texas DTPA, and any other just and proper relief available under the Texas DTPA.

568. Alternatively, or additionally, pursuant to TEX. BUS. & COM. CODE § 17.50(b)(3) & (4), Plaintiffs are also entitled to disgorgement or to rescission or to any other relief necessary to restore any money or property that was acquired from them based on violations of the Texas DTPA or which the Court deems proper.

569. On May 23, 2017, Plaintiffs sent a letter complying with TEX. BUS. & COM. CODE ANN. § 17.505 to Defendants. This claim is included here for notice purposes only. Once the statutory notice period has expired, Plaintiffs will amend their complaint to bring this claim on behalf of residents of Texas who are members of the class.

COUNT 47

VIOLATION OF THE UTAH CONSUMER SALE PRACTICES ACT (UTAH CODE ANN. § 13-11-1 *et seq.*)

570. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

571. This claim is brought by Plaintiffs on behalf of residents of Utah who are members of the class.

572. The Utah Consumer Sales Practices Act (Utah CSPA) makes unlawful any “deceptive act or practice by a supplier in connection with a consumer transaction,” including but not limited to indicating that the subject of a consumer transaction has sponsorship, approval, performance characteristics, accessories, uses, or benefits, if it has not; indicating that the subject of a consumer transaction is of a particular standard, quality, grade, style, or model, if it is not; and “indicat[ing] that a specific price advantage exists, if it does not.” UTAH CODE ANN. § 13-11-4.

573. Defendants knew, or had reason to know, that consumers would rely on their failure to disclose the defects in its emissions system. Defendants therefore engaged in an unconscionable act within the meaning of UTAH CODE ANN. § 13-11-5.

574. Pursuant to UTAH CODE ANN. § 13-11-4, Plaintiffs seek monetary relief measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of \$2,000 for each Plaintiff; reasonable attorneys’ fees; and any other just and proper relief available under the Utah CSPA.

COUNT 48

**VIOLATION OF THE VERMONT CONSUMER FRAUD ACT
(VT. STAT. ANN. TIT. 9, § 2451 *ET SEQ.*)**

575. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

576. This claim is brought by Plaintiffs on behalf of residents of Vermont who are members of the class.

577. The Vermont Consumer Fraud Act (Vermont CFA) makes unlawful “[u]nfair methods of competition in commerce, and unfair or deceptive acts or practices in commerce.” VT. STAT. ANN. TIT. 9, § 2453(a).

578. Defendants were sellers within the meaning of VT. STAT. ANN. TIT. 9, § 2451(a)(c).

579. Plaintiffs are entitled to recover “appropriate equitable relief” and “the amount of [their] damages, or the consideration or the value of the consideration given by [them], reasonable attorney’s fees, and exemplary damages not exceeding three times the value of the consideration given by [them],” pursuant to VT. STAT. ANN. TIT. 9, § 2461(b).

COUNT 49

**VIOLATION OF THE VIRGINIA CONSUMER PROTECTION ACT
(VA. CODE ANN. § 59.1-196 *ET SEQ.*)**

580. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

581. This claim is brought by Plaintiffs on behalf of residents of Virginia who are members of the class.

582. The Virginia Consumer Protection Act (Virginia CPA) lists prohibited “practices,” which include “[u]sing any other deception, fraud, false pretense, false promise, or misrepresentation in connection with a consumer transaction.” VA. CODE ANN. § 59.1-200.

583. Each Defendant is a “supplier” under VA. CODE ANN. § 59.1-198.

584. Each sale and lease of an Affected Vehicle was a “consumer transaction” within the meaning of VA. CODE ANN. § 59.1-198.

585. Pursuant to VA. CODE ANN. § 59.1-204, Plaintiffs seek monetary relief against each Defendant measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of \$500 for each Plaintiff. Because Defendants’ conduct was committed willfully and knowingly, Plaintiffs are entitled to recover, for each plaintiff, the greater of (a) three times actual damages or (b) \$1,000.

586. Plaintiffs also seek an order enjoining each Defendant's unfair and/or deceptive acts or practices, punitive damages, and attorneys' fees, and any other just and proper relief available under VA. CODE ANN. § 59.1-204 *et seq.*

COUNT 50

VIOLATION OF THE WASHINGTON CONSUMER PROTECTION ACT (WASH. REV. CODE ANN. § 19.86.010 *ET SEQ.*)

587. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

588. This claim is brought by Plaintiffs on behalf of residents of Washington who are members of the class.

589. The Washington Consumer Protection Act (Washington CPA) broadly prohibits “[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce.” WASH. REV. CODE. ANN. § 19.96.010.

590. Defendants committed the acts complained of herein in the course of “trade” or “commerce” within the meaning of WASH. REV. CODE. ANN. § 19.96.010.

591. Defendants are liable to Plaintiffs for damages in amounts to be proven at trial, including attorneys' fees, costs, and treble damages, as well as any

other remedies the Court may deem appropriate under WASH. REV. CODE. ANN. § 19.86.090.

COUNT 51

VIOLATION OF THE WEST VIRGINIA CONSUMER CREDIT AND PROTECTION ACT (W. VA. CODE § 46A-1-101 *ET SEQ.*)

592. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

593. This claim is included here for notice purposes only. Once the statutory notice period has expired, Plaintiffs will amend their complaint to bring this claim on behalf of residents of West Virginia who are members of the class.

594. Each Defendant is a “person” under W. VA. CODE § 46A-1-102(31).

595. Plaintiffs and West Virginia Class members are “consumers” as defined by W. VA. CODE §§ 46A-1-102(12) and 46A-6-102(2), who purchased or leased one or more Affected Vehicles.

596. Defendants engaged in trade or commerce as defined by W. VA. CODE § 46A-6-102(6).

597. The West Virginia Consumer Credit and Protection Act (West Virginia CCPA) prohibits “unfair or deceptive acts or practices in the conduct of any trade or commerce.” W. VA. CODE § 46A-6-104. Without limitation, “unfair or deceptive” acts or practices include:

(I) Advertising goods or services with intent not to sell them as advertised;

(L) Engaging in any other conduct which similarly creates a likelihood of confusion or of misunderstanding;

(M) The act, use or employment by any person of any deception, fraud, false pretense, false promise or misrepresentation, or the concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale or advertisement of any goods or services, whether or not any person has in fact been misled, deceived or damaged thereby; [and]

(N) Advertising, printing, displaying, publishing, distributing or broadcasting, or causing to be advertised, printed, displayed, published, distributed or broadcast in any manner, any statement or representation with regard to the sale of goods or the extension of consumer credit including the rates, terms or conditions for the sale of such goods or the extension of such credit, which is false, misleading or deceptive or which omits to state material information which is necessary to make the statements therein not false, misleading or deceptive.

W. VA. CODE § 46A-6-102(7).

598. Pursuant to W. VA. CODE § 46A-6-106, once the statutory notice period has expired, Plaintiffs will amend to seek monetary relief against the Defendants measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of \$200 per violation of the West Virginia CCPA for each Plaintiff.

599. Plaintiffs will also amend to seek punitive damages against the Defendants because they carried out despicable conduct with willful and conscious

disregard of the rights of others, subjecting Plaintiffs to cruel and unjust hardship as a result.

600. Plaintiffs further seek an order enjoining the Defendants' unfair or deceptive acts or practices, restitution, punitive damages, costs of Court, attorney's fees under W. VA. CODE § 46A-5-101 *et seq.*, and any other just and proper relief available under the West Virginia CCPA.

601. On May 23, 2017, Plaintiffs sent a letter complying with W. VA. CODE § 46A-6-106(b) to Defendants. This claim is included here for notice purposes only. Once the statutory notice period has expired, Plaintiffs will amend their complaint to bring this claim on behalf of residents of West Virginia who are members of the class.

COUNT 52

VIOLATION OF THE WISCONSIN DECEPTIVE TRADE PRACTICES ACT (WIS. STAT. § 110.18)

602. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

603. This claim is brought by Plaintiffs on behalf of residents of Wisconsin who are members of the class.

604. The Wisconsin Deceptive Trade Practices Act (Wisconsin DTPA) prohibits a “representation or statement of fact which is untrue, deceptive or misleading.” WIS. STAT. § 100.18(1).

605. Each Defendant is a “person, firm, corporation or association” within the meaning of WIS. STAT. § 100.18(1).

606. Plaintiffs and Wisconsin Class members are members of “the public” within the meaning of WIS. STAT. § 100.18(1). Plaintiffs purchased or leased one or more Affected Vehicles.

607. Plaintiffs are entitled to damages and other relief provided for under WIS. STAT. § 100.18(11)(b)(2). Because Defendants’ conduct was committed knowingly and/or intentionally, Plaintiffs are entitled to treble damages.

608. Plaintiffs also seek court costs and attorneys’ fees under WIS. STAT. § 110.18(11)(b)(2).

COUNT 53

VIOLATION OF THE WYOMING CONSUMER PROTECTION ACT (WYO. STAT. § 40-12-105 *ET SEQ.*)

609. Plaintiffs hereby incorporate by reference the allegations contained in the preceding paragraphs of this complaint.

610. This claim is included here for notice purposes only. Once the statutory notice period has expired, Plaintiffs will amend their complaint to bring this claim on behalf of residents of Wyoming who are members of the class.

611. Pursuant to WYO. STAT. § 40-12-108(a), once the statutory notice period has expired, Plaintiffs will amend to seek monetary relief against the Defendants measured as actual damages in an amount to be determined at trial, in addition to any other just and proper relief available under the Wyoming CPA.

612. On May 23, 2017, Plaintiffs sent a letter complying with WYO. STAT. § 45-12-109 to Defendants. If Defendants fail to remedy their unlawful conduct, Plaintiffs will seek all damages and relief to which Plaintiffs are entitled.

613. Pursuant to applicable state statutes, Plaintiffs will mail a copy of this action to the Attorney General's office for the states of Connecticut, Illinois, Louisiana, Missouri, New Jersey, Oregon, Texas, Utah, and Washington.

REQUEST FOR RELIEF

WHEREFORE, Plaintiffs, individually and on behalf of members of the Nationwide RICO Class and State Classes, respectfully request that the Court enter judgment in their favor and against Defendants, as follows:

A. Certification of the proposed Nationwide RICO Class and State Classes, including appointment of Plaintiffs' counsel as Class Counsel;

B. Restitution, including at the election of Class members, recovery of the purchase price of their Affected Vehicles, or the overpayment or diminution in value of their Affected Vehicles;

C. Damages, including punitive damages, costs, and disgorgement in an amount to be determined at trial, except that monetary relief under certain consumer protection statutes, as stated above, shall be limited prior to completion of the applicable notice requirements;

D. An order requiring Defendants to pay both pre- and post-judgment interest on any amounts awarded;

E. An award of costs and attorneys' fees; and

F. Such other or further relief as may be appropriate.

DEMAND FOR JURY TRIAL

Plaintiffs hereby demand a jury trial for all claims so triable.

DATED: May 25, 2017

Respectfully Submitted,

By /s/ Steve W. Berman
